THE AUTHOR.

PREFACE.

IMPLRIAL INDIA of the present day is a vast country and a varied field is a matter for surprise how little is known of its Geography as a whole To convey a comprehensive knowledge of the Geography and present Lytent and Resources of this great Empire, as well as of the Native States embraced therein, in a brief and convenient form, made as complete as a judicious utilization of available and authentic materials of the most recent date could render it, has long been the desire of the compiler. The difficulty of bring ing so wide a subject within convenient limits, so as to reduce the labour of reference to a minimum, has been very great, how far success has been attained in the attempt now made, the public will decide. A work like this -the first of its kind relating to Modern Indian Geography,-has involved considerable labor and thought, and no mans have been spared to make its form attractive as to arrangement, and its contents correct as to detail. As a handy work of refer ence for the literary and official world of India, as well as of Europe, and for those whose work or tastes may lead them to enquire about matters connected with England's Indian Empire of the present time, it is hoped that this Index will prove of some practical value

The authorities consulted will be found at the end of the text

BRIEF GENERAL DESCRIPTION

At ca, Position, Boundaries, &c

The territories under the Government of the Punjab include all the country from the river Jumna on the east, to the Suleman mountains on the west, and from Kashmir and the Swat country on the North to Ramutana and Sind on the South This extensive Province one of the most important in India, is situated between 27° 30 and 35° 0 North Latitude and 69° o to 79° o East Longitude, the extreme length being about 800 miles and extreme width about 650 miles The area of the British possessions within these limits is 104 973 square miles that of the native dependencies about 101,534 square miles the total area being about 206 507 square miles of which less than one-third are cultivated one fourth culturable and the remunder unculturable waste of the river Bias was annexed in March 1840 on the close of the second Sikh war Tullundur Doab and the hill district of Kangra, were ceded in March 1846 after the first Sikh war The country east of the river Sutley formerly designated the Cis Sutley States, and including the territory on the left bank of the Sutley was annexed in December 1845, the lapsed estates being brought under British administration in Tanuary 1847, and the hill district of Simla being required after the Gurkha war of 1814 16 territory, west of the river Jumna was transferred from the North Western Provinces in February 1848

Topography, &c

Punjab Proper is so called from two Persian words signifying 'five waters' in reference to the five great twers which flow through it. With respect to the propriety of the designation it is however to be observed that there are in fact six twens, the Indus, the Julium, the Clenab, the Ratz the Bias and the Sulley, but as the Bias has a much shorter course than the others it seems to have been disregarded when the name of the country was bestowed. In this description the whole country lying within the Lieute nant Governor's jurisduction, is designated as "The Punjab Province.

The northern and southern parts of the Punjab Province differ very greatly in physical features. On the north-east runs the western portion of the great northern mount ann barrier of our Indian empire known as the Humalayas or Humalch, consisting not of one but of a vast senes of ranges and valleys separating the upper basins of the large inces, from the Juman on the east to the Indus on the west, and skirted on the southern side by the lower or subordinate ranges known as the Sewaliks and Sult Range. The North West portion is also very mountanous, the fulls beyond the Indus forming a senes almost like a continuation of the Himalayas, and connecting with the Suleman range which forms the western boundary of the province for some 300 or 400 miles. The Salt Range runs east and west between the Ibelium and the Indus. The Southern face of this range is for the most part abrupt and precipitous, and the highest point on it is Saleszar 4 994 feet. On the west of the river Indus the range is continued until it meets the Suleman Range and the name then changes to that of the Kalabagh hills

The plans of the country may be described as vast expanses of alluvial clay and loam intersected by the great triers of the province of which the Indias is the chief, (see also Bombay Presidency) — The great rivers from which the Punjab Proper takes its name, form natural divisions of a large portion of the country, known here as the Doabs. These divisions stricth south west between the rivers with a regularity unbroken by any eminence of importance, and decline importeptibly from about 1,600 feet above sea level to about 200 feet at the junction of the united streams with the Indias. The long and narrow strip ween the Suleman range and the Indias is known as the Derojat (Upper and Lower), the

country lying between the Indus and the Jhelum, is the Sund Sagar Deab; that between the Jhelum and the Chenab, the fact or Chap Deab; that between the Chenab and the Ravi, the Rekhan Deab; that between the Ravi and the Bias, the Bari Deab, and that between the Bias and the Sutlej, the fullundur Deab. Of these Deabs the Sind Stgar is the most extensive, while that of the Ban is by far the most populous as well as the most important, containing as it does the three great cities of Labore, Amitsar and Mooltan. These Deabs have some features in common; in the submontane portions regetation is most luvuriant; in the vicinity of the rivers the tracts are enriched by their alluvial soil and fertilised by inundation, while as the higher central parts are approached, incultivated land, covered with low brush wood and reed grass, is met with, affording boundless grazing grounds for camels, cattle, sheep and goats. Towards the lower extremities of the large rivers, as they approach each other, the country becomes nearly level, in which, owing to the extremely scanty rainfall, cultivision is maintained by means of numerous small canals or irrigation channels, which intersect the country in every direction.

In consequence of the nearly unbroken flatness of the surface, the great rivers frequently change their courses in an extraordinary degree. The Sutley which formerly ran close to the town of Ludhiana, is now several miles to the northward; the Rau which once washed the walls of the city of Labore, runs in a channel three or four miles off to the northward; the Chenab which ten or twelve years ago ran close to the town of Rammagar, is now four or five miles distant, and the same applies to the Jhelum. So the Ghara at no great distance of time held for above 200 miles a course considerably westward of the present and parallel to it.

The Sutlej, the most eastern of the large rivers above named, rising in Thubet, unites with the Bias at Harikl, a few miles from the village of Sobraon, the seeme of our great battle with the Sikhs, the united stream for about 300 miles to the confluence with the Chenab, is then called the Ghara. The Chenab meets the Jhelum near Jhang, and the Ravi near Sinal Sidhu; this stream then loses the name of Chenab and takes the name of Trimah, or 'three waters' for a further distance of 110 miles to the junction with the Ghara at Madwala; from this point to the confluence with the Indus near Mithankot, a further distance of about 60 miles, the single stream of these united waters bears the name of Punjnad, or 'five streams.' These noble streams, besides affording means of inland navigation scarcely equalled, are of inestimable value for the purposes of irrigance.

Amongst the minor rivers of the province, are the Cabul and Swat rivers in the Peshawar valley, the Kuram and Lumi in Upper Derajat, the Soham near Rawalpindi and the Markanda and Ghagar in the Umballa Instrict, the two last-named losing themselves in the Bickaneer desert.

The country lying between the Sutlej and the Jumna is not properly part of the Punjab Proper. It includes in the upper part, the Cis Sutley states, and in the lower, the Delhi territory. The hills in this latter pointon of the province appear to be spurs or offshoots of the end of the Aravalli range, the principal being the hills in the Delhi and Gurraon districts.

The means of communication in the Punjub include rivers and canals, ordinary roads and railroads. The water communication is about 2,500 miles; the length of made roads about 2,500 miles, and the length of Railway lines open for traffic at the present time is about 2,500 miles. Of the Railway lines there are four within the limits of the province, 115. the Sind, Punjab and Delhi Railway, open for traffic; the Punjab Northern State Railway open up to Ihelum, the extension to Rawalpinds being under construction and which will be very shortly opened for traffic; the Indue Vality State Railway from Moolian 1st il Bahawalpurt of Rohri, open for traffic, and a small section of the Railway from Delhi to Rewart, with a branch to Farakangur, also open for traffic. feeders to these lines, viz from Ludhiana to Ferozepore, from Amritsar to Shahpur, from Jullundur to Hoshiarpur from Umbulla to Kulka from Raiwind to Kasur, from Wazirubad to Jummoo 11 Stilkot and from Wazirabad to the Salt Range, are in contemplation Among the principal of the various canals which run through the province are, the Bari Doab Canal the Western Jumna Canal the Sirhand Canal, the upper and lover Sutles Canals, and the Delhi and Gurgaon irrigation works Of these the Bari Donb Canal is the most important, leaving the Ravi at Madhopur where the river debouches from the lowest of the Himplayan ranges the main line 247 miles in length, after throwing off branches to Labore Kasur and Sobraon, passes through Amritsar, and crossing the Sind Punjab and Delhi Railway at Changamunga station, again empties itself into the Ravi addition to the main line 247 miles the Kasur branch 84 miles, the Sobraon branch 61 miles and the Lahore branch 74 miles make up an aggregate length of 466 miles The main line of the Sirhind canal leaves the Sutles at Rupar

Climate and Sanataria

The climate of the Punjab is characterized by much drought, and as compared with that of the rest of Northern India is more given to extremes, the heat being intense in the summer months owing to the general scantiness of the run fall (except in the sub-Himalayan districts) and the cold great during the cold season which lasts longer than that of countries further south. The hot season begins about the middle of April and the heat is almost intolerable from that time till August, being greater than elsewhere in India Prequent dust storms then occur and on calm days spiral columns of dust arise and travel on yard whirling round continually for one or two miles before subsiding September the heat moderates October is temperate and agreeable and from November to April it is cold and frosts occur at night. The run fall throughout the province chiefly occurs in July and August but a considerable amount of run falls in the winter and early spring months especially in the northern and western districts. At the hill stations the rain fall is considerably heavier than in the plains. The following are the Sanataria of the Punjab province, they are 15 in number, via -- Murree in district Rawal pindi height 7 518 feet, Cherat in district Peshawar, height 4 497 feet, Sakesar in district Thelum height 4 994 feet , Dalhousse height 6,740 feet, and Bakloh height 4 584 feet in district Gurdaspur, Blagiu, height 4 058 feet, and Dharmsala height 6.111 feet. in district Kungra, Simla, height 7,084 feet Kasauli, height 6,173 feet Dagshar height 6 100 feet Sibathu height 4 253 feet, Jutogl height 6,370 feet Solon, height 5 165 feet, and Sanawar, height 5 750 feet, all in district Simla, and Sheil Budin, height 4 516 feet, in district Dera Ismail Khan See also list of Punjab Military Stations

Stables and Manufactures

The crops cliefly grown in the Punjab are, in the spring harvest, wheat, barley, pulses oilseeds, vegetables, tobacco and poppy, and in the autumn harvest, millets, muze rice cotton sugar cane pulses oilseeds, vegetables and indigo The cultivation of ter is almost exclusively confined to the Kangra valley, in which there are about thirty plantations. Of the mineral products of the Punjab the most important is the rock salt found in the hills of the Salt Range, and Kanlar, which consists of irregularly shap ed pieces of calcareous concrete, abounds in most districts. It forms the chief material for road making and also yields when burnt, an excellent lime for mortar Alum is pro duced in large quantities at Kalabigh on the Indus in the Bannu district Coarse wools are produced in several of the plain districts and of a better description in the hills, but the finer kinds of wool used in the manufactures of the principal towns are chiefly obtained from countries beyond the frontier The cultivation of silk has been attempted in a few

places, but without any great success as yet

Agriculture is the chief occupation of the people, but the minufacturing industry is
very considerable and important, silk and cotton goods are extensively made in most of the
large towns,—the silks of Mooltan Arustur, Lahore, Shupabad and Leia being noted in the
Indian markets,—carpets, brocades, cutlery and arms are also extensively manufactured.

Form of Administration

On the annevation of the Punjab in March 1849, a Board of Administration for its affairs was constituted, to which the Commissioners of the Trans and Cis Sutley States were also made subordinate. The Board was abolished in February 1853, and its powers and functions were vested in a Chief Commissioner, subordinate to whom a Judicial Commissioner and a Tinancial Commissioner were appointed. After the transfer of the Delhi territory from the North Western Provinces, the Punjab and its dependencies were constituted a Lieutenant-Governorship from the 1st January 1859, Sir John Lawrence who had been hitherto the Chief Commissioner, being appointed the first Lieutenant Governor.

In 1866 a Chief Court, consisting of two judges, a barrister and a civilian, was substituted for the Judicial Commissioner, and which was constituted the final Appellate authority in criminal and civil cases, with powers also of original criminal jurisdiction in cases of European British subjects charged with serious offences. In 1869 a third judge, a civilian, was added to this court,

For administrative purposes the Punjab Province is divided into ten divisions, with an average area of 10,567 square nules, each under the control of a Commissioner. This end divisions comprise thrift two distincts, with an average area of 3300 square miles, each under the control of a Deputy Commissioner, and these distincts are again sub-divided into 33 habits, or revenue and judicial sub-divisions of distincts, with an average area of about 800 square miles, under Tabuldars or sub divisional officers

Census

On the 10th of January 1868, a Census of the British possessions under the Government of the Punjab, was taken, which showed a total population of 17,604,505 souls. At the beginning, of 1855 the total population has estimated at not less than 14,668,287 inhabitants, the increase in 13 years amounting to nearly three millions. No later cansus has been taken, but presuming that the population has increased in the same ratio during the past eleven years, (e.g., from the date of the last census) as it did in the 13 years preceding, it may be noughly calculated that the population of the province at the end of 1878 amounted in round numbers to 20,143 coo souls. The proportion of females to males is a little less than half. The average population per square mile for the whole province was 168 in 1868. Of the total population the agricultural classes compose 55 per cent, non agricultural 45 per cent. The whole population of the British portion of the Punjab has been classified as follows —9,334 472 Mahomedans, 6,125 616 Hindius, 1,144 o88 Sikhs, 978 198 Aborigines and others, and 22,131 Christians, European, East Indian, and Native

The North-Western Provinces.

Comprisme 7 Dicesions, or Commissionerships, embracing 35 Districts.

BRIEF GENERAL DESCRIPTION.

Area, Position, Boundaries, &c.

The territories under the jurisdiction of the Lieutenant Governor of the North Western Provinces lie between the parallels of 23° 51' and 31° 5 North, and 77° 4 and 84° 43 East Longitude Inclusive of the territory of Native Feudatory States within the jurisdiction, estimated at 5,125 square miles, they comprise a total area of 86,902 square These provinces are bounded on the North by a part of the Punjab hill state of Bushahr, Chinese Thibet, Oudh (now included in the N W P) and Nepal, on the South by the Chota Nagpore Division of Bengal, the Rewah State, the Native States of Bundel khand and the Saugor Division of the Central Provinces, on the East by the Behar Pro vince of Bengal, and on the West by the Native States of Gwalior, Dholpur and Bhurt pore of the Central India Agency, and the river Jumna up to its confluence with the Tonse, beyond which point the latter stream forms the boundary separating the Provinces from the Native States of Sirmur and Jubbal in the Punjab jurisdiction

Topography, &c

The greater portion of this territory consists of an alluvial and gently inclined plain, dipping towards the south east and open on that side. To the south west this plain abuts upon the outlying spurs of the great elevated plateau of Central India On the north east he the plains of Rohilkhand and Oudh, on the south east, the plains of the Benares Division To the south west of the river Jumna hes the tract called Bundelkhand, which for a few miles from the banks of that river on the south, differs little from the comparatively level country on the north Beyond this level country, hills appear, at first isolated then gradually assuming the formation of groups and ranges, finally merging in the Khaimur and Vindhy chains, covered with extensive forests and jungle, and traversed by streams that form tor rents during the rainy season. Turning to the north we are met by a marshy belt of land known as the ' Tarai,' and between this and the hills, by a belt of waterless jungle, formed of boulders and the debris of the lower ranges of the Himalayas, and extending from four to fourteen miles in breadth, called the 'Bhabar' To the west of the 'Bhabar' come the Kotla, Path and Dehra Duns or Valleys The largest of these 'Duns,' which all he nearly parallel to the great chain of the Himalayas beyond, is the Dehra Dun, 48 miles long, the centre of which (2,229 feet above the sea level), divides the valley into two portions, with two distinct slopes of dramage to the east and west, the Asnu and Suswa rivers ema nate from this central elevation, the former flowing to the Jumna, the latter to the Ganges

The Himilayan tracts included within these provinces consist of the districts of Kumaun and Garhwal, and native Garhwal or Tehn,-the Kumaun division embracing all the ranges and valleys from the plains to Thibet-and of the tract known as Janusar Bauar The exterior ranges rise to a height of 7,000 or 8,000 feet, increasing gradually in parts, and in some places rising abruptly to this height. The elevation gradually increas es again until 10,000 and 11,000 feet are attained in the spurs directly connected with the snowy range, we then meet the peaks of Trisul (22,342 feet), Nandi Debi (25,661 feet), Nandi Kot (22,538 feet) Badrinath and others, all situated to the south of the great central axis of the Himalayas The Jaunsar Bawar tract comprises similar hilly country lying between the upper courses of the Jumna and Tonse mers These tracts form the great timber reserves of the North Western Provinces

The principal river of these provinces is the Ganges, rising in the mountains of native . Garhwal or Fehri, and flowing with a south easterly course. On the right bank of this river near Hardwar, the great Ganges Canal is drawn off The next river in importance is the Jumna, also rising in native Garhwal to the west of the Ganges, and flowing for nearly

two thirds of its course in almost the same direction as the Ganges, finally meeting with it at Allahabad. The dischurge of the Jumna as it enters the plums his been estimated at 4,000 cubic feet per second in March, and that of the Ganges at Hirdwar at 7,000 cubic feet per second, at Benares the breadth of this last named river during the winter season is 1,400 fiet, with an average depth of 35 feet, and a discharge of 19,000 cubic feet per second During the runs season the breadth at the same place is 3 000 feet and the rise 43 feet. The other rivers flowing into the Ganges, are the Ramganga rising in the Tarai, the Gumti rising in the swamps of Rohikhand, and the Gogra, called in its higher course the Kairrala. This last river uses with the Ganges itself in volume and the number of its tri butary streams, while it surpasses the Ganges in velocity. On the right bank, the Jumna receives the large rivers that drain the eastern portions of the Ruputana, Central India and Bundell, hand Srutes, ir , the Chambal, the Betwa and the Ken

The canals of these provinces irrigate nearly one million acres annually and yield acresione of close upon a quarter of a million sterling. The principal are the Ganges Canal, opened in 1851, consisting of 654 nules of main canal, and 3.078 miles of distributances, watering a tract of country in the Doab, 320 miles in length and 50 miles in breadth the Eastern Jumna Canal, opened in 1830, consisting of 130 miles of main canal and 635 miles of distributance, watering a tract 120 miles long and 15 miles broad the Agra Canal, opened in 1874 15 miles in length, irrigating about 400 000 acres the Dehra Dun Canal, 67 miles in length, irrigating about 13 000 acres and the canals in the Hamippur and Jhansi districts, with a tord length of 33 miles. Besides these there are other minor canals in Rohilkhand, opened at various times since 1874, for irrigating the belt of country along the Tara where much rice is raised.

The East Indian Railway (1,2793/ miles in length) runs through the middle of these provinces up to the city of Delhi From Allahabad a line to Jubbulpore (2233/ miles in length) connects the East Indian Railway with the Great Indian Peninsular Railway The Oudh and Rohilkhand Railway (5473/ miles in length) joins the East Indian Rul way at Benares, Cawngore and Aligath The Sind, Puniab and Delhi Railway (5533/ miles in length) runs from Ghaziabad on the East Indian line, to Lahore and Mooltan in the Punrib, val Meerut, Saharanpur and Umballa The State Railway from Agra tre Bhurtpore joins the Rajputana State Railway, running from Delhi to Jeypore and Amere The Sindhia State Railway (69 miles in length) runs from Agra to Gualior vid Dholpur There are other light Railways connected with important centres of the East Indian and Oudh and Rohilkhand lines, per -The Hathras and Muttra line, length *0 miles, in full working order, the extension to Achnera from Muttra being in course of construction, the Gha spur and Dildarnagar line, length 12 miles the Cauntors and Farukhabad line, length 84 miles also under construction, while surveys are in progress for the Cawnpore and Mau Ranspur line, the Manskpur and Banda line, the Bareslly and Poliblut line, the Suapur, Lucknow and Rac Barcell, line, the Balramghat extension to Bahrauch and Gorakhpur 112 Gonda and Basts, the Jaunpur and Asamgarh line, the Morad abad and Ramnagar line, and the Roorkee and Dehra line 111 Hardwar The whole of the North Western Provinces are also well supplied with first-class metalled roads, the chief of which is the Grand Trunk Road, running through the principal towns of the Doab

Climate and Sanataria

With the exception of the Tarat, the districts of these provinces are as a rule healthy. The climate is however subject to great extremes, the cold of writer being severe and the heat of summer almost intolerable. The hot westerly winds of April May and June are especially trying to European constitutions. The cold season commences with the close

of the rains in October and lasts until April in the upper districts, in the Benares Division it may be considered to extend from November until the beginning of March weather succeeds and lasts until the beginning of the rains, which set in usually about the latter end of June and continue until the middle of October The thermometer during the hot weather months ranges from 86° to 109° in the shade, the average being about The average yearly rain fall in the plains is from 30 to 45 inches, increasing gradually towards the hills, where Mussoorie receives 90 inches and Naim Tal 115 inches The climate of the Benares Division is more moist and cool, and partakes somewhat of the character of that of Bengal The Sanataria of the North Western Provinces, seven in num ber, are the following, 212 -Chakrata height 6,885 feet, Mussoorie, height 7,026 feet, and Landour, height 7,459 feet, in district Dehra Dun Ranikhet, height 6,885 feet . Nami Tal, height 6,568 feet, Almora, height 5,074 feet, and Pithoragurh, height 5,468 feet, in district Kumaun See also list of Military stations at page 35

Stables and Manufactures

The principal crops grown and exported are cotton, opium, indigo, rice, barley, maize, sugar-cane, wheat, potatoes, oilseeds, and the millets, tobacco, lacdye, safflower, and salt petre are also exported Tea is largely grown in the Dehra Dun and Kumaun districts, and potatoes are extensively produced in several districts, having become one of the great food staples of the country The North Western Provinces are not rich in minerals. but iron, lead and copper-ores abound in humann, kankar, an inferior kind of limestone, much used for roads and building purposes, is very abundant. The principal manu factures are sugar at Shahjahanpur, leather at Campore, carpets and embroidery at Murza pore, and kimkhwabs (gold brocades) at Benares Brass and copper utensils for cooking purposes, cabinet work and cutlery are manufactured in every considerable town

Form of Administration

The Lieutenant Governor is the chief executive authority in these provinces, which for administrative purposes is divided into seven divisions embracing 35 districts, each divi sion is under the superintendence of a Commissioner and each district under a Magistrate Collector The districts are again sub divided into talisits or sub divisions, each under a native Tahsildar or Sub-Collector Certain districts are regulation while others are non regulation The Regulation districts are those in which all the laws and regulations appli cable to these provinces are in force, the Non Regulation districts are those to which only certain portions of the law have been extended. They form the Kumaun and Jhansi divisions, also the Tarai. The chief executive officers of the non regulation districts are styled Deputy Commissioners, having civil, criminal and revenue powers In the regulation districts besides the Magistrate-Collector, there are three classes of Civil Judges, all subor dinate to the High Court at Allahabad, the seat of Government

Census

The last census taken of the North Western Provinces was in 1872 In 1848, 1853 and 1865 enumerations of the population were made, with increasing accuracy on each successive occasion In 1865 the total population recorded was 29 684,347, in 1872 the population numbered 39,776,442 souls The increase has been 3 65 per cent , while the Hindu population shows an increase of from 25 495,871 in 1865 to 26,542,600 m 1872, the Muhomedans appear to have remained almost stationary, their total for 1872 showing 4 186 913 against 4,188,476 in 1865 The population per square mile for the whole of the North Western Provinces was 376 m 1872, and was classified as follows - 21,626 Christians, Europeans, East Indians and Natives, 4186,913 Mahomedans, 26,543,600 Hindus, 14,159 Buddhists and Jains, and 11,144 Abongines and others. The agricultural population is 56 per cent of the whole. The district and city of Benares are the most populous in these provinces.

BRIEF GENERAL DESCRIPTION

Area, Position, Boundaries, &c.

The Province of Oudh, which was annexed by the British Government under the administration of Lord Dalhousie in 1856, was at first a separate Chief Commissionership under the Supreme Government, it was afterwards incorporated with the North Western Provinces, on the 1st January 1877, the Lieutenant Governor of the North Western Provinces, bearing the additional title of Chief Commissioner of Oudh

The Province is situated in the middle valley of the Ganges, which liver forms its Southern boundary, on the East and West it is enclosed by the older acquired distincts of the North Western Provinces, with Jaunpur, Bast and Azamgarh on one side, and Shahjahanpur, Farukhabad and Gawapore on the other, on the North the boundary, partly natural and partly artificial marches with that of the independent kingdom of Nepal. Its greatest length from North West to South East is 234 miles, and its breadth 150 miles. Oudh lies between 25° 34 and 29° 6 North Latitude, and 79° 45 and 83° 11 East Longuide. The total area of the Province is 23,954 square miles, of which 13 126 square miles are cultivated with crops, 952 square miles are covered with orchards of mango and mohwa trees, 1,134 square miles, or about 6½ per cent of the total area, are covered with lakes ponds and rivers, 4,78 square miles are occupied by the sites of towns and villages, 243 square miles with roads, 1,642 square miles, or about 7 per cent, are barren waste, and of the remainder 825 square miles are Government Porests, while 5,554 square miles, or about 22 per cent of the whole, are arable waste

Topography, &c

The general surface of the country is a plam sloping from North West to South East, varied here and there with almost imperceptible undulations, the highest part of the country being the high land north of Dudwah Ghat in Khairagarh, which is 600 feet above sea level, while the lowest point, on the border of the Jaunpur district, is 230 feet. The first or lower chain of the Himalayas, which bounds the province on the North East along the Gonda district, is from 2,500 to 4 000 feet in height. This chain is one of four parallel ranges running through Nepal, each loftier and more remote, one rising a little above the other, all of which are distinctly visible in the rains from Fyzabad and Sitanur, a distance of nearly 200 miles The main rivers are the Ganges, which runs along its southern boundary, the Gumti, the Sarda, the Kauriala and Gogra, the Ramganga, the Sai and the Rapti. Their aggregate dry weather discharge is 18,800 cubic feet per second. and the entire tiver discharge reaches 20,000 cubic feet, or half the quantity of the five rivers of the Punjab, their channels he on an average from 20 to 50 feet below the level of the country The rivers of the province afford about 1,350 miles of navigable stream Numerous Jhils or marshes exist, only two of which however can be dignified with the name of lakes, 12". Behtr in district Partabgarh, and Sandi in district Hardor The forests of Oudh he principally in the districts of Kheri, Bahraich and Gonda, on the North

The Oudh and Rohlkhand Rahway runs through the entire length of the Province, connecting with the Last Indian Rahway at Beares, Cawapore and Aligarh Surveys are in progress for branch feeders to this line as detailed already at page 37.

Oudh is a tropical country, a little smaller than Scotland, and somewhat larger than Denmark, but with a population more than double that of both countries put together The country along the nor-therm fonter is thinly population.

Climate.

Though the climate is subject to extremes of temperature, sometimes rising to 112' in the summer and sinking to 35' in the winter, at may be briefly described as a mean between that of the Punjab and North-Western Provinces, and that of Bengal, for while the cold is not so great, nor the dry heats so intense as in the former, the difference in the seasons is far more marked than in the lower Provinces of Bengal with their moister though more equable temperature. Its three seasons, the cold, the hot and the rainy, are well defined, the first extending from early in October to end of March, the second following, and the third commencing with fair regularity in the middle of June and lasting to the middle of October. To a European the climate of Ondh during the short cold season seems nearly perfect. The plains are subject to hot sultry winds from the west and occasional fierce hurricanes.

Staples and Manufactures.

A large amount of wheat and other eduble grains is produced in and exported from Oudh; sugar, tobacco, saltpetre and oilseeds are also produced and exported in considerable quantities. Some of the Oudh rice and tobacco are of superior quality. The population being essentially agricultural, the province can boast of no manufactures worth mentioning.

Except minute particles of gold, which are washed down by the hill torrents in quantities too infinitessimal to repay their collection, valuable minerals are not known to exist. Kankar or carbonate of lume exists all over the province, and is used for the production of lume for building, and for roads.

Form of Administration.

The administration of Oudh is carried on under the Non-Regulation system by the the commissioner of the North-Western Provinces, who is also styled Chief Commissioner of Oudh, (tile the opening paragraph of this description). For administrative purposes the province is divided into four divisions, each controlled by a Commissioner, and subordinate to Commissioners are 12 Deputy Commissioners, each holding executive charge of a district. In every district there are three or more subdivisions, the direct management of each being entrusted to a native Sub-Collector, or Tahsaldar. There are 44 such sub divisions in the 12 districts of this province.

Census.

There has been but one Census in Oudh, taken on the night of the 1st February, 1869. The Area of the Province being 23,954 square miles, and the population as shewn by the Census Returns, 11, 220,232, there were then 465 persons to each square mile. In density of population Oudh surpasses most parts of India and no European country approaches it. The Census Returns classify the population as follows.—1,201,253 Mahomedans; 9,971,236 Hindus, 7,531 Christians; 40,212 Soldiers and Prisoners, European and Nature.

BRIEF GENERAL DLSCRIPTION

Arca Position Boundaries &c

The territory under the administration of the Lieutenant Governor of Bengal, compusing the four provinces of Bengal Proper, Behar Chota Nageore, and Orissa hes between 19° 18 and 29° 30. North Lattude and 81° 35 and 9° 46. East Longitude These provinces constituting the Bengal Government are bounded on the North by the independent native states of Nepal Sikkim and Bhutan on the East by the province of Assam, the hilly country occupied by the Lushai and Kuki tribes and the Arakan Hills and District of the British Burnah Province, the South is washed by the sea known is the Bay of Bengal, and on the South West and West by the Ganjam district of the Madras Presidency, the Central Provinces the Rewah Native State, and districts Mirzapur, Benares, Ghazipur and Gorakhpur of the North Western Provinces The total area of this jurusdiction is 193 581 square nules, inclusive of 38 379 square nules belonging to the Native Fendatory States connected therewith

Topography &c

Broadly speaking the chief characteristics of these extensive provinces are, the plans of the Lower Ganges sloping from the north west, the plans of the Lower Brahampatris from the foot of the Garo Hills, sloping due south and the great Delta of Bengal On the south west of these great plans use the high lands of Chota Nagoror and Orissa, on the east are the Chutzgong, Tipperah Garo Khasa and other hills on the north is the hills Darpeling District and the Bengal Himalayas

Bengal Profer is the great aliminal and deltate plans between the Hunalayas and the Bay of Bengal

Behar is the Gangetic plum lying between Bengal proper and the North Western Provinces. In Behar is also included a narrow range of hills in the Sonthal Pargunas, known as the Rayrahal

Clota (or Chutta) Nagpore is the elected and hilly country west of Bengal Proper, south of Behar, and north of Orissa.

south of Echar, and norm of Chasse.

Orusa compruse a long flat delivral strip between the hills and the sea, (forming one settled province) and a large hilly tract beyond occupied by tributary states.

The greater part of Bengal Proper and Behar are uninterrupted flats subject to in undation, rich in black mould and most fertile, the Dacca Division being so fertile that it has been called the granary of Bengal

Turning to the mountains we have in the small part of the Himalayan chain coming within the Bengal jurisdiction elevations sarjing from 7 000 feet above the ser at Darjeeling on the south, to lofty Kanchinjunga 8 000 feet on the north west. The Raymahal hills

in the Southel Parganas, ending with the town of that name on the Ganges, form the existen projection of the Central Indian formation running through the Choia Nagpore province, which is hilly throughout. Several broken detached hills, some of considerable height appear as irregular links of the main chain, the largest of these is Parasanath rising to a height of 4 488 feet above the sea. A continuation of the same Central Indian formation runs through the tributary states of Orisas, with varjing elevations of from 2 000 to 4,000 feet above the sea. On the east, the mountainous tracts of Hill Tipperah and Chitagong are a continuation of the Manipur and Lushai ranges, with elevations rising to 11 and 12,000 feet

The Ganges river touches the Behr Prosince at Buxir, on the Last India Railway, and enters it near Chupra, where the Gogra from the north meets it. It then receives the Scane on the south, and the Gandak and Kost again on the north, all rivers of considerable volume. Turning the corner of the Rajmahal hills, the Ganges flows with its great set body of water rin a sputh eastern'd acciton, when the Brhagrith first flows any from it on the west side to form the Hooghly, the most mangable of its many mouths. The mun stream continuing its course, and throwing off several channels to form the Delta, meets the main stream of the Brahmaputra (known here as the Jamuna) at Goalundo, the terminus of the Eastern Bengal Railway, the amalgamated column then empties itself by numerous channels into the Bay of Bengal

From these rivers the Gangetic Delta is formed Between the cultivated portions of this Delta and the set is a tract bearing the general name of the Sundarbans, covered with dense forest and which, owing to the imposs of the sea and wild beasts, is well as its general unhealthness has baffled the enterprise of modern man The area of this tract is about 5 340 square miles

The other rivers of these provinces are, on the cast, the Megna (called in its apper counter the Surma), which is the high road to Cachar as it affords good water communication for the greater part of its length, the Fenny, rising in Hill Topperah and the Karnafuli rising in the highlands of the Lushai country. The two last flow into the Day of Beneal.

On the west of the great Gangetic Delta, not helping however to form it, but joining the Hooghly between Calcuita and Suggor Island, are the Damuda, the Rupnarain and the Cossye, all rising in the highlands of Chota Narrore

The Subaranrekha also rising in Chota Nagpore, the Baitarm and Brahmani, rising in the highlands of Onssa and the Mahanadi rising in the Central Provinces, flow cist wards into the Bay of Beneal

The East Indian Railway runs through the middle of these provinces from Calcuita up to Buxar, a portion of it from Kanoo Junction running due north, and then turning due west joins the line again at Lakhisera; this portion is called the "I oop' line, to distinguish it from the straight or "Chord' line connecting these two stations. The Trihoot State Railway (82 miles in length) runs from Barh on the East Indian line to Trihoot, with a branch to Durbhan, ab. The Nübhari State Railway (27 miles in length) branches off from Nulhati station on the East Indian Railway to Azingini. The Eastern Bengal Railway (12 miles in length) mus from Calcuita to Godlundo, tapping the Eastern Districts of Bengal, while the South Eastern State Railway (28 miles in length) connects Calcuiti with Port Criming. The Northern Bengal State Railway (210 miles in length), tapping the principal juste, rice and tobacco exporting districts of Northern Bengal and the east growing country at the foot of the Humalay is leaves the Lastern Bengal and the east

Portida station, and after crossing the river at Sara runs to Siligon, 30 miles from Durjeeling*, a branch line from Parhattipur station runs to Rungpore to be eventually extended to Dhubin. The Gya State Railway (57 miles in length) branches off from Patna city, on the Last Indian line, to the town of Gya.

The Grand I runk road runs direct from Calcutta to Benares and is the great highway for truffic in those portions of Behar and Chota Nagpoie not having Railway communication. In the Deltaic country of Bengal, water communication is much availed of, hence Bengal Proper is not so well supplied with roads as the other Bengal Proper.

The Canals of these provinces lie principally in Orissa and Behar. The Orissa scheme is it is termed, embraces the Kendrapara canal with branch to Gundukia on the Gobri river, length 39 miles, irrigating about 100,000 acres The Patamundi branch, length 40m iles, the Faldanda (27 miles) and Machgong (30 miles) canals, irrigat ing about 50,000 acres, the High Level canal for impation and navigation, running from Calcutta to Cuttack rea Midnapore, a length of 52 miles The other canals are, the Midnapore canal connecting Midnapore with tide water in the Hooghly at Oolaharia, 16 miles below Calcutta, having a navigable length of 53 miles, the Tidal canal length 28 miles, connecting the rivers Hooghly, Haldi and Russulpur in the Hidielec portion of the Midnipore District, the Soane canals for the irrigation of South Behar, to be extended eventually to Mirzapore on one side and to Monghyr on the other, with branches and distributaries in the districts of Shahabad, Gya and Patna, the Arrah canal, 65 miles, the Western main canal, 22 miles, the Patna canal, 861/2 miles, and the Buyar canal as inites. This or extensive shallow takes are very numerous, but their limits are generally ill defined. The most extensive and remarkable are the Monda Jhil the Dulabru Jhil and the Chullam Jhil in the district of Rajshahye, the Ala Jhil in the district of Jessore and the great Jhil in the district of Backergunge.

Climate

Although these four Provinces, (Bengal Proper, Behar, Chota Nagpore and Onssa) under the Bengal Government are situated for the most part without the Fronical Zone, their climate is characteristically tropical. In the annual range of their temperature, as well as in point of humidity and runfall, the eastern and western portions of the whole country which includes them, are strongly contrasted. The mean temperature of the whole year is 8.º in Onssa and Behar, and 73° in the Chittigong and Dicca Divisions In Orissa and the western part of the Gangetic Delta, December is the coldest month of the year, elsewhere the mean temperature of January is somewhat lower. During the rains the temperature of the Hazaribach plateau falls more rapidly than that of any other part of Bengal Between May and October the fall at Hazanbagh is rather more than 11', while at Berhampore in the Delta, and in about the same latitude, it is only 434', and at Calcutta a little more than 3°, even at Patna it does not exceed 8°. The high humidity of the atmosphere in Bengal Proper, and more especially in its eastern districts has become proverbial. The were annual humidity of a large portion of Bengal is how ever sensibly lower than that of Lindand The quantity of vapour in the air of Calcutta is on the average of the year about twice as great as in that of London. The absolute liumidity of the atmosphere is greatest on the coast of Orissa and the Sundarbans and diminishes inland as the distance from the sea increases. In the cold weather and spring months, this decrease is rapid everywhere except in Eastern Bengal

^{*} Note —A comp my for il o purpose of coastri up na ma gand work gas can amway be ween to te minus of the Northern Bengal State hailway at \$150 and the late not Danger no has been started with Go criminal a d

The districts of Eastern Bengal, more especially those of the Chittagong Division. show the heaviest rainfall. In this division the average annual fall almost everywhere amounts to upwards of 100 inches In the Darjeeling and Jalpaiguri districts, on the exposed hill flanks and at their base, even this large amount is greatly surpassed minfall is also higher on the plains of the coast, than on those lying more inland. By far the greater part of the rainfall of the Province falls between the months of June and October, showers also occur in the hot weather months, and in the months of February and March had storms are not unfrequent. In the eastern districts rain occurs occasionally in the cold weather months, but is less common in the Delta and the country further westward. During February, March, April and May the prevailing wind is from the south. The climate of Orissa is by no means as healthy as the other portions of these provinces. The climate of Behar and of Chota Nagpore is not unlike that of the North Western Provinces in its eastern districts, while that of the Bengal Delta or Bengal Proper may be summed up as follows for the different months of the year -" January-Air screne and cold. Winds N and N W For in early morning and heavy dews at night. Thermometer minimum 58° maximum 76°, mean 67° February -Pleasant and cool till the middle. Wind then changes to Sand S E. Thermometer 65° to 83°, mean 74° March-The hot season begins, the sun is powerful and the days warm. Strong winds from the south. Storms from the N W towards middle and end, accompanied by violent gusts, with clouds of dust, followed by rain Thermometer 74° to 86°, mean 80° April-South wind moderating the heat till the 20th, when the wind becomes hot sometimes Thunderstorms and rain. Thermometer 79° to 91°, mean 85° May-Very disagreeable. Air close, still and oppressive Nights very sultry, wind light and from south, but storms frequent with thunder and rain Thermometer 81° to 93°, mean 87° June to September-This is the rainy season. In the second week of June the wind veers round to the east and after several days of close muggy weather, the rains commence and continue with little intermission till October The atmosphere during these months is cooler and the weather is generally pleasant, but the damp is extreme and everything gets mouldy. Thermometer 78° to 90°, mean 84° October-Is a varrible month The rains are breaking up and the winds changing The days are sultry, but the mornings and evenings are cool, the air becomes clear and night dews recommence. Mean temperature 79" November-delight fully fair and pleasant. Cold sharp winds blow from the North West, The air is dry, pure, clear and calm with no clouds Mean temperature 74° December - Days clear and fine, but fogs at night and early morning. North and west winds prevail, blowing sharply Thermometer 58° to 78°, mean 68°.

Staples and Manufactures.

Rice, the principal food grain of the people, is cultivated and consumed over the whole of Eastern, Western, and Central Bengal and Orissa, and these parts are the prin cipal rice producing tracts. The coarse rice is usually consumed locally, while that grown in winter and spring is exported In Behar and Chota Nagnore also, rice is a main staple of food though alternated with wheat, maize and other cereals Dall (pulses) of various kinds, and fruit and vegetables, of every description, form an invariable part of the food of the people throughout these provinces.

The commercial staples are jute, hemp, oilsceds, ganger, turmeric, cotton, cocoa nuts, date sugar, tobacco, sugar-cane, betel nut, betel leaf, indigo, tea, silk, opium, lac, lacdye, safflower, saltpetre, cinchona and specacuanha. Next to rice, jute forms the staple product of the country The Districts of Bengal which grow it most largely, are Rungnore, Mymensingh, Bogra, Dacca, Pubna, Dinagepore, Hoogly and 24 Pergunnahs, the best quality coming from Rungpore and Mymensingh. Seraganj is one of the principal marts for this staple. The manufacture of date sugar is very extensively carried on in the deltate districts of Jessore, Nudden, Turreedpore and 24 Pergunnahs. Tolacco is Integly grown in Rungpore, Turboot and Purneah for trade and export. Ten is cultivated to a greater or lesser extent in Dacca, Darjeeling, Jahaiguri, Chiltagong and Chota Nagpore. The following statement gaves further particulars in regard to the tea cultivation in Bengal, in 1878.

Indigo is largely cultivated in the districts of Nuddea and Jessore, over the whole of Central Bengri, in Purneals, and westward throughout Behar north of the Ganges, and constitutes the principal industry of these parts. In Behar south of the Ganges, the cultivation is very small, and in the Chittagong, Orissa and Chota Nagpore divisions it is not grown. The cultivation of opium is a Government monopoly and is principally carried on in Behar. Salk is a principal industry over a considerable part of the Rajshahye and Burdsan divisions. Cinchona and Ipecacuanha are produced in the Darjeeling district. All over these prounces the manufacture of beads of sorts and wicker and basket work are very generally spread occupations, and the usual local hand-rafts are carried on, for the supply of local demands. Weaving and the manufacture of cotton thread are the occupation of a large number of the inhabitants of every district.

. The different manufactures which are specially carried on in the several divisions of the Bengal Provinces, and for which each part is most celebrated, are summed up as follows:—

Burdwan Distrion.—Silk, indigo and metal pots and pans Lac, rope and yarn factories. Screw-presses for cotton, jute and fibres. Steam, flour, paper and jute mills. Iron foundries.

Presidency Dnision.—Indugo and date sugar are the staple manufactures in this dnision. The others are cotton-cloth, shell lime and brass utensils. There are also several jute and cotton mults and screw-presses, as well as other factories and foundries.

Rajshahye Drisson.—Silk and indigo are the principal manufactures, the others are silk cloth, brass utensils, gunny bags, gold and silver filagree work and ivory articles.

silk cloth, brass utensils, gunny bags, gold and silver filagree work and ivory articles.

Dacae Dixision.—There is no manufacture on a wholesale scale in this division except tea and indigo; coccanut oil and date-sugar are made and exported to Chittagong

and Calcutta. The other manufactures are brass and iron utensils, lacelye, soap and paper.

Chillegong Division.—The principal industries are carpentry, ship and boat building,

blacksmith's, brazier's, gold and silversmith's work.

Patna Division.—The principal manufactures are indugo, optum, saltpetre, sugar, and sugar candy. The minor manufactures, are towelling and table linen, tobacco,

paper, blankets and brass utensils

Bhagalpur Division.—The principal manufactures of this division are indigo and silk.

cabinet ware, fire arms and hardware, baskets, inlaid and fancy work are the other in dustries

Orissa Division —Salt manufacture is the staple of this division. Brass vessels, brass and silver ornaments and coarse cloths are the chief articles made.

Chola Nagpore Dutsion - Coarse cloth, soapstone vessels, tusser silk, lac and tea are the chief articles manufactured

Of the mineral resources of Bengal, coal only has been largely developed. Iron, however, is at least as abundant as coal in many places and is found in the closest con junction with coal in large tracts where limestone is also plentful. The largest and best coal mines of Bengal are at Rancegunge in the Burdwan District, and in the Chota Nag pore Dission, where there are great stores of coal for future ages. Coal is also found in the Sonthal Parganas, but of a poorer description. Lead, silver and copper are found in Bhagalpur, and stone quarties are worked in the districts of Monghyr and Gyn. Little is known of the mineral resources of Darjeeling. Petroleum and coal are spoken of as existing copper and limestone are known to exist. Iron ore has been discovered in the Salmyé Hills in Thypersh, and coal in the Chitatgong Hill Tracts. Throughout the delta and low lying alluvial tracts comprising the Presidency, Rajshahye and Dacca Divisions, and lawla country of Orissa, there are neither mines nor minetals. In the hilly tracts of the tributary mehals further inland, there are valuable beds of iron ore, particularly in Tallybree, where iron and coal are found side by side. Rich fron ore is also found and worked extensively by natives in the Orissa States of Dhenkanal and Keonlind

Form of Administration.

The Lieutenant-Governor is the chief executive authority in these provinces, which for administrative purposes have been divided into nine divisions, embracing 43 districts. each division being under the superintendence of a Commissioner, and each district under a District Officer, who is the unit of executive administration whether in the Regu lation or Non Regulation districts, and who, in the one case, is styled Magistrate and Collector, and in the other, Deputy Commissioner The District Officer is the executive chief and administrator of the tract of country committed to his charge, and is supreme in the district, except in so far as regards the proceedings of the Courts of Justice. Tach district is again subdivided into talistis or sub divisions, under subordinate magisterial and revenue authorities, styled Sub divisional Officers, who are either Assistants or Magistrates in charge. Subdivisions are again divided into thanas or police circles, where there are also Sub Deputies to strengthen the executive influence of Sub-divisional officers. In revenue matters, the Commissioners of divisions are in their turn subject to the Board of Revenue, in other matters they are directly under the Lieutenant Governor tive authority in Bengal is the council of the Lieutenant Governor, for the purpose of making laws and regulations The Lieutenant Governor is president of this council, and before any law comes into force, it must have received the assent of the Governor General as well as that of the Lieutenant Governor The Marine Administration is under a Master Attendant, and the affairs of the Port of Calcutta, are entrusted to Port Commissioners. The Judicial organization of the whole of these Provinces is entrusted to Judges, subordinate to a High Court, whose functions are exclusively judicial

Calcutta has a special administration of its own, with a separate establishment of Police under control of a Commissioner, also Magistrites of Police for administration of criminal justice. The affairs of the Municipality and Municipal Taxation are managed by a Chairman and Board of Justices, while the Customs and Stamps are under

the superintendence of a Board of Revenue

Census

The Census of Dengal which was effected in 18717° was the first census of the country that had ever been attempted. The computation gave 50 357 141 as the total number of persons under the Bengal Adm is stration far exceeding that of any previous estimate and slowing an average density for the whole of the four provinces of 389 per sons to the square mile. In the United Lingdom the density is 262 in Germany 189 in Iranice 180. Separately the density for Bengal Proper is 481 for Behar 46° for Chota Nagi ore 141 and for Orissa 377 per square in le The total population for the four provinces is classified as follows—Christians Europeans 17 387 Eurasians 21 410 Natives 55 297 Hudding 38 843 179 Mahomedans 19 559 017 Others 1860 851. The sexes are pretty equally divided particularly in Bengal Proper

Notes on the above states

There are no Tributary States in 6 rect relation with the Assam administration. Manipur is a dependent state on the Eastern border and under the a pervision of a Political Agent acting under the direct orders of the Supreme Government . only in boundary matters has the Ch of Commissioner any direct concerft in the politics of Man put. The Mil tary Forces of Man pur are -Art llery 500, Cavalry 400, Infantry 4 400. See Ontlying Independent States'

The Se as and Sedars of the khast Hills hold a sort of semi independent position. The r appointment is subject to the confirmation of the British Government which can remove them in case of oppression or misconduct. The Ahasi full States cover an area of 4 490 square to les. These states keep no Multary Forces nor do they pay any tubute. They are all in subs drary alliance with the British Government.

BRIEF GENERAL DESCRIPTION

Area, Position, Boundaries, &c

The Province of Assam lies on the north east extremity of the Indian Empire, with Butharand Thibet beyond it on the north, and Burmah on the east, and between Latitudes 28° 15 and 24° a North, and Longitudes 89° 45 and 97° 5 East, and has an area of 54.731 square rules. The immediate boundaries of Assam are, on the north, Bhu an and the range of hills inhabited by savage sub Himalayan tribes. On the north cast are the Mislimi Hills which sweep round the head of the Brahmapurar Valley. On the east, are the mountain ranges of the Burmese frontier, and intervening hills inhabited by unsubdued wild tribes, the Palkon range and Manpur Native State. On the south, are the Bengal districts of Mymensingh and Tipperah, with Hill Tipperah Native State On the west, it is bounded by the Bengal districts of Rungpore, and Jalpaiguri, and the Native State of Cooch Behar

The outer boundary on the north of districts Godpara, Kamrup and Darring has been accurately laid down and defined, beyond this the outer line of boundary of districts Nowgong, Lakhunpur, Sibasgar, Naga Hills and Cachar, touching upon the hills of the adjoining wild tribes, is indefinite, another line of boundary, known as the 'Inner line', has therefore been laid down for these districts, with the object of restricting the deal ings of Europeans and other British subjects with the wild frontier tribes no person being allowed to cross this inner line without a pass

Topography, &c

The Province comprises the two valleys of the Brahmaputra (the son of Brahma) and Surma rivers, and the central hill tracts of the Garo Hills, the Khasi and Jaintia Hills, and the Naga Hills, which separate them

Assam Proper, or the valley of the Brahmaputra, is a long alluvial p'ain about 450 miles in length, and of an average width of 50 miles, shut in by mountains on the north, east and south. The river Brahmaputra flows throughout its entire length, and a little above Dhubri bends abruptly to the south, continuing its course to its confluence with the Ganges at Goalundo, the present terminus of the Eastern Bengal Railway Lattle

situated.

is known of the upper course of this river, which has been generally identified with the Sangpo or Narichu Sangpo of Thibet. In Assam the Brahmaputra is navigable by river steamers and large cargo boats as far as Dibrugarh at all seasons of the year, and in the rains by steamers even as far as Sadiya, a hundred miles further up, much beyond this place it is not navigable owing to the ripidity of the current. At Goalpara, the discharge during its lowest ebb amounts to 146 200 cubic feet per second, during the rains it attains a height of from thirty to forty feet above its common level, the discharge then has been computed at four times the above quantity.

The valley of the Surma or Barak river comprises the two districts of Sylhet and Cachar On the north this valley is shut in by the Khais Januta and Naga Hilfs, on the east by the Manipur Hilfs, and on the south by the Lushai and Theperah Hilfs. The west ern and eastern portions of this valley differ considerably in their physical features the nestern portion, comprising the district of Sylhet, is for the most part a large alluvial plain averaging some seventy miles in width, and traversed by numerous streams and water courses which during the rainy season from June to October, flood the country in the exercise portion comprising the district of Cachar, the valley narrows. The Surma river, (unting ultimately with the Megna in Bengal), rising among the mountains to the north of Manipur flows for about 180 miles through a mountainous country, and becomes navigable only in the plants potton of Cachar.

The Central Hill tructs of the Naga Hills the Khast and Janua Hills and the Garo Hills, are a continuation of the mountainous chain which sweeps round the head of the Brahmaputra vailey. Each range has marked physical features of its own. In the Naga Hills the main ridge, named the Barail, with its ranges and spurs, is remarkably precupitous in character and towers to a height of 10 000 feet above the sea level. The peculiur features of the Khasi and Jaintia Hills is the abruptness with which they rise on the southern face, almost perpendicularly from the Surma vailey, attaining rapidly an allitude of over 6 000 feet, the upper plateaux and main central tracts consisting of a succession of undulating downs covered mostly with short grass. The hill station of Shillong the seat of Government is situated about the centre of this tract. The Garo Hills terminate this chain and present very similar characteristics, being steep and pre-

cipitous on the southern face and of rather lower general elevation, the highest part being not more than 4 700 feet above sea level, and below which Tura the capital is

Climate and Sanataria

The climate of Assam is superior to that of Bengal, the day heat being more mo derice, and the nights being always cool and refreshing. The climate of the hill districts in the higher and central plateaux is very salubrious, and the seasons throughout the province are generally favorable for agricultural operations

At Shillong the average maximum temperature is about 62°, the minimum 59°, the great mean being about 61°. The average mean summer temperature in the valleys of the Brahmapura and Surma (or Barak) rivers is 80°, the winter temperature about 57°, the annual mean temperature being about 70°.

The rains are of long continuance, lasting from March to October, and cloudless skies, proverbally characteristic of India, are but little seen in this province. In the Irahmaputra valley, the morning fog which invariably prevails in the cold season, is a special characteristic, it rises about day light and often lasts as long as eleven in the fore noon. The annual rainfall at Chertapoonjee and along the southern face of the Khasi

and Guro Hills, reaches 600 to 620 inches, incessant rain pouring sometimes for eight and ten days at a stretch

The prevalent winds throughout the year in both valle's blow from the north east. At the commencement of the rains a westerly und occasionally sets in, but tarely lasts for my, length of time. In Cachar the north-cast wind, which blows up to mid-day, usually changes to a south west wind in the afternoon. During the months of March, April and May violent winds from the north west are of frequent occurrence through out the Province.

At Cherrapoonjee in spite of the notorious heavy rainfall the climate is by no means unhealthy. Earthquakes are very common both in the plains and hill districts, but the shocks are seldom severe. They occur chiefly in November, December and Jinuary. Shillong, in the khasi Hills, is the santarium of the Assam Province.

Staples and Manufactures

Rice is the principal food grain throughout the prosince. Next to nee the most im portin crop is the mustard, the other staples grown are pulses of various kinds, indian corn linseed hemp' jute, betel leaf (pan), betel nut sugar cane cotton, and tobacco. Indigenous arrowroot, and tapioca have also been found in Silhet. The principal products of the hill districts are, potatoes oranges pine-apples, bay leaves, cinnamon, black-pepper betel nut and leaves honey, way, cotton silk, and caoutchouc, the three former articles being largely exported.

The most important commercial staple is Ter which is largely cultivated in all the plain districts with the exception of Goalpara. The total outturn of manufactured ter from linds under tea cultivation at the present time, has been estimated at about 20 000 000 Bb. and the quantity exported is tripidly increasing. The foundation of this industry was laid between 1856 and 1850. Coffee is indigenous and is also cultivated.

Assum is rich in mineral produce. Iron limestone and coal abound in all the hilly tress. Petroleum springs have also been discovered, and gold has been found in many of the streams.

The common manufrictures of the province are silk thread silk fabrics, coarse cloth, brass usensils, nory ornaments and ordinary agricultural implements. Sylhet is noted for its nory mats and fans and shell bracelets. There is no lack of materials but skilled labor and industrial energy are both deficient.

In connection with Assam the annual faws, held both on political and commercial grounds claim some mention here and are briefly described

1 The Udalguri fair, held in the Mangaldai sub division of district Darring, about to rules from the foot of the hills

This fur takes place commonly in February or March of each year, and lasts about two months. The articles brought down from the hills are—Ponies sheep, dogs, salt, gold, blinkets, yaks tails must, childre, spices, way, honey, madder, oranges and

2 The Kerkarra Fur, held in February and March, and established by the Raya of Kerkarra in Bhutan, at a place on the Sakmi ruce, just beyond the border of the Darrang distinct, and about 15 miles north west of Udalgura.

walnuts

3. The Daimara Fair, held about the month of February, at a place three miles beyond the British frontier, and distant about 25 miles in a straight line north-east of Udviguri

4 The Sadiya Fair, held at Sadiya in January and February of each year. The imports at this fur are —Rubber, wax, must, cloths, mats, dhoes and tony. The exponsion are English and Assamese cloths, salt, brass ware, bell metal utensits, silver earnings, beads, brass wire and opium. Sadiya promises to become ultimately a place of considerable importance, as it must be the starting point of the as yet unknown route between Assam and China.

The neighbouring hill tribes resoit in considerable number to these fairs, and a large amount of trade is effected

At Silchar too a fair is held in the months of December and January, which is largely attended by pony and cattle dealers from Manipur

Form of Administration

The administration of the Province is carried on under the Non Regulation system, and is entristed to a Chief Commissioner, acting immediately under the orders of the Supreme Government. The constitution of the Chief Commissionership was effected under a proclamation dated the 7th Pebruary 1874, the district of Sylhet being added to the Province from Bengal, by a proclamation dated the 12th September 1874. The Chief Commissioner has ordinarily the powers of a local Government, and exercises complete control over all departments and branches of the administration. The immediate and responsible representative of the authority of Government in each district is the Deputy Commissioner, who is assisted by Assistant and Extra Assistant Commissioners, to whom is allotted such patts of his duties as they are empowered to perform. In the Naga Hills district the Chief Executive Officer is called "Political Officer' in charge of the Naga Hills

Recently a Commissioner has been appointed for the eight valley districts of this province, who is also a sessions Judge, and the channel of communication between the District Officers and the Chief Commissioner, and to whom the Deputy Commissioners of the valley districts are in certain matters subordinate.

Census

The last Census of 1872 showed a total population of 4,129,972, but it was not fully taken in the Naga Hills and in the outlying parts of Lakhinpur, while no census was even attempted in the Garo Hills, the figures given being merely estimated

Excluding Sylhet and Cachar, the average number of persons per square mile for the remander of the entire province is 63. In calculating the Christian population, the Native Christians in the Khasi and Jaintia Hills have not been taken into recount

Considering its small population, Assam presents greater varieties of race than any other province. The sexes are pretty equally divided

The tribes bordening on the Province are the following

BRIEF GENERAL DESCRIPTION.

Area, Position, Boundaries, &c.

The Central Provinces occupy a vast tract of country in the centre of the Peninsula of India; they lie between the 18th and 25th degrees of North Latitude and 76th and 86th degrees of East Lontitude, and stretch from Bundelkhand in the north, to the Madras Presidency in the south, and from the frontier of Bengal in the east, to independent Malwa and to the Deccan in the west. The extreme breadth from north to south is about 500 miles, and length from east to west about 600 miles The area of the whole tract so named is 113,013 square miles, of which \$4,208 square miles are British territory. and the remainder, 28,835 square miles, the territory of Feudatory Native Chiefs They are bounded on the north by the independent native state of Rewah and states of Bun delkhand of the Central India Agency; on the west and north-west by the British district of Lalitpur of the North-Western Provinces, by Bhopal and Indore native states of the Central India Agency, the British district of Khandesh in the Bombay Presidency and by Berar, or the Hyderabad Assigned Districts, on the south and south-east by the Nizam's dominions, the Jeypur native state and the Ganjam district of the Madras Presidency; on the east and north east by the tributary states of Orissa and the Garhiat states of Chota Nagpore in the Bengal jurisdiction. The Central Provinces are therefore enclosed on nearly every side by foreign territory, and are thus cut off geographically from other nurely British provinces

Topography, &c.

Geographically the Provinces are divided into two parts by the Satpura range of mountains that runs south of the Nerbudda river from east to west. This range embraces within itself considerable tracts of table land. Commencing at the lofty plateau of Amarkantak, the range extends westwards as far as the western coast. From Amarhantak an outer ridge runs south-west for about 100 miles to a part known as the Salitekri Hills, thus forming as it were the head of the range, which, narrowing as it proceeds westwards, changes from a broad table land to two parallel ridges bounding on either side the valley of the Tapti, ending so far as these provinces are concerned, at the famous hill fortress of Asirgath. Beyond this point the Rajpipla Hills, which separate the valley of the Nerbudd's from that of the Tapts, complete the chain as far as the Western Ghats. The mean elevation of the range is about 2,500 feet, but many of the peaks and some of the plateaux have an elevation of more than 3,500 feet above the sea. The plateaux of Amarkantak and Chauradadar in the Mandla district rise to a height of nearly 3,500 feet; the height of the hill of Khamla in the Betul district is 3,700 feet, and the general height of the Chikalda hills overlooking the Berat plain, is 3,700 feet, while the Pachmarhi bills, east of Betul, rise abruptly from the Nerbudda valley and culminate at Dhupgarh, at an elevation of 4,500 feet. East of Asirgarh there is a break in the range through which the railway from Bombay to Allahabad passes, as well as the road to Central India, and at which the elevation is not more than 1,240 feet above the sea. West of Asirgarh the range is continued to the Western Ghats by a belt of mountainous country 40 to 50 miles in breadth with an average height of about 2,000 feet above the sea, some peaks however rising up to 3,000 and 4,000 feet. The whole length of the Satpura range is scarcely less than 600 miles, while its breadth at the head across Balaghat and Mandla is about 100 miles. On the table lands of this range, east of Asugarh, he the districts of Betul, Chhindwara, Seons, Balaghat and Mandla.

North of the Satpura range, offshoots of low hills stretch northwards and approach the Khaimur Hills, which with the Bhanrer Hills (both branches of the Vindhyan range). form the eastern scarp of the plateau on which he the districts of Damoh and Saugor. these ranges attain a height of 2,500 feet

Eastwards from Amarkantak to within a few miles of the eastern coast of the Penin sula of India, stretch a succession of ranges of hills, offshoots of the Vindhyan chain, separating the plain of Sambalpur from Chota Nagpore

To the south the provinces are shut in by the wide mountainous tract of Bastar, stretching from the Bay of Bengal to the Godavan river, and extending from the west of that river up to the rocky ridges and plateau of Khandesh, and enclosing the plain of Berar along its southern border

The plain country of the province may be said to lie in two great divisions to the north and south of the great central range of mountains. North of the Satpuras we have the rich valley of the Nerbudda, extending from the Jubbulpore to the Hoshangabad and Nimar districts, a distance of nearly 350 miles, the elevation of this valley falls from 1,400 feet at Jubbulpore to 1,120 feet at Hoshangabad. In breadth it is about 30 miles This great plain is most fertile and is cultivated with wheat, cotton and sugar cane. South of the Satpuras and the ranges that run eastwards, we have the plain of Sambalpur with all its Native states and Zamindaris extending over an area of some 23,000 square miles, and which may be considered the central basin of the Mahanadi Separated from Sambalpur by ranges running southward from the great central chain, hes the plain of Chhattisgarh, having a mean elevation of 1,000 feet and an area of about 22,000 square miles, and forming the upper basin of the Mahanadi. Further to the west, and again divided off by hills, is the great plain of Nagpur, extending over some 21,000 square miles The general surface of this last plain inclines towards the south, from 1,000 feet above the sea at Nagpur, to 750 feet at Chanda, the eastern portion being drained by the Wain ganga, the western by the Wardha

The principal rivers which with their tributaries drain this wide region are the Nerbud da, which, rising in the high table land of Amarkantak, and pursuing a direct westerly course for 500 miles to the Gulf of Cambay, receives the whole drainage of the northern slopes of the Satpuras, this river is almost everywhere fordable in the hot season, the Mahanadi, rising in the wild mountains of Bastar that close in the Chhattisgarh plain to the south, the Wainganga rising in the Seoni plateau, and draining the southern slopes of the Satpuras west of Mandia, and also the greater part of the Nagpur plain, the length of this river from its source to its junction with the Wurdha is about 350 miles, the Wardha rising in the Satpuras between Nagpur and Betul, and separating the districts of Nagpur, Wardha, and Chanda from Berar and the Nizam's dominious These four great rivers are navigable for long distances during the rains, and they flow in deep beds many feet helow the level of the countries which they drun

Generally, the Central Provinces may be said to be a mountainous country, in which hill and plain, plateau and valley alternate with each other. The slopes on both sides of the great central ranges are covered with dense forest, but in the other parts of the provinces the absence of this forms a characteristic feature of the scenery

Several lines of railway run through the Central Provinces The Great Indian Peninsula Railway, mun line, enters the territory at Burhampur, in the district of Nimur, terminating at Jubbulpore, where it connects with the "Jubbulpore Extension of the East Indian Railway, which enters the provinces at Undarra station, the Nagpur branch of the Great Indian Peninsula line brunches off from it at Bhosawal, and after traversing Berar, reaches Nagpur, after throwing off a branch line at Wardha station to Warora, cat Hingan ghat, a length of 45 miles, called the "Wardha Valley State Railway The Holkar State Railway to Mhow and Indore, branches off from Khandwa station of the Great Indian Peninsula line, while a small branch from the Gadarwara station of the same line connects the town of Mopani The extension from Nagpur to Kaliani, a distance of 125 miles, called the "Nagpur and Chhattisgarh State Railway" is now under construction and progressing rapidly

Climate and Sanataria

A hilly country, such as has been described lying within the tropics and at a con sider able distance from the sea, would naturally have a hot and dry climate. The tempera ture is to some extent, however, modified by the general elevation of the country. The south west monsoon, which prevails from the end of June to the beginning of Septem ber, usually brings with it an abundant rainfall, and the wide tracts of forest that cover a part of the area of the provinces, retard evaporation. But notwithstanding these mode fying influences, the marked characteristics of the climate for nine months of the year. are a high temperature and a low degree of humidity. The districts above the Satpuras have a temperature more nearly approaching that of the North Western Provinces, while the Satoura plateau districts, pave, from their superior elevation, a somewhat cooler climate. The hot season begins in April and lasts to the middle of June, the wet sea son then sets in and continues till the middle of October, while the cold season lasts from the middle of October to March inclusive. During the hot weather the heat at noon averages 100° Far In the cold scason the mean temperature is 40° The mean annual rainfall of the Central Provinces is 45 inches, of which 41 inches fall during the monsoon or net seasoo, from June to October The arrival of the monsoon occurs with great uni formity over the whole country, usually about the middle of June. The north easterly and easterly winds set in in October and continue steadily in this direction through November and part of December, when they slacken but continue blowing until the begin ning of February in l'ebruary and March, the wind is variable but southerly winds are most frequent, the north west wind continues from April till June, when, the monsoon setting in, the general direction is west and south west Pachmarhi, situated in the Hoshangabad district, is the Sanitarium of the Central Provinces

Staples and Manufactures

The ordinary natural productions are cotton of the finest quality, rice, wheat, maize, millet, oil seeds, opium, sugar cane, safflower and indigo. The cotton country of the Central Provinces lies on the left bank of the Wardha river, on which bank the well known cotton mart of Hinganghat is situated. Lac abounds in the forests, which swarm with wild animals of the kinds found elsewhere in India. The mineral resources include iron ore, coal, marble and building stone, gold and diamonds. The forests contain valuable timber trees and plants yielding drugs, resuns, guins, and dyes

There are no manufactures peculiar to the Central Provinces except perhaps the tis sue work of Burhanpur, and the richly embroidered wearing apparel manufactured in parts of Nagpur and Bhandari. The ordinary manufactures are weaking iron sincling and shaping the same into agricultural implements

Form of Administration

The administration of the Central Provinces is carried on under the non regulation system, by a Chief Commissioner in direct subordination to the Government of India, the Government resolution constituting the Chief Commissionership being dated and November 1861. The Chief Commissioner has ordinarily the powers of a local Government, and exercises complete control over all departments and branches of the administration, the courts, Civil and Criminal, being separately controlled by a Chief Judge under the name of Judicial Commissioner. For administrative purposes the Central Provinces are divided into four divisions, each controlled by a Commissioner, and subordinate to Commissioners are 19 Deputy Commissioners, each holding executive charge of a district. In every district there are two or more subdivisions, the direct management of each being entrusted to a native Sub-collector called a Tabisidar. There are so such subdivisions in the 10 districts of the Central Provinces.

A general consus of the population of the Central Provinces was taken on the 25th having 1872. This was the second regular consus, the first having been taken in No-benber 1866. The total area being 217 o43 square miles, and including the Feudatory per square mile 18 905. If, however, the Khalsa or British Territory be separated from the Feudatory states, the figures are—

Census

Area. Population Density

hindsa \$4,208 square miles 9 \(\frac{1}{2}, \frac{2}{3} \)

Teudatory States 28 \(\frac{2}{3} \), \(\frac{1}{n} \) rec2,\(\frac{2}{3} \)

The entire population in r866 was 9,104,871 souls. The recent census gives an

The entire population in 1866 was 9,104,511 soils. The recent census gives an increase of 1,198,559 or of 2 04 per cent in five years. The sexes are nearly equily divided.

The census of 1872 was in every respect more detailed and complete than the enumeration of 1866, and is sufficiently accurate for all statistical purposes The population of these provinces is classified as follows—10,487 Christians, 210,965 Mahomedans, 6,518,137 Hindus, 36,651 Parsis, Buddhists and Jains, 2,444,994 Aborigines, and others

BRIEF GENERAL DESCRIPTION

Area, Position, Boundaries, &c

The Province of British Burmah extends along the eastern shore of the Bry of Bengal, and lies between the parallels of 22°0 and 10°0. North, and longitudes 92°100 and 99°30 East, the extreme length of this stretch of country being about 1,000 miles, and the lotal area 87,456 square miles, of which about 4,000 only are cultivated. It is bounded on the south and west by the Bay of Bengal, and a put of the Cluttgong district of Bengal, and on the north and east by the independent kingdoms of Burmah and Siam.

The province is composed of the tracts of Arakan, Tenasserim and Pegu Arakan and Lenasserim were ceded to the British Government after the first Burmese war of 1825 26, while Pegu wis not anneved to the British dominions until after the second Burmese wir of 1852

The portion known as the Kareng Hill Tracts, is a division of the Toungingoo district, it was formed in 1876, and lies to the castward of the Sittioung river

Topography, &c,

The British Burmali Proximes is geographically divided into four portions, viz—

Arman, stetching from the Nari estuany, (which separates the province from Chittagong),
to Cape Negras—The Valleys of the Irrainad by and Sittomy riters, separated from
Arakan on the west, by the Arakan Yoma range of hills, and from each other by the Fegu
Yoma range, of The Valley of the Schweim and * Transtrum, which last is a narrow strip
like Arakan reaching down to the Pakchan stream, and separated from Stam by a lofty
chain of hills running north and south, nearly parallel to the coast, and about thirty or
forty miles inland, but approaching nearer to the sex at its southern extremity. A large
portion of British Burmali consists of mountainous tracts, almost wholly uninhabited, and
of impenetrable rungle

The Arakan portion, from the Naaf estuary to cape Negrais, is bounded on the north and east, by the high chain of mountains extending in a southerly direction from the south-eastern extremities of Sylhet and Cachar, and gradually diminishing till it ends fifteen or stateen miles south-east of the rocky promontory of cape Negrais at Pagoda point. This chun, though of considerable hight to the north, diminishes in altitude as it reaches Arakan, none of the passes across it, in that portion of its length, being more than 4,000 feet above the sea, the Ayeng pass into the valley of the Irrawaddy is much less. I rom the Narfestuary to Kyouk phyoo harbour, the cost is 1 hybrinth of creeks and tidal nullahs, and from this point to cape Negrais, it is rugged and rocky, offering five harbours for ships. This cost is studded with fertile islands, the largest of which are Cheduba, Shahpuri and Ramree.

Owing to the nearness to the coast of the range which bounds Arakan, there are no large rivers, the principal ones are, the Nead estuary about thirty miles in length and three miles broad at its mouth, shallowing considerably towards the head, the New river, an arm of the sea extending more than fifty miles inland, and from three to four miles broad at its mouth, the Neladyne or Arakan river rising in the Lushai Hills, and havingable for forty miles by essels of three to four hundred tons burden, and on the right bank of which, close to its mouth, is situated the town of Akyab, the head quarters of the district of that name and of the Arakan Division. The approach to Akyab is dan gerous and difficult, the channel being narrow, and with only 3½ fithoms of water over the bir at low water. The other rivers are the Talda's, the Ajerg, the Sandoray, the

Tour, m_{eq} and the Gas, the last named being 1 good haven for stemmers or vessels of from nine to ten feet drught. The soil throughout Arakan is alluvial, mixed in places with sand, the islands are of volcanic formation, and though rock, are fettled

The Valleys of the Irrawalds, Sittowng and Salween rivers are British territory only in their lower portions, the two first named unite and form an extensive plain stretching from cape Negrais on the west, to Martaban on the east. The water shed between these two streams is the Pegu Yoma range, terminating in low hills at Rangoon. The Poung loung range, rising to a height of 7,000 feet, bounds these valleys on the east ern boundary line separating the British possessions from the territory of the King of Burmah, leaves the Arakan hills at a point called the "ever visible peak," and running due east, passes the river Irrawaddy at its 50th mile, and the Pegu Young range, forty three miles further on, thence, after thirty-three miles, it crosses the Sittoung river, finally losing itself in a desert of mountains thatteen or fourteen miles further east. The plains portion of these two valleys is highly cultivated and the richest part of the whole province, Owing to the spurs thrown out by the Pegu Yoma range, the main valleys are divided into several smaller ones. A strip of country in the Sittoung valley on the west, about twenty five or thirty miles broad, is covered with dense jungle, which stretches down as far south as Shwegreng The coast line from cape Negrais to the gulf of Martaban is low and flat

The main rivers in this portion of the Province are the Irrawaddy, flowing from the frontier line for 240 miles to the sea, and the Sittoung, rising far north of British territory, which it enters just above Toungagoo As the Irrawaddy nears the coast it divides, con verting the lower portion of its villey into a net work of tidal creeks, its first branch, being sent off to the westward a little above Henzadah, flows past Bassein and enters the Bay of Bengal by two main mouths. This branch is navigable by large ships for eighty miles, or as far as to Bassein, a port of some importance. After passing Henzada another branch flows off to the eastward, joining the Hleing river just above Rangoon river then divides and sub-divides till it empties itself into the sea by no less than ten mouths. The waters of the Irrawaddy commence to rise in March and continue to rise till September. (flooding the surrounding lowlands), when they begin to fall. The Irra waddy is navigable for river steamers as far as to Bhamo, 600 miles beyond the British frontier The velocity of its waters, when the river is full, is five miles an hour The Sittoung is parrow up to Shwegyeng, below this place it widens, at first gradually then very rapidly, and at last flows into the gulf of Martaban. A bore, with a curling crest nine feet high, sweeps up the Sittoting river, its effects being felt at Shwegyeng other mers are the Hleing, rising close to Prome, and navigable for vessels of the largest size to some little distance above Rangoon, the Pegu and the Poozoondoung rivers, rising in the Yomr range, about fifty-eight miles above the town of Pegu, the Beeling, rising to the Poungloung hills, and entering the gulf between the Salween and the Sittoung, the Salucen, at the mouth of which stands the town of Maulmain, the Atlaran rising in the chain of hills that form the boundary between the kingdom of Siam and British Burmah , and the Gine which is navigable for about one hundred and eighty miles for small boats The Salween, though a large river is not navigable owing to its rapids.

The Yoma ranges are composed mainly of brown or grey slate clay, alternating with beds of sand-stone, assuming at times a basaltic character

The southern portion of this Province called Zimazierum, which includes the Moscos and the Mergui Archipelage, her long the coars between 17 and 10 north latitude, and 15 hounded on the east, from thirty to forty mike inland, by a chuin of hills in some

places 5 000 feet in height. The breadth of this chain at Martabin has never been ascertained, but near Tavoy it appears to be about forty miles wide, whence it gradually narrows to ten miles near Mergiu. The coast hine is very irregular and low for some miles inland, beyond which the surface of the country is mountainous, thinly populated and much intersected by streams. The chief inters are the Tavoy and Tenasserim. The Tenasserim, named after the town, rises in about 15° north latitude and flow through a valley scarcely broader than its bed, it is navigable for about 100 miles. The mouth of the Tavoy interactions excellent anchorage for ships and vessels can unchanging the results of the portion of Tenasserim is alluvial. Stratified sand stone is the prevailing rock interspersed with tens of quarta, in which crystals of great beauty are sometimes discovered. The chief formation of the small hills is laterite.

The communications throughout the prosince are mainly by water. A State Railway, 163 miles in length, runs from Rangoon to Prome, called the 'Rangoon and Irrawaddy Vâlley line, and steamers ply on the Irrawaddy between Thayetmyo, Prome, Mya noung Henzada and Rangoon. There is steam communication from Calcutta vii Chit tygong and Akyab to the southern statioos of Arakan and to Rangoon and Maulmain, also south to Tavoy and Mergur. A navigable canal connects the Pegu and Sittoing rivers, and a complete project for the 'Rangoon and Sittoing Valley' State Railway, to attract the whole of the trade with Karengnee and the Shim states has been submitted for sanction. The whole of the Salween Hill Tracts is a wilderness of mountains and it is through these hills that Shan Caravans come down annually to Rangoon and Maulmain, and except the routes used by them there are no roads over which Idden animals can pass.

There are four large lakes or more properly lagoons which deserve mention, is, the Moo lake in the Henzada district two and a half miles across, the Lahgyin, the Kandangyee, or "Royal Lake" near Rangoon, and the clear water lake in the Bassein district

Climate and Sanataria

The climate of Burmah, though most and depressing for a part of the year, is cooler than India. In some of the forest tracts, danog the monsoons, it is deadly, but on the corst and on the frontier, it is by no means unhealthy, and is much better adapted to the European constitution than any part of India. The registration returns show, that the deaths of children under five years of age, are in the proportion of 7785 of the total death rites the percentage of children under 12 years of age being 358 of the whole population. In its plavial chiracter this province is most characteristic and remarkable. The rainfall varies considerably, from 78 inches at Sandoway to 50 inches at Thayet myo, the wet season lasting from May to October, during which time the rains are almost constain. November, D cember, Jinuary and February are the cold months, while the hot weather lasts from February till the runs comm nee again. The average temperature is greatly affected by the sea breeze. The thermometer ranges from 65° in winter to 90° its summer.

There are no sunataria in Burnah, many proposals have been made to found them on the high mountain ranges but, however pleasant they would be in summer, "they would have to be abandoned in the rains for oot even natives could remain to take care of the buildings, so incredibly rapid and luxunous is the vegetition that the very next jear a forest would have to be cleared way to find the fourses area.

Staples and Manufactures.

The industry of British Burmah is almost exclusively devoted to agriculture. About 86 per cent, of the whole area of the province is devoted to rice, and only about 3 per cent. of the acreage to cotton, tobacco, sugar-cane, pepper, indigo and other produce, the cold weather crops of India being almost unknown here. The whole province is well adapted for a much more systematic and extensive production of many staples than the Burmese will ever take into consideration. Tobacco growing in northern Araban is attracting notice. According to native calculations the average production of tobacco in Arakan is 370lbs, an acre, but experience has shown that the yield of properly cultivated ground would be Soolbs an acre. The tobacco producing soil is so rich that no rotation of crops is necessary, and beyond a little weeding, the plantations require only occasional manual labor. The crop is sown in November and reaped in April. The largest tobacco growing district in Burmah is Thayetmyo Experiments have also been made in ter and coffee planting, but with little result, for although in many parts of the province the soil and climate are no doubt favorable, the difficulty of procuring the labor that would be required for these commercial staples has hitherto proved insuperable. Tea of very good quality grown in Arakan, is said to be worth about as a lb in the London market. The principal manufacturing industries are rice cleaning, timber sawing, silk and cotton weaving, boat building, and the manufacture of salt and graphe, a Other manufactures are comparatively insignificant, though in preparation of fish some respects interesting, and in many instances by no means devoid of artistic ment. Cutch, used for dveing purposes, is almost the only article manufactured for export. At Rangoon, Maulmain, Akyab and Bassein, there are numerous steam rice mills and saw mills for cleaning rice and sawing timber for export

The metalliferous minerals of the province are confined principally to the Mergui and Tavoy districts of the Tenasserim Division, where lead, iron, copper and antimotivare met with, as well as gold dust in the Shreggrein river Petroleum is met with to some extent in the Akyab and Kyouk phyoo districts, and immestone in Kyouk phyoo, Bassein, Amherst and Thayeting districts. Coal of inferior quality is found up the Tenasserim river in Mergui, and in the Thayetingo district.

No emigration takes place from British Burmah, but there is considerable immigration. Shans from the Burmese and Chinese Shan states, and other laborers from Upper Burmah, come down in large numbers, by whole villages at a time, during the hariest season, after which they return, some few settling permanently. Laborers also come over in considerable numbers from Madras, Chitagong and Alyab to the southern part during the rice shipping season, but few remain after it is over

Form of Administration

The three divisions comprising the province of British Burmah, 112, Arikan, Pegu and Tensserim, from the time of their coming under British rule up to January 1852, were governed separately by their respective commissioners, under the control of the Supreme Government in the case of Pegu and Tenasserim, and under that of the Lieu tenant-Governor of Bengal in the case of Arakan. In January 1862, however these three divisions were amalgamated and formed into a Chief Commissionership (under Major General Sir Arthur Phayre) in direct subordination to the Government of India, the Chief Commissioner having the powers of a local Government, and exercising, as in the Central Provinces, complete control over all departments and branches of the adminis

tration, the courts being controlled by a Chief Judge named the Judicial Commissioner, appointed in January 1872

For administrative purposes this province is divided into three divisions, each controll ed by a Commissioner subordinate to the Chief, subordinate to the Commissioners are sisteen Deputy Commissioners, each holding executive and judicial charge of a district, under whom are numerqus other officials, both executive and judicial, in charge of the one hundred and fourteen sub-divisions into which the several districts have been divided. There are 18 sub-divisions in the four districts of the Arakan Division, 55 in the six districts of the Pega Division, and 4x in the six districts of the Tenasserim Division.

Census

A census was taken of the province of British Burmal on the 15th August 1872, and by it the population was computed to be 2,747,148 souls, or males 1,455,518 females 1,311,636, the former exceeding the latter by 123 888, this disproportion being due to the fact that most of the Hindoo males are alsens, who are only temporary residents and have not their families with them. According to a census taken for revenue purposes in 1876, the total population of British Burmali was computed to be, 2,942,665 souls. In the Administration Report for 1877 78, the population is given as 3 011,614, as shown in statement given at page to

BRIEF GENERAL DESCRIPTION.

Berar, Eastern and Western, known as the Hyderabad Assigned Districts, forms the northernmost portion of the Hyderabad native state This tract was assigned to the British Government, under the treaties of 1853 and 1861, in pledge for debts incurred by a former Nizam during the early struggles for the sovereignty of the Deccan on the dissolution of the Mogal empire, and for the maintenance of the military force termed the Hyderabad or the Nizam's Contingent, raised in lieu of the troops which the Nizam had been previously bound to furnish on demand in time of war. This assigned portion is situated between longitudes 76° o and 79° 15 East, and latitudes 10° 30' and 21° 45' North, and is about 150 miles in length from north west to south east, and about 144 miles in breadth from north to south, with an area of 17,711 square miles, and a population of 2 227,654 souls, giving an average of 126 persons per square mile for the whole tract. Berar is bounded on the north and east by the districts of Nimar, Betul, Nagpur and Wardha of the Central Provinces, and on the south and west by the remainder of the Nizams Dominions known as Hyderabad, and the district of Khandesh of the Bom bay Presidency Although entirely under British administration, the nominal sovereignty of the country is still retained by the Nizam

The Ajanta range of hills intersects the whole province from west to east, and its Milghat or India with the India and its African and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and India and I

The principal rivers of Berar are the Tupit for a short section of its course, the Wardha skirting its eastern boundary, the Penganga skirting very nearly the whole of its southern boundary, and the Purna There is but one lake in the whole province, the remarkable salt water lake of Lonar, situated on the most southerly plateau of the Buldarn district. This lake presents the appearance of an enormous crater of an extinct volcano, and deserves mention as being one of the most prominent, curious and interesting physical features of Berar

The population of this province is dense, its rainfall regular and copious, and its arranged almost entirely cultivated, the whole of the plain surface being covered over at harvest time by a sheet of forops. It possesses one of the richest and most extensive cotton fields in India, and several cotton marts of the very first calibre, and in respect to natural and material advantages is surpasses any tract in the Central Provinces. A group of beds of thick coal of fair quality has lately been found in the Win district, and tron ore is very plentiful throughout large tracts on the eastern side, especially in the hills about Karinja, and among the low ranges close to Amractio in the north east

The Resident at the court of Hyderabad stands in the position of Chief Commissioner of Berar, and is the head of the local administration, directly subordinate to the

Government of India. For administrative purposes, Berar is divided into two divisions, each controlled by a Commissioner Subordinate to Commissioners are six Deputy Commissioners, each holding executive charge of a district, under whom are fifteen Assist ant Commissioners, and eight Extra Assistant Commissioners, in executive charge of the twenty two Sub-Divisions of the six districts, the average area of each Sub-Division being

The last census of Berar was taken in November 1867 the proportion of malesto females is equal, and Mahomedans constitute only seven per cent. of the whole population which is classified as follows —Ch istians 841, Hindus 1,883 242, Mahomedans 168,283, Parsis, Buddhists and Jains 6,604, Aborigines 168,684 Total for the whole Province 2,227,654

Hyderabad (The Nizams Territory) or The Deccan

The Nizam's Dominions called also Hyderabad Native State, from the name of its capital, is the same as the Subhat of the Deccan of Mogal times, and forms by far the largest and most important of the protected native states of India. This territory occupies the central portion of the table land of the Deccan a term which in its limited sense implies the tract of country in Southern India situated between the Nerbudda and Listing rivers, and supported by the Eastern and Western Ghats Hyderabad is situated between latitudes 15° 10 and 21° 45 North, and longitudes 74° 40 and 81° 32 East. It is about 475 miles in length from south west to north-east and about the same distance in breadth The area is estimated at nearly 98 000 square miles, with a population of about 11 millions, giving an average of 112 souls to the square mile. The territory is bounded on the north and east by Berar and the Central Provinces, on the south by the territory subject to the Presidency of Madras, and on the west by the territory subject to the Presidency of Bombys, and is traversed and skirted by the river Godavari with its tributories the Purna and Manjira, by the Pranhita with its tributanes the Wardha and Penganga, and by the Kistna with its tributaries the Bhima and Tungabhadra, all flowing from the Western Ghats eastwards into the Bay of Bengal The whole territory is an elevated table land in some parts rising to upwards of 2 500 feet above sea level and is to a large extent covered with low brushwood and uncultivated, but where irrigated and cultivated the soil is fertile and produces large crops of cotton, wheat, the pulses, rice, and oil seeds, and date and palm trees are common everywhere

The capital of the state stands on the southern or right bank of the river Musi, which flows between it and the Residency, and is fordable except when swollen by the It is about a mile distant from the Residency, and five miles by the road from the cantonment of Secundrabad The population of the city and suburbs has been estima ted at about 400 000

The revenue of this state is about £ 4 000 000 per annum and the Nizam's forces number 720 guns and about 30 000 men of whom upwards of 6 000 are Arabs and there are altogether about 10 000 foreign mercenanes besides in his territory. The only feudatory of the Nizam is the Raja of Gudwal who is not interfered with so long as he pays Rs r,r5 000 a year into the Nizam's treasury

The climate of Hyderabad is on the whole pleasant and healthy during a greater part of the year, the temperature is moderate and is described as a delightful medium between the extremes of heat and cold experienced in the northern parts of India In the cold season the thermometer stands at 7.1° rising to gr m the hot months of which April and May are the most trying The average rainfull is very small, not exceeding 32 inches for the whole country

The Railway from Madras to Bombiy runs through a portion of this state, a branch called the Nizam's State Railway, 121 miles in length, striking off from Wadi station, to Hydershad the capital, while the Great Indian Peninsula Railway from Bombay to Nagpur, traverses the whole length of Berar, from west to east

The Government of the native state of Hyderabad, or the Nizam's Dominions, is modelled after that of Madras Each district or Sucar has its first, second, and third Talukdar, corresponding to Collector, Sub Collector and Assistant Collector Three districts united, form a division under a Suddar Talukdar of Head Collector rural chiefs who are distributed throughout the interior of the country under the names of Deshmukhs, Despandias, Zamindars and Mannewars, are associated in divers forms and degrees with the Revenue and Police administrations of their native districts

BRIEF GENERAL DESCRIPTION

Area, Position, Boundaries, &c

Rapputana, so denominated from its prevailing population, the Rapputs, is a great territorial circle including the British district of Ajmere Merwara and nineteen states, each having its own autonomy and separate chief This territory lies between the paral lels of 23° and 30° North Latitude, and 69° 30 and 78° 15 East Longitude The total area is approximately estimated at 129 ogr, square miles On the west Rajputana is bounded by the province of Sind in the Bombay Presidency, and on the north west by the native state of Bahawalpur under the Punjab Government, thence all its northern and eastern frontier marches with the Punjab and the North Western Provinces, on the south east it is bounded by the territories of Sindhia, Holkar and other native states of the Central India Agency, and on the south west its frontier marches with the Gujarat native states of the Bombay Presidency Within this area, the states of Jeysulmere, Jodh pore or Marwar and Bickaneer lie in the west and north . Ulwur and the Shekhawati tract of Jeypore in the north east, Jeypore, Bhurtpore Dholpur, Kerowlee, Boondee, Kotah and Jhallawar are the eastern and south eastern states, Sirohee lies in the south west, while Partabgarh Barswara Dungarpur, and Oodeypore or Meywar lie in the south the centre lie the British district of Aimere-Merwara, the states of Lishengarh and Shah pura and parts of Tonk.

Topography

Rapputana is divided into two main divisions by the Aravalli range of hills which runs through it in a direction nearly north-east and south west, about three-fifths of the territory lying north west of this line and two fifths on the south east. In order to make a general description of this great region intelligible, these divisions will be dealt with separately

The North West Division comprises the whole vast tract stretching from Sind on the west, and along the southern Punjab frontier, to near Delhi on the north-cast. The character of this tract which radiates with a constant though very slight slope towards the Rann of Cutch and the Indus, is throughout uniformly sandy, unproductive and ill watered, though improving gradually from a mere desert in the west and north west, to comparatively habitable and fertile lands towards the north east and north Immediately beyond the mountain's skirt, the soil alters from hard rock to sand mixed with very little loam, and the country, as far as the beginning of the desert proper, or up to the Loni river, consists of a succession of gentle swells clothed with rather thick low jungle, fairly peopled and to some extent cultivated Beyond the Loni river, and from the edges of the Rann of Cutch, stretches north eastward through the states of Mallani, Jeysulmere, Jodhpore, and Bickaneer, the Great Desert of northern India known as the Tharr, a vast sandy plain traversed in the interior by long waves of sand hills. The character of this desert region is the same everywhere, consisting of long straight ridges of sand hills run ning in parallel lines, separated by short and fairly regular intervals, and varying from 50 to 100 feet in height, sparsely clothed with stunted shrubs and tufts of coarse grass, with wells few and deep, rendering agriculture difficult, and towns and villages at long dis tances apart. In the north-eastern angle of Rajputana, the country is not so near a wilderness as in the extreme north and west, yet a great extent is comparatively waterless and waste. Some few parts, however, have a better soil, and in these the principal towns are well built and fairly prosperous The sub montane region, lying immediately under north east, the first appearance of this range on a large scale is near the town of Khetn, where it attains an altitude of 2 600 feet, increasing to 3,450 feet at Ragonathgarh, its highest elevation in this direction, Harasmith in the Sikar district being 2,998 feet. At Amere the range begins to widen out considerably, the highest points ranging from 1,000 to 2,000 feet above the plain, the most conspicuous peak being that on which stands the fort of Taraguth, overlooking Amere, 2,855 feet above sea level From Amere to Beawar the range is less imposing From near Beawar south west, for about 100 miles in the Merwara strip of hill country in the range, the peaks rise to about 2,850 feet, the average level of the valleys being about 1,800 feet Beyond Merwara the hills widen, with peaks rising to about 4,000 feet above sea level, the culminating point rising above the village of Jargo, to the height of 4 330 feet There is great difficulty of communica tion across this section of the Arayallis between Meywar and Marwar, and the only pass really practicable for wheels and general traffic is that of Disuri. Further south, the hills decrease in height, and spread out until the chain loses its distinctive formation amid wide tracts of hilly wastes, extending southward over the whole western half of Meynar Mount Abu belongs by position to the Aravalli range, it is a cluster of hills of which the highest peak rises to 5,653 feet. The other hill ranges of Rajputana are comparatively insignificant, they run through Bhurtpore, Boondee and Kerowlie, their greatest height no where exceeds 1,400 feet. The Makandarra range runs across the south west districts of the Kotah state, from the Chambal to beyond Jhalrapatan

Of overs, the Chambal is by far the largest in Rapputana, flowing through the province for about one third of its course, and forming its boundary for another third. It mess in the summits of the Vindhyas, upwards of 2,000 feet above the sea, and is about 650 miles in length. Next in importance to the Chambal is the Banas, which rises in the south west of Meywar, collecting in its course all the drainage of that tract, and joining the Chambal a little beyond the north east extremity of the Boondee state, after a course of about 300 miles. In the north west division, the only river of any consequence is the Loni, risting in the Polikhat valley near Ajmice, and after a course of 200 miles flowing into the Rann of Cutch, its waters are brackish, hence its name, meaning the salt river North west of the Loni, and throughout all the north east, Ruputana is entirely destitute of streams worth mention. The minor rivers are the Sadarmati, the Mahi, the Sam, the Banna, the Parbati, the Beraich, the Kotesar and the Dhund. The Banas abounds in dangerous quicksands.

There are no natural fresh water lakes in Rajputana, the only considerable brain is the well known salt lake at Sambhar There are however, large artificial lakes within Meywar, built with the object of storing water, sws, the Debar, Kankraoli, Udisagar and Pichola lakes

The following lines of Railway run through the Province, zes, the 'Raiputana State Railway from Pulanpur to Ajmere, Jeypore and Agra a brunch line to Delhi diverging from Bandikui station 'This line is open for traffic from Agra to Ajmere, as also is the brunch to Delhi, from Ajmere to Palanpur it is under construction. The 'Ajmere and Reemuch State Railway,' also under construction, the 'Holkar State Railway,' from Akundwa station on the Great Indian Pennisular line to Neemuch, with a branch to Ujjain open for traffic, and the 'Sindina State Railway from Agra to Gwalior zed Dholpur,' open for traffic up to the last named place

Climate

The climate of Rajputana as a whole may be reckoned as one of the healthiest in India, at least for its natives

The moderate rainfall, the free play of the winds over its

Nete Stammand Salana formed o gually a part of Rutlam whose Ch ef o cons dered the pumopal Rapput Lodes in Western Malwa • Hashi Bhana Jaghar 4stypanages of the eight brothers.) • Chobe Jaghars.

flood discharge of 100,000 cubic feet, rising during the rains to 300,000 cubic f et per second, and drying up in the summer, the Ken or Kajan rising among the hills on the southern frontier, towards the Saugor division of the Central Provinces, at an elevation of 1,700 feet, with a length of course of 230 miles, and with numerous rapids and cataricts, some not less than 300 feet, the water of this river is in wholesome, the Chamidal, with its tributurea the Kala Sand, Parbatti and others, draining the whole of Malwa and rising near the station of Mhow, amids a cluster of summits of the Vindhya range, having the local appellation of Janapaca, and, after a course of 650 miles, flowing into the Janna, the Tar straing in the state of Malwa, with a length of course of 165 miles, the Sind, rising near Stronj in Malwa and flowing into the Janna after a course of a60 miles, and the Saane, rising in the hills of Amarkantak and draining the Bryghelkhand tract

The northern part of the country, of moderate elevation, has a climate partisking of the tornd character of the neighbouring tracts of the North Western Provinces and of Raiputana. In these parts the climate during the rainy serson, and for a short time after wards, is exceedingly unhealthy, fevers being then very rife in consequence of the moisture. imhibed by the superficial diluyial soil, being prevented from passing off by an imperme able substratum of sandstone During the dry and hot seasons the climate is not un healthy The middle, the southern and the western parts, or those comprised within the Malwa tract, with little exception, have a mild and rather equable climate, resulting from . the greater elevation of the surface. The cool season comprises the period from Novem ber to February, the hot season succeeds and continues to the middle of June, when the periodical rains set in and last to the close of September, the average fall being about fifty inches. During the rains the thermometer has a very moderate range, rarely more than from 72° to 80°, in the winter it sometimes falls three or four degrees below freezing point During the sultry season the hot winds are comparatively mild and of short dura tion, though the thermometer sometimes rises to nearly roof during the day, but the nights are for the most part cool and refreshing,

The population of the country within this Agency is of a mixed kind, comprising besides Mahrattas (the ruling order), Bundelas, Baghelas, Jats, Rajputs and Mahomedans, the last being estimated at about a twentieth of the whole. The density of population for the whole of the Agency is about 95 to the square mile

Most of the territory under this Agency is well cultivated and fertile, and the whole of the Malwa plateau most fertile, producing in abundance and excellence, when, not and other grains, and pulses, sugar cane, cotton indespecially opium, the poppy producing it being so generally cultivated, that when in bloom it gives the country the appearance of a sast garden. The state of Jaoin continus the best poppy producing lands in Malwa, and yields yearly about 1,000 chests of opium. The town of Rutlam is the principal opium mart in western Malwa. Tobacco is also much cultivated and is of excellent quality.

The mineral resources of the whole country are extensive, iron, coal, copper and line stone abound, and about twelve or fifteen rules north-east of the town of Panna, the capital of the state of that name in Bundelkhand, is an adamantferous tract from which diamonds recentracted, of the value of several thousand pounds sterling a year, the revenues from this sautce being divided between Panna and Charkari. The mines are less prosperous now than formerly, but it is believed that mexhastible diamond producing strata exist in that locality, and if the mines were properly worked their productiveness would be

BRIEF GENERAL DESCRIPTION.

The country embraced by the Central India Agency, hes within the parallels of 21° 24 and 26° 52 North, and meridians of 74° o' and 83° o' East, and is bounded on the north east by the British districts of Mirzapur, Allahabad, Banda, Hamirpur, Jalaun, Etawah and Agra of the North Western Provinces . on the north west by the native states of Dholpur, Kerowlie, Jeypore, Kotah, Ihallawar, Tonk and Oodeypore of the Rajputana Agency, and on the south east and south, by the British districts of Nimar, Hoshangabad Narsinghpur, Saugor, Damoh, Jubbulpore, Mandla and Bilaspur of the Central Provinces, and the Garhjat states or Chang Bakhar and Koria of Chota Nagpore in the Bengal juris-The British districts of Ihansi and Lalitpur of the North Western Provinces divide this Agency into two main divisions, native Bundelkhand and Baghelkhand, lying on the east of the said districts, and the remainder, or Central India portion, on the west Excluding native Bundelkhand and Baghelkhand, the area of the larger or Central India division, is about 61,700 square miles, with a population of 4,690,000 souls and a revenue of R5 201,23 000, within this area the states of Indore, Dewas, Ruthim, Dhar, Jabua, Ali Rajpur and Barwani lie on the south west, on the south east is Bhopal lying across the Vindhya mountains and resting its southern frontier on the Nerbudda, in the centre are Rajgath, Khilchipur, Narsinghgarh, Basoda and Karnai, and in the north are Gwalior and Datia. In the smaller or Bundelkhand division, with an area of 24,400 square miles, and a population of 3,480,000, Rewah lies on the east, Orchha or Tehri on the west, and Panna in the centre.

The Bundelkhand portion forms the eastern part of the great triangular plateau of Central India, it is inhabited by the peculiar Hindu tribes of Bundelas on the west, and Baghelas in Rewah on the east. To the west is the ner Betwa and its tributary the Dhasan flowing to the Jamna, in the centre is the Ken also flowing into the Jamna, and to the east is the Soane flowing into the Ganges, with the Khaimur range,—a continuation of the Vindibyas,—rising up along its left bruk. The Panna range, with deep ravines and isolated crags on its north western face, traverses Bundelkhand, and there is a broken plateau between the Panna and Khaimur ranges watered by the Tons, a tributary of the Ganges. Here is the military station of Nagode, and below the Panna range is Nowgong. To the north, Bundelkhand terminates in an amphitheatre of precipices, shaping the country below into a bay bounded by sandstone chiffs, which again advance to near the Janna at Murzapur.

The larger or Central India division, has the great range of the Vindhyas along the south, abruptly overhanging the valley of the Nerbudda and presenting the appear ance of a weather beaten coast line From its summits, varying in height from 1,500 to 2,500 feet, the northern slope to the Ganges commences, the whole region consisting of a broken but elevated country, with ranges of hills watered by the river Chambal, with stributants the Kali Sind and Parbatti, the Sind and the Betwa, ill flowing north to the Jamna and Ganges, and descending from the high table lands in cascades of great height-

The nivers that water Central India and Bundelkhand are the Betwa rising in Bhopal, with a length of course of about 360 miles, and an ordinary flood discharge of 200,000 cubic feet per second, during the rains in extraordinary floods, the discharge is \$200,000 cubic feet, and the surface velocity ten feet per second. It rises and falls rapidly in a few hours, is dry in the summer in the higher portion of its course, and is nowhere any gable. Its tributary, the Dhatan, has a length of course of \$50 miles, with an ordinary

flood discharge of too,coo cubic feet, rising during the rains to 300,000 cubic feet per second, and drying up in the summer; the Ken or Kayau using among the hills on the southern frontier, towards the Saugor division of the Central Provinces, at an elevation of 1,700 feet, with a length of course of 230 miles, and with numerous rapids and cataracts, some not less than 300 feet, the water of this river is un wholesome; the Chambad, with its tributaries the Kalt Sind, Parbatit and others, draining the whole of Malwa and using near the station of Mhow, amidst a cluster of summits of the Vindhya range, having the local appellation of Janapata, and, after a course of 650 miles, flowing into the Janna, the Tour sung in the state of Malan, with a length of course of 165 miles; the Sind, using near Stronj in Malwa and flowing into the Janna after a course of a60 miles; and the Saune, rising in the hills of Amarkantak and draining the Baghelkhand tract.

The northern part of the country, of moderate elevation, has a climate partaking of the torrid character of the neighbouring tracts of the North Western Provinces and of Rajputana. In these parts the climate during the rainy season, and for a short time afterwards, is exceedingly unhealthy, fevers being then very rife in consequence of the moisture, imbibed by the superficial diluvial soil, being prevented from passing off by an impermeable substratum of sandstone. During the dry and hot seasons the climate is not un healthy. The middle, the southern and the western parts, or those comprised within the Malwa tract, with little exception, have a mild and rather equable climate, resulting from . the greater elevation of the surface. The cool season comprises the period from November to February, the hot season succeeds and continues to the middle of June, when the periodical rains set in and last to the close of September, the average fall being about fifty inches. During the rains the thermometer has a very moderate range, rarely more than from 72° to 80°, in the winter it sometimes falls three or four degrees below freezing point. During the sultry season the hot winds are comparatively mild and of short duration, though the thermometer sometimes rises to nearly 100° during the day, but the nights are for the most part cool and refreshing,

The population of the country within this Agency is of a mixed kind, comprising besides Mahratias (the ruling order), Bundelas, Baghelas, Jats, Rajputs and Mahomedans, the last being estimated at about a twentieth of the whole. The density of population for the whole of the Agency is about 95 to the square mile.

Most of the territory under this Agency is well cultivated and fortile, and the whole the Malwa plateau most fertile, producing in abundance and excellence, wheat, rice and other grains, and pulses, sugar cane, cotton and especially opium, the poppy producing it being so generally cultivated, that when in bloom it gives the country the appearance of a vast garden. The state of Jacar contains the best poppy producing lands in Malwa, and yields yearly about 1,000 chests of opium. The town of Rutlam is the principal opium mart in western Malwa. Tobacco is also much cultivated and is of excellent quality.

The mineral resources of the whole country are extensive, iron, coal, copper and limestone abound, and about twelve or fifteen miles north-east of the town of Panna, the capital of the state of that name in Bundelkhand, is an adamantiferous tract from which diamonds are extracted, of the value of several thousand pounds sterling a year, the revenues from this source being divided between Panna and Charlari. The mines are less prosperous now than formerly, but it is believed that menhaustible diamond producing strata exist in that locality, and if the mines were properly worked their productiveness would be found not to have diminished. The diamonds produced here are of four kinds, the motival, clear and bulliant, the manul of greenish hue, the Panna tinged with orange, and the banspal, blackish. The stones are, however, inferior to the Golconda diminishment of in Part III. Madras Presidency

A trunk road from Gwahor to Bombry 111 Indore runs through the whole length of the Cental India division, and the 'Holkar State Railway' from Khandwa sixtuon on the Great Indian Pennsula Line, runs through Indore to Rullam and Neemuch, beyond which the line to Nusseerabad is in course of construction, as also is a branch line, called the 'Bhopal State Railway', connecting Bhopal with the Great Indian Pennsula Railway at Itaris station The Jubbulpore extension line of the East Indian Railway, from Allahabad to Jubbulpore, runs through Bundekhand

BRIEF GENERAL DESCRIPTION.

Area, Position, Boundaries, &c.

The Madras Presidency occupies the southern portion of the pennisula of India, with a considerable extension north-eastward along the coast of the Bay of Bengal Its bounded on the north and north west by the districts of Kanarr and Dharwar of the Bombay Presidency, Hyderabad or the Nizam's Dominions, and the southern native states of Bastar and Kalahandi of the Central Provinces, on the north-east by the province of Orissa under the

Bengal jurisdiction, on the cast and south cast by the Bay of Bengal, on the south by the Indian Occan, and on the nest by the Arabian Sea. The eastern portion of the Presidency extends from Cape Comorin, in latitude 8° 4, to the horithern extremity of Mysore native state, in latitude 3° 50. The greatest length from the eastern extremity of Mysore native state, in latitude 3° 50. The greatest length from the extremity of Guijam to Cape Comorin being about 1,000 miles, and the greatest width, measured from the coast at the eastern extremity of Mysore to Madras, about 390 miles. The total extent of sea coast is about 1 700 miles, without, however, any single really good harbour. Exclusive of the native states, the area of the Presidency is estimated at 138,318 square miles, including these states it may be taken at 148,053 square miles.

The districts of Ganjun, Vargapatam, Godavari and Kistna, are now known is the Northern Districts or the Northern Circuits. Prior to 1859 60 these Circuits consisted of five districts, but in that year the three districts of Rajamundry, Masuhpitam and Guntoor were divided to form the present Godavari and Kistna districts. Under the Nizam's government the divisions of these two last named districts were as follow — Guntoor, Condapilly, Ellore Rajamundry and Chieccoole.

The districts of Nellore, Madras, Chingleput and South Arcot, are called the Last Central Districts. In 1859 66 Madras town and Chingleput were murlgamated into a single district, but in 1870 this smalgamated district was again divided as before, learing the administration of the Madras town district in the hands of the Sea Customs Collector.

North Arcot, Kurnool Bellary and Cuddapah are called the Ceded Districts, Salem, Combatore and Nilgiris the West Central Districts, Tanjore, Trichinopoly, Madura and Tinnevelly, the Southern Districts, and South Canara and Malabar, the West Coast Districts.

Topography, &c.

The principal features which give character to the portion of India embraced with in the Presidency of Madras, are the two mountain ranges which run through it on the east and on the west 21, the Eastern and the Western Ghats The former range runs for some distance almost parallel with the eastern coast, the latter with the western. Starting from the north, the Eastern Ghats running with the coast to about 50 miles north of Madras, sweep to the south west and eventually unite, in the vicinity of the Nilgiris, with the Western Ghats which extend to Cape Comoun on the one side and to the north western extremity of the Presidency on the other These two great ranges may be said to form, -one on the south west, the other on the south-east, -the buttresses or walls of the triangular table-land included between them, commonly called the Deccan Though this table land rises const derably towards the south, it has a general slope of surface to the east and south east as indicated by the large streams flowing in that direction and emplying themselves into the The lowland lying between the base of the Western Chats, and the sea, is of less breadth than that Iying in the like situation with respect to the Eastern Ghats, being in some places not more than 25 and nowhere more than 50 miles in breadth with the Western Ghats, the Pastern south of the Godavan river, are of trifling elevation, the mean height of the chain being about 1 500 feet, but attaining a higher elevation as the range approaches southward, near Madras and the junction with the other range in the vice nity of the Ailgans North of the Godavan mer the Pastern Ghats rise to an elevation of unwar is of 5 000 feet the highest points being Gallikonda 5,346 feet and Galli Parvatam 1988 feet. The Western Ghats on the other hand rise to over 6 000 feet and at the

Nilgiris culminate to 8 760 feet. The Pulm hills to the south of the Nilgiris attain a height of from 6,500 to 7,100 feet, they are about 80 miles distant from Trichinopoly, and 40 from Madura, and have been recently proposed as 1 site for a Santarium. The Shervaroy hills on the east of the Nilgiris approach to within five miles of Salem and attun a height of 5,760 feet. Owing to the superior height of the western runge, and its vicinity to the coast, all the head witers of the great runes of the Presidency ongiante there, and triverse the Eastern Ghats on their way to the sea.

The principal rivers are the Godwan, the Arishna or Aistna, in theft lower courses, the Penner, Paler and the Caucery Numerous feeders, the chief of which is the Tunga badhira, from the Western Ghats and the plateau of the Deccan discharge themselves into the Kistna and Penner The rivers of the western and and southern coasts are numerous, but necessarily short in their courses and unimportant, as are also those in the extreme north eastern districts of the Presidency

The coast on the west called Malabar, from the north western extremity to Mangalore, is in general, bold indu rocky, from Mangalore to Cape Comoran it is considerably lower and either muddy or sandy, having several shallow inlets termed 'Backwaters extend inc in some cases a considerable distance (a couple of hundred miles) inland parallel with the coast, more or less navigable, and receiving the drainage of the streams coming from the Western Ghats Cochin is situated on the principal of these openings Comorin itself is low and sandy, but a few miles inland, and to the north of the extreme point, the southern summits of the ghats rise in lofty and majestic peaks known as the Palni hills To the north east of Cape Comorin, the coast, for 166 miles, is low, rocky and much beset by reefs and is little frequented, as navigation northwards into the Bay of Bengal, is obstructed and rendered impracticable for vessels by a sandbank extending from the main land of India to Ceylon called Adam's bridge which has only two navi gable channels, not however deep enough for the passage of large craft. The sea here, called the gulf of Manar, has on the coast to the north west the harbour of Tuticorin From Adam's bridge to Point Calymere, on the north of Palk's straits the shore has no bold features From Point Calymere the Coromandel Coast commences, and holds a direction which enclose a delta having a base of 82 miles towards the sea, where are the ports of Negapatam and Tranquebur, the Coromandel Coast continues to hold a northerly direction for 297 miles further to Gondegum, where the river Musi is considered to bound it to the northward and retains the same character of slight elevation and general sandy formation, with shallow water along shore Blackwood harbour is the only shelter throughout this distance for large ships, at all the other ports along this coast ships must be anchored in the open sea. I rom Gonde gam the shore is termed the Golgonda Coast, holding a direction north-cast for 270 miles to the southern point of district Vizagapatam and passing the esturnes of the Kistna and Godwari. Here the coast is so low that it is often inundated. Misulipitam, Cocanada and Coringa are the most important maritime places on this coast, which terminates in Latitude 17" 15 The Orissa coast commences at this point, here the coast becomes hold and rocky, and retains this character for about 230 imiles to the north eastern extremity of the Presidency The eastern coast has a few extensive lakes which require notice To the north of Madras is Lake I ulicat an extensive salt water lacoon, about 33 miles in length from north to south by 11 in breadth, it contains several islands and communicates with the sea by very narrow channels I ake Colour in the Listna district between the rivers Listna and Godwari formed by the overflowing those rivers and having a length of 17 nules and a breadth of 11 Lake Chilka co.

Orissa coast, in the extreme north-east, under the Bengal jurisdiction, 42 miles in length, by 15 in breadth, and separated from the sea only by a narrow bank of sand. The name signifies salt lake, it is very shallow, and nowhere exceeds six feet in depth.

The rivers of southern India give but little assistance to inland communication, but by means of cinals and excellent roads everywhere, this convenience is attained, there are besides several lines of Rulway running through the Presidency, the Madras Railway, 858 miles in length, and the Southern India Railway, 612 miles long connect Madras with Bombay and the principal towns in the Decean as well as with those in the west and south, the extension from Bangalore, to connect Madras with Mysore, also a branch line to Prondicherry being in progress

Steamers also leave Madras regularly for almost every principal port in India

The following are some of the principal Canals of the Madras Presidency -

Climate and Sanataria

From the physical features of the country the climate is necessarily very varieties The and plains of the east coast, with the thermometer occasionally rising to 175° in the shade, form during a greater portion of the year, a striking contrast to the green valleys of Malabar and Canara on the west, where the maximum heat is below 90" moisture brought up by the south west monsoon being condensed by the Western Ghats, the average rainfall between that range of hills and the western coast is over 120 inches, most of which falls between the beginning of June and the end of August able portion of rain finds its way over the ghats to the central districts, while even those districts on the eastern coast, where over orngation prevails, reap the benefit of this monsoon in the increased volume of water from the slopes of the Western Ghats. The north-east monsoon sets in about the end of September, and during its continuance the average rainfall does not exceed 30 unches. Previous to the rains, the country in the castern and central districts is everywhere parched and life is endured with difficulty, Along the coasts, the sca breezes which set in shortly after noon almost throughout the year, do much to moderate the temperature. The table land or undulating surface on the summits of the Ailgiri, and Palnis, having an elevation of from 5,000 to 7,000 feet enjoys the mild climate of the finest purt of the temperate zone. The temperature on the Vilgins varies much less from north to south than from east to west. Mists and heavy fogs are not unfrequent in the rains season, and the eastern side is less most than

the western Trom the end of October to M19, 1 sky clear and nearly cloudless is the rule, September and October are pretty irregular in the quantity of rain they bring. In the upper ringes of the Annamille hills, which attain an elevation equal to that of the Nilgiris in general, the temperature is much the same as in Ootreemund. The rains here for six months of the year are very heavy, and it is doubtful whether the climate during these six months is at all suitable for the residence of Europeans. The climate is greatly influenced by the monsoons,—penodical winds produced by the unequal heating of the continent during certain seasons of the year,—the regular alternation of which is most remarkable, the transition from one to the other being usually marked by great atmosphene disturbance.

Octacamund is the sanitarium of the Presidency on the Nilgins, but another his before formed on the Palms Other stations on the Nilgins are Attara Malle, 4,500 feet, Dodabutta, 8,640 feet, Jakunara, about 5,000 feet, 5,000 feet, 6,100 feet. The state of Soondoor contains a very important hill similarium for Europeans in the plateru of Ramandroog, which has been chiefly utilised as a consalescent dept for the troops serving in the Ceded Districts. It is distint from Bellary thirty eight miles and from Secundrabid 270 miles, and stands 1,825 feet above Bellary, and 1,200 feet above the surrounding plains. The length of the plateau from north to south is a mide and a half, with a varing breadth of from hell for three quarters of a mile.

Staples and Manufactures

The chief staples of the Presidency are rice, maize, wheat, millet, ragi and the pulses amongst food grains, oil-seeds, indigo, tobacco, sugar-cane, chillies, pepper, yams, plaintains and betel leaf amongst garden crops, and as a special crop, cotton has a large The trees most grown for their fruits are coccanut, arecanut, jack, tamarind and mango. Cocount palms flourish most luxuriantly on the banks of the estuaries and back waters of the western districts of Malabar and Canara The most valuable product of the Presidency is ship timber, abounding in the forests of Malabar, Canara and Travancore, as well as in the forests of the Eastern Ghats, principally Teak Sandalwood, supplied to the Chinese market, is also obtained from the forests of Malabar and Coorg Coffee has been very extensively cultivated and is now an important crop The principal coffee tracts of southern India he along the western coast, and coffee estates extend in nearly an unbroken line along the summits and slopes of the Western Ghats, from the northern limits of Mysore down to Cape Comorin, in the Nilgiris, the Shery troy and Pulm hills and in several districts of the Presidency Tea cultivation has not the same interest in southern India as coffee cultivation, and there are few plantations except on the Nilgiris Tobacco is grown more or less throughout the Presidency, with the exception of Malabar and the hill ranges, but the chief localities of production are the alluvial lands of the Godavari district, where is grown the well known Lunka tobacco (so named from the Lunkas or river islands on which it is culti yated), and the Combatore and Madura districts Chincona is also grown on the Nilgiris, and there are now six plantations for the supply of this febrifuge

The mineral weith of the Presidency is considerable. Gold is known to exist in the Wynad and Nilgins, and the attention of capitalists has been lately drawn to these auriferous tracts. Iron ore occurs in several parts in abundance, and extensive found ties live been established in Deppire and South Arcot. Manganese exists in Mysore, the Nilgins and Bellary. Antimony and silver, copper and lead ore in the districts of

Madura, Cuddapah, Kurnool and Nellore, also in Mysore *Diamonds of moderate value and garnets in abundance are met with in the Cuddapah, Kurnool, Godavari and Viza gapatam districts, and coal is found on the banks of the Godavari near Chinnore.

The usual manufactures are sugar, indigo, pottery, carpets, hardware, cutlery, saddlery, cheroots, working in metals filagree and basket work, and the weaving of silk and cotton cloths and coarse woollens

The Pearl and Chank or Conch shell fisheries, carried on entirely under Govern ment management, are at present in charge of the Master Attendant of Tuticorin The gross receipts from these fisheries in 1877 78, were Rs 31,267, the expenses were Rs 8,363, leaving a net profit of Rs 22,004

Form of Administration

The administration of the Madras Presidency is vested in a Governor with a Council of three Members For administrative purposes the Presidency is divided into twenty-one Districts, each of which is placed under the charge of a Collector and Magistrate, all being subject to the direct control of a Board of Revenue composed of three Mcm bers In the district of the Nilgins the principal administrative officer is termed the Commissioner of the Nilgiris Each district is again sub-divided into Taluks, the general superintendence of which is distributed among the Assistants to the Collector, a special local revenue and magisterial head, called a Tahsildar, being in charge of each Taluk, and in larger Taluks the Tahsildar being aided by one or more Deputy Tahsildars and Sub Magistrates. The administration of civil and criminal justice is under the superintendence of a High Court, assisted by District Judges and Subordinate Judges, the latter are usually natives

Census

The first Census of the Presidency was taken in 1822, when the population was returned at 13 476,923 Yourteen years after, or in 1836 37, a second census was taken, when the numbers returned were 13 967,395, showing an increase of only 490,472 first of the quinquennial enumerations was taken in 1851 52, when the population was found to have risen to 22,031,697, or an increase of 58 per cent in 15 years. Other quinquennial enumerations in succession showed the numbers

22 031 697 1 ears 1851 57 as given in the margin. The last census taken was on the 1845 57 #2 *57 855 15th November 1871, the resulting figures showed the popula 1861-61 24 656 509 1866-67 25 539 052 tion to be 31,281,177, being a gross increase of 4,742,125 over

the figures of 1866 67, giving an average density of 2.6 persons to the square mile The sexes are almost equally divided, the proportion being for the whole presidency ninety nine females to every one hundred males

BRIEF GENERAL DESCRIPTION

Area, Position, Boundaries, &c.

The Province or State of Mysore occupies a position physically well defined in the south of India. It is a table land situated in the angle where the Eastern and the Western Ghat ranges converge into the group of the Nilgiri Hills, and lying between 11° 38 and 15° 2 North Latitude, and 74° 43 and 78° 37 East Longitude. Its extreme breadth from east to west is about 290 miles, and extreme length from north to south about 230 miles It is bounded on the north by the Bombay Col lectorate of Dharwar and the Madras Collectorate of Bellary, on the south and east by the districts of Malabar, Salem, Combatore, Bellary, Cuddapah and North Arcot of the Madras Presidency, and on the west by the small province of Coorg, the South Canara Collectorate of the Madras Presidency and the North Canara district of the Bombay Presidency On the west the frontier of the state approaches at one part to within ten pules of the sea, but in general preserves a distance of from thirty to fifty miles from the coast on the east the newest point is not less than 120 miles. The southern extremity is about 250 miles from Cape Comorin The area of the province from the latest information, is estimated at 27 o81 square miles, and this estimate will continue to be accepted for statistical purposes, until a more accurate computation is arrived at by the Topographical surveys now being carried on in the province

Topography, &c

That portion of the Mysore province which is above the ghats is often called the table land, but this denomination does not accurately represent the character of the country, which is everywhere undulating and almost entirely free from the level tracts which characterise the greater part of Upper India One striking physical feature of Mysore, consists in the huge piles of rocks known as Drugs, rising abruptly in many parts to 1,500 feet above the plateau, some solitary, others clustered, and which are everywhere visible, most of them have been fortified from time immemorial, rendering them well nigh impregnable strong holds with the advantage of an unfailing supply of water at the summit. The Eastern Ghats form the frontier on the east, separating Mysore from the British Post vinces in the Carnatic. In many parts the ascent over them into Mysore is steep, while in others it is an easy gradient. The country rises gradually from these ghats towards Bangalore, which is situated in the most elevated portion of the Mysore plateau, and about 3 062 feet above sea level On the north west, beyond the Chitaldroog range of hills, there is a gradual fail through the broad valley which leads to the Tungabadhra river, near the vilage of Harihar, the altitude of which above the sea is only about 1,800 feet To the south west, by Seringapatam and Hassan, there is a more marked descent, abruptly terminated by the western range of ghats, comprising in this direction the Nilgin and Coorg hills, and further north the Manjarabad and Nagar ranges, known as the 'Malnad or hill country, the chief peaks of which are loftier than those of the eastern hills The loftiest elevations in Mysore, on the east, are Sivaganga, about 30 miles from Bangalore, reaching a height of 4 559 feet above the sea level, and Nundydroog, thirty six miles from Bangalore, 4 8ro feet above sea level, from whence the river Penner takes its rise, and the peaks of the Bellakalrangam hills in the Ashtagram division, varying in elevation from four to five thousand feet. These hills are clothed with rank vegetation, and un inhabited save by a rude tribe known as Soligars, on the west, Kuduremukha in the Nagar division, 6,215 feet, is one of the highest peaks in Mysore and a remarkable land mark visible from the sea, as well as from above and below the Ghats, and, the Baba

Budan mountains in the Nagar division, named from a Mahomedan saint, whose tomb is on one of the peaks at an elevation of 6-14 feet, the highest point on this range being Mulainagin 6,317 feet. These hills are inhabited and contain several coffee plantations, some of which are probably the oldest in Mysore.

The principal rivers in Mysore are the Tunga and the Bhadra rising in the north west of the province, uniting they form the Tungabhadra which flows northwards and east wards till it joins the Krishna below Kurnool, its banks are too high for irrigation pur poses. The Cautery, rising in Coorg, passes through the province in a south-easterly direction, receiving the Hemapats, the Sokaparans the Shamsha and the Arkarats from the north, and the Lakshmantertha and the Kapins from the south, the Cruvery and its tributaries supply numerous irrigation channels and tanks their courses through the province being marked by a green fringe of cultivation. The Vedarate rising near the Baba Budan hills, flowing due north and joining the Tungabhadra the Penner the Paler and Pannair which rise in the eastern part of the province. The waters of these rivers are detained and converted into chains of tanks, but they become large rivers before reaching the sea. Owing to their rocky or shallow beds none of the above rivers are navigable, and most are fordable during the dry months. There are no natural lakes in Mysore, but there are nearly 38,000 artificial reservoirs or tanks, some of which are of considerable magnitude. The largest is the Sulikere tank in the Shimoga district, 40 miles in circumference

The principal forests are found clothing the sides of the western mountains they abound in teak, blackwood and other valuable kinds of timber. There are good roads throughout the province, and a branch of the Madras Railway 845° miles long reaches Bangalore, the extension to Mysore, from Bangalore called the 'Mysore State Railway' is now in courts of completion.

Climate

The climate of Mysore is sensibly affected by its considerable elevation above the sea. It is temperate but not so healthy as might be expected, owing to the prevalence of ever in many localities The year may be divided into three seasons the hot, the rainy and the cold. In the hot season the thermometer ranges from 69" to 90 in the shade, and in the cold season from 50' to 77 The nights are seldom hot the mornings and evenings are always cool if not cold and the air is very elastic. The cold season is generally free from rain and lasts till the end of February The rain in April and May is generally very heavy, often filling the tanks in a few hours The province is favored by two monsoons, the south west and the north east, the former commencing at the beginning of June and closing about the end of August The north east monsoon sets in at the beginning of October and generally ceases about the middle of November The rain is more continuous than heavy throughout the greater part of the country, but in the tracts verging upon the Western Ghats it is unintermitting and puts a stop to all traffic. The annual rainfall of these regions is nearly five times that of the rest of the country, the quantity diminishing rapidly as the distance from the Ghats increases. The close of the rainy season in November is marked by dense fogs which prevail all over the country during December and January Electric storms are common and excessively violent

Staples and Manufactures

The crops chiefly grown in Mysore are rice ragi millets gram, wheat, sugar-cane, oilseeds, cotton opium betel, cocoanut and tohacco. Coffee is extensively cultivated and

the cultivation of this berry now takes runk as one of the most important industries of the country. Lac, gums, pepper and resm are also produced, and sandalwood gross spontaneously throughout the prosunce. Many of the fruits and vegetables of Europe are also successfully cultivated

The trade of the country being difficult to develope, owing to its lind locked position, the mountain briters which separate it from the surrounding countries on their sides, and the want of navigable triers, the manufactures are on a small scale and mostly carried on to supply native consumption. Gold dust is found, but there is no metal except iron in any degree of abundance. Garnets are frequently to be met with and kankar, or calcareous concrete for road making, crusts in considerable quantities between Bragalore and Seringapatam. Common salt and carbonate of soda impregnate the soil in many places, and are extracted for domestic or manufacturing purposes.

Form of Administration

In 1831 32 in consequence of the misgovernment of the then ruling prince, the Government of India assumed the direct administration of the affairs of Mysore, and first appointed two Joint Commissioners in whose hands the Government of the province was vested In 1834 a single officer was nominated as sole Commissioner in supercession of the Joint Commissioners, and to whom, in 1843, were also delegated the duties of Resident, that office as a separate post being abolished In 1862 the administration was re-organised on the model of the Punjab system, and a great number of reforms were insti tuted, all tending towards the introduction of the regulation system. The province was divided into three divisions and eight districts, each division being placed under a Superintendent and each district under a Deputy Superintendent, aided by Assistant Superintendents for the several Taluks into which the districts were sub-divided, and corresponding with Tabsils in northern India, the average area of each Taluk being about 333 square miles. These Taluks were again sub-divided into Hoblis, each of which was placed under the revenue charge of a native officer styled Shekdar, they number 500 In 1869 the title of Commissioner was changed into that of Chief Commis sioner, by whom the Government of the province is now administered, and in 1873, the designations of Superintendent, Deputy and Assistant Superintendents were changed into those of Commissioner, Deputy and Assistant Commissioners, respectively Judicial Assistants were also appointed to each district for the disposal of civil suits

Census

The first general census of Mysore was taken in 1840 41 and the next in 1851 52, since which periods annual returns were made up until a general census of the province was again taken in November 1871, Which last is regarded as fairly reliable, according to it the total population of the province was \$,055.412 souls, 2,535,924 being males, and 2,519,488 females. Of the total population the agricultural classes are in the proportion of one fourth, the non agricultural three fourths.

BRIEF GENERAL DESCRIPTION

What Wales is to England, Coorg is to Mysore in miniature and though governed by the same Chief Commissioner the province is British territory and forms no part of Mysore Coorg occupies the summits and eastern slopes of the Western Ghats, within the degrees of North Latitude 11" 55 and 12" 50, and East Longitude 75" 25 and 76" 14 and has an area, of z 000 square miles, its greatest length from north to south being sixty, and from west to east forty miles. Coorg is bounded on the north by the Netrayati Kumaradhari and Hemayati rivers which separate it from the southern taluks of South Canara and the Maniarabad taluk of the Mysore district, on the south the province is bounded by the Brahmagin mountains which divide it from the Wainad taluk of the Malabar distict, on the west, by the South Canara and Malabar districts of Madras and on the east by the Mysore and Hassan districts of the province of Mysore, the river Cauvery marking for some distance a portion of the eastern boundary A narrow arm about twelve miles long by about six wide, projects north wards into Mysore on the north east. The greater part of the western frontier is from twefity to thirty nules from the sea. The name Coorg has been anglicised from the native names 'Kudagu or "kodumale signifying mountainous country" or steep mountains

In the Cent in Report and subsequent official documents the area has been assumed as 7,000 equis a miles, on what it granded is not known. It or exact Comer's Survey of their green an area of cofe or at that it must of a figurant mile are 1/25 subsect the GI set and \$50 below but the inter dout its on the conquest of the country or \$50 a were knowned to Senth Canara or the Tulus operation.

In physical features the province of Coorg differs greatly from most of the surround ing districts, owing to the mountainous and wooded character of the country. It is a constant succession of steep ridges and deep ravines, the whole clothed with forest more or less dense, very dense on the eastward towards Mysore, where it is almost wholly un inhabited. Advancing westward the forests decrease, leaving Kiggatnad comparatively open, and Yelsavirshime a champaign tract. The Western Ghats running north and south with an elevation of from 5,000 to 6,000 feet, divide the territory into two unequal portions On the southern limits the Brahmagiri or Marenad range of hills, running in a direction from east to west, constitutes a formidable natural barrier between Coorg and Wainad, a sub division of the Malabar district, with a general elevation of 4,500 feet the highest peaks being Davasi betta, Hanuman betta, Kadanga male and Peru male. The table-land upon which Mercara or Madakere is situated, has an average altitude of 3 500 feet and is crossed in all directions by minor hills and ridges, being bounded on the west by the Ghats, which culminate near the Bisilu Pass in the Pushpagui hill, 5 626 feet above sea level, the summit of which commands an extensive prospect over Coorg Canara and Mysore. Other detached hills and ridges, though numerous, are not deserving of any particular notice. Some few detached ranges are situated along the eastern boundary, not however remarkable for either elevation or extent, amongst them the peaks of Siddesvar and Maukal betta are the most prominent, the former guards the pass that gives entrance to Coorg Near Mercara the hills are closer together and more abrupt, and the ravines deeper and more wild Towards Fraserpet the country assumes the champaign character of the Mysore plateau, with scattered solitary hills. South of Mercara the country is open with beautiful grassy downs The general declivity is to the north east and east, as indicated by the Cauvery and its tributaries flowing in that direction and receiving the dramage of nearly four fifths of the country

None of the rivers of Coorg are considerable as to breadth or depth, and the inequalities of the country through which they shape their course, render them unfit for navigation or for use in irrigation. The principal rivers rising in Coorg, are the Cauvery, Lakshmantirth, Surnavati, Hemavati, Barapole and Nujikal. The Barapole is navigable from the sea to within sixteen miles off the foot of the Ghats. The Cauvery rises in the Brahmagnir range, at a place called Tale Kaveri, where there are temples of great repute among the Hindus, which are yearly resorted to by thousands of pilgrims from the adjoining countries, the river being considered the holiest in India, the Ganges not excepted. Near Fraserpet this river during the monsoons rises to a height of from twenty to thirty feet. All the mountain streams form cascades of great beauty in their courses through the hills, especially the Jessy fall near Mercara.

The climate of Coorg is temperate and humed. The rainfall during the last thriteen years, his averaged 123 inches in the year. Of late years the denudation of forests and the natural decay of the bamboo have had the effect of rendering the rainfall less regular and heavy. In May, the hottest month the thermometer has never been known to exceed 36°, and the mean temperature at that month is 70°. In September, which is the coldest month, the mean temperature is 64°, the average temperature throughout the year is 663°. The hot season commences in February and continues till the close of May, succeeded by the rainy serson, when the south west monsoon sets in and prevails from June to September. The climate, in spite of its excessive humidity, is on the whole salubrous, except in the valleys where fever greatly prevails, it is a remarkable fact, however, that it appears to be decidedly immed to the cure of cuts, wounds and sores, which are often totally unmanageable without change of air.

Rice is the chief staple of Coorg The cultivation of cardamoms is next in im portance to that of rice. Coffee and sugar cane are extensively produced, and tea. chinchona, cotton and tobacco are also grown to a small extent English fruits and vere tables are satisfactorily grown, and the Coorg oranges are celebrated The cardamom is indigenous to certain forests in Coorg called males, situated on the line of the ghats at an elevation of from 2,500 to 5,000 feet above sea level. The cultivation of this plant is to a great number of Coorgs next in importance to that of rice, and the posses sion of a fine cardamom jungle is regarded as a mioe of wealth. The gardens come into bearing in October and September of the fourth year, and continue to give good crops for seven years, when they begin to decline The plant can be easily grown from seed, and a garden of 500 square yards will on an average yield 13lbs weight of good cardamoms Coffee is also a staple commodity of Coorg, and to it the province owes much of its pros perity The plant is propagated by cuttings, but is usually grown from seed, which is put down in March or April, the maiden crop being given generally in the third year, an acre of land yields on an average six to eight cwts of coffee, and an estate in good order should give a return of 50 per cent on the outlay There are no mines in Coorg and the whole of the metal in use is imported. Manufacturing industry has made little or no progress amongst the population, and almost every article in use in the country has in conse quence to be imported

At present Coorg is administered by the Chief Commissioner of Mysore, reading at Bangalore, who is in direct subordination to the Government of India. The Superintendent of Coorg, an officer of the Mysore Commission, is the chief local authority, exercising civil, criminal and revenue powers within its limits, under subordination to the Chief Commissioner For administrative purposes the province is divided into its relabelt, each in charge of a Sub Magistrate, called a Subbadar The taluks are again sub-divided into twenty four nads containing on an average about 67 square miles each. In north Coorg the nads, or as they are called Hobbis, are much smaller and more thickly populated Each Nad or Hobbi is in charge of a Parpatitegar, vested with subordinate magisterial powers Coorg is a non-regulation province.

The only assemblages of dwellings which can with any propriety be denominated towns, are Mercara the cypital and a military station, thenative portion of the town being known as Mahadevapet, Fraserpet, the monsoon head quarters of the Superintendent, and a town of small extent, situated on the eastern frontier and at the foot of the hills on which Mercara stands, Virajendrapet and Somwarpet The dwellings of the Coorgs in the country generally are isolated, and it is ooly here and there that the eye can detect the thatthered, houses of the ion-buttants betrayed by solitary wreaths of smoke

A previous computation showed the population to be 113,689, the last census taken in November 1871, gave the number of inhabitants at 168,312, showing an increase of about 48 per cent, the males numbering 94,454, the females 73,858

The pennsula of Katiyouter surrogueded on almost every side by the sea, and seem on with native chiefe in diff Ralposts is dwided that in the Praisable or district, to *Bartle Hallar Goldvined Hallarouth Arityouth Ballarouth Schriften Hallarouth Arityouth Ballarouth Schriften Hallarouth Arityouth Ballarouth Schriften Hallarouth Schriften Hallarouth Arityouth Ballarouth Hallarouth Schriften Hallarouth Schriften and the sea of the pen much can only be arrowed at approximately and may be stimuted at 2000 equare miles with a population of 1 st 15 dos south and a versious of the a 10 st 14 yr. The smaller states are grouped into administent without holy of chiefs had been been almost a service of the a 10 st 14 yr. The smaller states are grouped into administent without holy of chiefs had been chanted of new severe principle an accordance with the ground to the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state o

The Native States in the south part of the Bombay Presidency represent the remains of the Maratha empire the processoal state of the southern group is Aslbapur

"The State of Print lapsed to the British Government in 1878 and is now included in the Lasik district

The State of Varakot is managed by Bri ish official and the Ch ef is allowed half the revenue as income.

The Memori and Dany states of the Khandesh Agency 1 a in the north west corner of the Khandesh dutret between the Nerbudda and Tapt invers. The shabitants of this wild forest region are Bh B₃ and the prize pal income of the chiefs is derived from the manufacture and tail of a flugar called Manura.

BRIEF GENERAL DESCRIPTION

Area, Position, Boundaires, &c

Western India, or the territory under the administration of the Government of Bombay, known as the Bombay Presidency, extends from North Latitude 28° 45, the most northerly point of Sund, to 13° 53 in the extreme south of the Kanara district, and from East Longitude 66° 40, the most westerly point of Sund, to 76° 30 the eastern extremity of Khindesh, the extreme length of the whole territory being about 1, 100 miles, and breadth about 300 miles. This jurisdiction comprises a total estimated area of 198,809 square miles, the area of the British possessions being 125,849 square miles and that of the native dependencies about 72,960° square miles. The Presidency is bounded on the west by the Arabian Sea, on the north west and north by Belichistan, on the north-east by the British district of Muzaffargarh, the native state of Bahawalpur under the Punjab

jurisdiction, and the native states of Jessulmere, Jodhpore, Sirohee, Oodeypore, Dongar pur and Banswira of the Rajputana Agency, on the east by the native states of Jabua, Ali Rajpur, Barwani and Indore of the Central India Agency, the British district of Nimar in the Central Provinces, the Beru assigned district of Buldana and the Nizam's territory, and on the south by the native state of Mysore and the British district of Bellary in the Madras Presidency. An urea of 360 squire miles was trunsferred in 1878, from the British district of Khandesh to Indore, the population so transferred is not known.

The only foreign possessions included within the limits of the Presidency are those of the Portuguese Gorvernment, 1915, Gor, Daman and Diu, which are described at page 164

Topography, &c

The natural divisions of this Presidency may be classified as follows —r.t., The prowince of Sind—the valley of the lower Indus,—a flat plain about 360 miles in length from
north to south, and about 270 miles in its greatest breadth from east to west, containing
an area of 54,985 square miles, without hills and with but serint vegetation, depending
for its productiveness entirely on the water of the river, obtained partly by natural inun
dation during the months of flood and partly by canal irrigation = 2nd, Guparat, embra
cing the peninsulas of Cutch and Kattywar, consisting—except in its northern parts—
of rich and highly cultivated plains, alluvial in their origin but not now subject to in
undation 3rd, The Konkain, or the lowlands lying between the base of the Ghats and the
sex, a difficult country intersected by creeks and abounding it isolated peaks and detached
ringes of hills 4th, The plains of Khaudeth and the Decean, drained by large rivers,
with tracts of much fertility near their banks 5th, The Karnatite, or country south of the
Krishna, consisting of extensive plums of black or cotton soil in a high state of
cultivation.

The districts of the Presidency are classified as follows, with reference to the natural divisions above named —

Sind Districts -Kurrachee or Karachi, Thar and Parkar, Hyderabad, Shikanfur and Upper Sind Frontier

Gujarat Districts — Surat, Broach, Kaira, Panch Mahals and Ahmedabad Konkan Districts — Ratnagus, Kolaba and Thana

Decean Districts —Ahmednagar, Khandesh, Nasik, Poona, Satara and Sholapur South Maratha Districts —Belgaum, Dharwar, Kaladgi, and Kanara

The physical features which give their peculiar character to the above different parts of the Presidency, are the river Indus in Sind, the guils of Cutch and Cambay and the Rain of Cutch in Gujarti, and the rivers Nerbudda and Tapti in Gujarti proper, the river Iapti in Khandesh, the rivers Godavari and Bhima in the Decean, and the Western Ghits, separating the plateaux of Khundesh and the Decean from the low lying plains of Gujarat and the Konkan

The chief mountain ranges have a general direction from north to south. On the north of the Presidency are the Hala mountains, a continuation of the great Sallenman range on the right brink of the Indus, separating Sind from Ballentian Leaving Sind and passing by the ridges of low sand hills,—the leading feature of the deserts east of the Indus—and the isolated hills of the pennisulas of Cutch and Kaitywar, the first extensive mountain chain is that separating Gujarat from the states of Central India. These hills

rising in the neighbourhood of Mount Abu, and stretching southwards to the valley of the Nerbudda, may be considered as an extension of the Arayalli range. From the valley of the Nerbudda, still extending towards the south, run the hills known as the Western Ghats or Sahyadre range. This great range of hills, stretching southwards for upwards of 500 miles, forms the great characteristic feature of Western India, running parallel with the whole coast at a distance of from forty to fifty miles, with a general elevation of upwards of 1,800 feet, they contain individual peaks rising to more than double that height, and extend over a belt of country in many places not less than twenty miles in breadth. Their western declivity is abrupt though not generally precipitous, the land at their base being but slightly rused above the level of the sea. The landward or eastern slope is gentle, the crest of the range being in many places but slightly raised above the level of the plateau of the Deccan. Towards the northern extremity of this range. the country is rugged and broken, and contains isolated peaks and spurs which run eastwards, forming watersheds for the great rivers of the Deccan, the principal continuation to the eastward being the Satpura range, separating, as far as they extend, the valley of the Tanti from that of the Nerbudda, and the district of Khandesh from the territories of Holkar, and attaining an elevation of over 5,000 feet,-Torin Mall, on this ringe, in the vicinity of Dhulia, being about 5,434 feet at the summit, and a 304 feet at the lake-and the Saturala or Ajanta hills, separating Khandesh from the Nizam's territory on the south This last range is of less importance, being rather the northern slope of the plateau of the Decean than a distinct range of hills.

In proportion to its area, the Bombiy Presidency has the advantage of an extensive inne of coast, regular and unbroken save by two deep inlets,—the gulfs of Cambay and Cutch,—and extending from Honard in North Latitude 1.4° 3, to Larchi in North Latitude 2.5° This coast is for the most part rock bound and difficult of access, and though it contains many estuates forming fair weather ports for vessels engaged in the coasting tride, Bombay, Karachi and Karwar alone have harbours sufficiently landlocked to protect shipping during the previous efficiently fairly sufficiently landlocked to

The chief river of Western India is the India, with a course from Attock to the sea of 962 miles. In the dry season the surface water varies in breadth from 500 to 1,600 yards. The greatest depth is found between Kalibagh and Attock, where it is 186 feet The season of floods begins in Murch and continues to September, the average depth of the river rising during the inundation, from nine to twenty four feet, and the velocity of the current increasing from three to seven nules an hour. The discharge of water, which in December is calculated at 40,857 cubic feet per second, is estimated in August, to attain to more than ten times that amount. Next to the Indus in length and in volume of water comes the Nerbudda Rising in the Central Provinces and traversing the territory of Holkar, this river after a course of 700 miles falls into the gulf of Cambay, forming near its mouth the alluvial plain of Broach, one of the richest districts of the Presidency For about one hundred miles from the sea, the Nerbudda is at all seasons navi gable by small boats, and during the rains by vessels of from thirty to fifty tons burthen. The river next in importance is the Taple, druning an extensive portion of country, and being from a commercial point of view, the most useful of Gujarat rivers Of other Gujarat streams, the Sabarmati rising in the northern, and the Mahi rising in the southern extre mity of the Mahikantahills, deserve notice, these rivers drum the districts of northern Gujarat and fall into the sea near the head of the gulf of Cambay In the Konkan there are 'several minor streams rising in the Sahyadri range, and flowing westward into the Arabian Sea, which though formidable torrents in the rains, fall off in volume with the return of

fair weather, and during the hot season cease to flow Rising further inland, the Canarese rivers in the south have a larger body of water and a more regular flow than the streams of the Konkan, one of them, the Sherawati, forcing its way through the western crests of the Ghats, plunges from the high to the low country by a succession of falls, the principal of which is 890 feet on the eastern side. The Godarar and Krishna rivers insign in the Sahyadri range, and collecting to themselves several tributary streams, some of them of considerable magnitude, drain the entire plain of the Deccan as they pass eastwards towards the Bay of Bengal

With the exception of the Manchar lake in Sind and the Rann of Cutch, this Presi dency is almost entirely without natural lakes situated on the right bank of the Indus in the neighbourhood of the town of Schwan, in district Karachi, the Manchar lake, when fed by the waters of the river during the months of flood, attains a length of twenty miles and a breadth of ten, covering a total area estimated at 180 square miles. The most peculiar natural feature of the Presidency is the Rann of Cutch, a salt marsh, an inland lake, or an arm of the sea according to the season of the year. The area of this Rann, divided into two portions, the greater and lesser Rann, has been estimated at about 0.000 square miles It forms the western boundary of Gujarat, and when flooded during the rains, by uniting the gulfs of Cutch and Cambay, converts the state of Cutch into an In the dry season the soil is impregnated with salt, the surface in some places being moist and muddy, and in others like a dry river bed, or sea beach strewn with gravel and shingle. Opinions are varied as to the formation of the Rann and its character, its present condition being probably the result of some natural convulsion Rann to the north is about 160 miles from east to west, and 80 from north to south, and the little Rann to the east, 80 miles from east to west, and from ten to forty broad Two artificial sheets of water, from their size, deserve a place among from north to south the lakes of the Presidency, these are Vehar in the neighbourhood of Bombay, and Karak wasla near Poona. The former situated about 16 miles distant from Bombay in a group of hills near Thana, supplies water to the city of Bombay, and has an area of 1,400 acres, the latter supplying water to Poona and irrigating the country in its neighbourhood, covers an area of 1,500 acres

The wooded tract of country known as The Dangs, is a rough mountain region, lying between the table-land of the Khandesh district and the seaboard plains of Gujarat, this tract, with the district of Kanara in the south, is almost entirely devoted to the production of timber

Ahmedabad station of the Bombay, Baroda and Central India line, and open for traffic up to Palanpur and Deesa The Sind, Punjab and Delhi Railway from Kurrachee to Kotri, connecting with the India Valley State Railway line running from thence to Bahawalpur and Mooltan, while surveys of lines to connect the Sind Punjab and Delhi line with the Bombay, Baroda and Central India Railway, as well as for the extension of the Madras Railway from Bellay to Karwar Lai Hubli, with a branch to Goa, and from Wadhwan through the peninsula of Kattywar, have been completed The Kandahar State Railway, from Rul. Station near Sukkur on the India Valley line, passing through Jacobabad and Sibi, to be eventually extended to Kandahar, adistance of about 400 miles from Rul., with branches to Quetta, and to Pir Chauki at the foot of the Bolan pass, is now completed to about twenty miles beyond Sibi, the surveys for the remainder of the line to Kandahar, beangain progress.

In Sind, the Delta of the Indus is scored with numerous mundation canals, no less than 163 in number, and of a total length of 5,643 miles, irrigating an area of upwards of two million acres, twelve of these canals, of a length of 1,287 miles, he on the right bank of the river, and one hundred and fifty one, of a length of 4,356 miles, on the left bank. The chief of these canals are the Began, 148 miles in length, and the Desert canal, 60 miles, in the Upper Sind Frontier district, the Sind canal, 67 miles, the Saklar canal, 127 miles, the Deharwa, 45 miles, the Masunah, 32 miles, the Maharou ali, 37 miles, the Koranvah, 23 miles, and the Aronvah, 21 miles, in the Shikarpur District, the Ghar canal, 283 miles, the Nara, 217 miles, the Wahur, 38 miles, the Mittrau, 141 miles and the Thar canal, se miles, in the Thar and Parkar district, the Hiderabad distrut canals. 1,760 miles, the Mehrab, 61 miles, the Nasrat, 72 miles, the Naolakhi, 137 miles, the Dambro, 58 miles, the Rhem, 141 miles, the Albhar, 75 miles, the Great Marak, 212 miles, the Gharo, 267 miles, the Sarfraz, 102 miles, the Fulali, 994 miles, the Mulchand, 64 miles, and the Chandan, 24 miles, the Kurrachee district canals, 1,360 miles, the Western Nara, 27 miles, the Phitu, 27 miles, the Kalri, 136 miles, the Bagar, 125 miles, the Piniari, A10 miles, the Satuh, 58 miles, and the Khantah, 70 miles Other portions of the Presidency have irrigation channels of a smaller class, the chief of these are, the Tapti capal in Surat, the Panjhra and Jamda canals in Khandesh, the Palkhed and Widils canals in Nasik, the Ofhar, the Lakh, the Mutha and Nica canals in Ahmednagar, the Revare, the Yerla, the Gondauli and Krishna canals in Satara, the Gokak canal in Belgaum, the Hathmati and Sabarmati canals in Ahmedabad

Climate and Sanataria.

In a territory extending through so many degrees of latitude, continuing lowlands in the cost and elevated plateaux remote from the see, while receiving me its more southern parts the full force of the south west monsoon, extending northwards beyond its influence, great varieties of climate are met with. In Upper Sindli, the extreme dryness and hear, combined with the aridity of a sandy soil, make up a climate resembling that of the sultry deserts of Africa. The mean maximum temperature at Hyderabrd in lower Sindli, during the six hottest months of the year, has been given at innet yieght in the shade, while the water of the Indix reaches blood heat; in Upper Sindli it is even hotter, the thermometer being known to register 130° in the shade. In Cutch and in Gujarat, the heart though less, is also very great. The bondain is that out monst, the full of rain during the monsoon sometimes nearly approaching 300 inches. The table land of the Deccun bove the Ghits on the contray has a very agreable climate, as has also the southern Marathi country, and in the hills of Mahribishwar,—where there is a

trol of a Commissioner, and courts for the administration of civil and criminal justice municipal matters and taxation within the town limits being entrusted to and managed by a Chairmin and Board of Justices specially appointed.

Census

A general census was taken throughout the Presidency on the night of the 21st February 1872 giving a population of 16 199 144 souls in British territory the average dens ty for all the collectorates being 129 persons to the square mile, and varying from a maximum of 20 or in Bombay city, to 14 in That and Parkar in Sind Of the total population, Hindus constitute seventy six per cent. Mahomedans seventeen per cent. Aborigines three and a half per cent, and the remainder, 115, Christians Parsis Buddhists and others three and a half per cent. The proportion of males to females being fifty two to forty eight more than three-fourths of the entire population are Hindus their maximum number is in Satara their minimum in the Upper Sind Frontier districts medans preponderate in Sind, and their minimum number is in the Panch Mahals district, Except in Sind the Buddhists are widely scattered through all the Collectorates. The Christians are chiefly in Bombay city Poona and Thana. The Indo Portugese and Native Christians form nearly one-half of the entire Christian population. Two thirds of the entire Parsi population is in Bombay city alone and of the remaining third, one half is in the city of Surat The Aboriginal tribes are chiefly in the collectorates of Surat Khandesh and Nasik.

sanitanum,—of Singarh and other detached heights, Europeans may go out at all hours with impunity Bombay island itself, though in general cooled by the refreshing sea breeze, is oppressively hot during May and October. The south west monsoon generally sets in about the first week in June, and pours a prodigious quantity of rain along the coast, from June till October therefore travelling is difficult and unpleasant, except in Sind, where the monsoon rains exert no influence. The Sanataria of the Presidency will be found in the list of the multiary stations.

Staples and Manufactures.

Agriculture is the chief employment of the bulk of the population in this presidency. The ordinary natural productions are cotton, rice, the Indian millets, barley, pulses and grain of every kind, potatoes, sugar cane, coffee, red pepper, oil seeds turneric and tobacco. Coal is found in Cutch, and indigo, hemp, jute and other fibres are produced in Sind and the Konkan.

The principal manufacture of the Presidency is that of cotton, for which there are now forty two mills, and about 2,550 gins, chiefly in Bombay. Gujarat and Khandesh In addition to the cotton mills, one jute and two silk mills are at work in Bombay, where Chinese silk workers have also begun to establish themselves and do a thriving business. Dyeing, tanning working in metal, and the manufacture of indigo, sugar, paper, soap and glass are also carried on, but to a limited extent. In Sind, the chief manufacturing district of which is Hyderabad, blankets, carpets, rugs, leather work, gold and silver work, cutlery and ivory toys, are manufactured, while in the villages along the whole length of the coast, the fishermen cure and export large quantities of fish Pottery is made everywhere for local consumption and use The forests contain valuable timber, gums, drugs and dyes, also cocoanuts, from the kemel of which oil is largely extracted, and coir fibre from the outer husk. The Bombay box work made in Bombay and Surat, gives employment to several hundred workmen, carving in sandal wood, ebony and black wood is also curried on Though deficient in mineral wealth, the Presidency is abundantly supplied with stores of stone fitted for building and road making purposes. There are large limestone and slate quarries, and iron ore is mined and smelted in the Dharwar, Belgaum and Kurrachee districts while the adjacent hills in Baluchistan near Kurrachee are reported to produce a variety of minerals, such as gypsum, copper, lead, antimomy and sulphur

trol of a Commissioner, and courts for the administration of civil and criminal justice municipal matters and travation within the town limits being entrusted to, and managed by a Chrimman and Board of Justices specially appointed.

Census

A general census was taken throughout the Presidency on the night of the 21st February 1872, giving a population of 16,199,144 souls in British territory, the average density for all the collectorates being 120 persons to the square mile, and varying from a maximum of 29,291 in Bombay city, to 14 in That and Parker in Sind Of the total population, Hindus constitute seventy six per cent, Mahomedans seventeen per cent, Aborigines three and a half per cent., and the remainder, 212, Christians, Parsis, Buddhists and others, three and a half per cent. The proportion of males to females being fifty two to forty eight, more than three fourths of the entire population are Hindus, their maximum number is in Satara, their minimum in the Upper Sind Frontier districts medans preponderate in Sind, and their minimum number is in the Panch Mahals district Except in Sind, the Buddhists are widely scattered through all the Collectorates The Christians are chiefly in Bombay city, Poona and Thana. The Indo Portugese and Native Christians form nearly one half of the entire Christian population Two thirds of the entire Parsi population is in Bombay city alone, and of the remaining third, one half is in the The Aboriginal tribes are chiefly in the collectorates of Surat, Khandesh city of Surat and Nasik.

THE FRENCH TERRITORIES

THE French territories in India consist of several detriched portions, all subject to the jurisdiction of the Governor residing at Pondicherry, to whom the general government of these possessions is confided. Their total area is 178 sequere miles, with a total population of 271,460 souls. The several settlements are as follow —

IN BENGAL

r CHANDERMAGORE—Area about three square miles or 2,330 acres Lattude of town 27 50 N., Longitude 85° 23 E. Distunce from Calcutta seventeen miles north. The settlement of Chandernagore lies on the right bank of the Hooghly river in the distinct of Hooghly. The population numbers boot 22 600 Chandernagore appears to have been in the occupation of the Freint's seatly as 1700, the year in which Calcutta first became a British settlement. Forty years later the settlement attuned a high degree of opulence and splendour, which it retained until its capture by Chies in 1737. France recovered Chandernagore with the rest of her settlements in fadia, under the treaty with England 61763. It was again taken by the British 1793, and fanily restored at the general peace of 1816. The principal production is optim.

IN MADRAS

- 2 MARIKAL—Area fifty two square miles. Population 91,468 Laituide of town 105'37 N. Longitude 79' ST. Distance from Tanjore forty-seven miles north. This settlement hes within the district of Tanjore in the Madria Presidency, and is situated on the Coromandel Coast of the Bay of Bengal, on a small estuary of the river Cauvery. It has several large manufactories of cotton fabrics, and carries on an active trade in rice, which is stap principl production. This territory was restored at the general perce of 1816, on the condition that no fortifications should be recreted therein, and no multiary retained, but such as may be required for purposes of police.
- MAHE—Area five square miles Population 8,469 Latitude of town 11° 42 N, Longitude 75° 18 E. Distance from Tellicherry seven miles. A settlement on the coast within the district of Malahr of the Madris Presidency, and situated on the south side of the estuary of a small river flowing from the Western Chait, and navigable for boats a considerable distance inland. This place was taken by the British in 1791, and restored to the French at the general peace of 1815. The Carmelites have a church and a missionary establishment here.
- 4. YAMON or YAMAN—Area five square miles or 3,147 acres. Populating 5,460. Latitude of town 16'44' N. Longitude 83'16 E. A settlement within the God ward district of the Presidency of Madras, and situated near the bifurcation of the Godwarn river, and the river of Coringa, and about nine miles above the embouchure of the former. The Coringa river has a deep channel which admits of vessels of 200 tons butthen proceeding as high as Yanaon Tilus territory stretches along the banks of the two rivers for a distance of six miles.
- 5 POADICHERRY—Area 113 square miles Population 143 500 Latitude of town 11 53 N, Longitude 79 56 E. Thu territory consists of, first, the district of Pondicherry proportional probations of the town, eleven sullages, second, the district of Vallanor of forty five will ges, third, the district of Bahour of thirty ax villages. The chief exports are fine blue cottons and cotton yarm. The settlement is nacluded in the district of South Arcot of the Madras Presi dency, and is situated on the Coromandel Coass of the Bay of Bengal, at the mouth of a small river crapable of admitting only constitute graft of small burthen. The Goveroor of Podicherry rules over the whole of the French settlements is India. The town is pleasantly situated and healthy, and contains a population of about 40000, and a slituit from Madras about eighty six miles south. It is connected by Railway with Madras. Pondicherry being the principal seat of Goveroment for all the French settlements in India and Indo China, matters of umportance are negociated through the Collector of South Arcot. Minor matters, however, at the outlying stations of Karikal, Yanaon and Mahe are dealt with by the Collectors at those places without reference to Pondscherry.

THE PORTUGUESE TERRITORIES.

The only settlements now left to the Portuguese, of all the vast territories which were once under their rule and influence in India, are Goa, Daman and Diu, containing a total area of 1,006 square miles, and a population of about 407,700 souls. The following description of these places will suffice —

- GOA -Area, 1,062 square miles Population, 363 780 Revenue, Re 7,20,000 Military force, about 3000 The territory of Goa lies on the western or Malabar coast of India in the Bombay Presidency, and is bounded on the north by the native state of Sawant Warn, on the east by the districts of Belgaum and north Canara, and on the west by the Indian Ocean The Principality is about sixty four miles in length from north to south, and twenty in breadth from east to west. Two thirds of the population are stated to be Chris tians of the Roman Catholic persuasion The settlement is divided into two districts, Salsette and Bardes, which are again subdivided into parishes, the largest of which is Pangaum or Paniim_containing the present seat of Government The new town, Paniim, or Villa Nova de Goa, containing about 20 000 souls, chiefly of Portuguese descent, is situated at the entrance of the harbour, and is defended by several fortresses, one of which, called Algoada, stands close to the shore, on the point forming the north extremity of the bay The harbour, formed by an arm of the sea into which flows a small river, is distant about five miles from the old city of Goa, which is now almost entirely described. It is connected with the new city by a stone causeway about 100 yards long Old Goa contains many fine buildings, churches and monasteries, but it is fast becoming a mass of descrited ruins. The inhabitants are almost entirely ecclesiasties The ehief products of the territory are rice, only in sufficient quantity for the consumption of the inhabitants, hemp, pepper, cocoanut, betel nut, and salt, which latter article is manu factured to a very large extent. The territory is well watered, fertile, and in most places well cultivated, Latitude of new town 15° 29 N Longitude 73° 53' E Distance from Bombay 260 miles
 - 2 DA IAIN—Area twenty two square miles Population 33 to. The district of Damas, in the Thana district of the Bombay Presidency, is about seven miles in length from north to south, and four in breadth. The capital or town of Daman is situated on the Damanaganga, or niver of Daman which rises in the Western Ghats, or about 40 miles further east, and is fortified, having a rampart will then bastions and two gateways. The fort is called the eastle of St. Harronyni. Is Daman is an excellent place for small vessels to remain at during the south west monsoon and for the purpose of repair, the country being well stocked with ship timber. Provisions and vegetables are cheep and plentful. Daman was saked and burned by the Portuguese in 1531, it was subsequently rebulk and taken by the Portuguese in 1535, since which time it has remanded one of their possessions. Latitude of the town 20° 21 N., Lougitude 72° 53 E. Distance from Domby 160 miles
 - 3 DIU—Area twelve square males Population to 765 Latitude of fown 20° 42° N, Longi ude 71° 18° Distance from Bombay 170 males Dui is an island on the south coast of the pennisult of Kritiywar, in the Guytari province of the Bombay Presidency The Portuguese do titued possession of the pitce in 1515. The town is studed at the eastern extremity of the island which extends from east to west about seven miles and north to south about two miles. The soil of the island being useff little productive, vegeribles and other provisions are brought from the minimal. The chinnel between the island and mainland is navigable only for fishing bevts and other small craft, the western entrance, which is defended by a fort, having four of fise feet of water on the bar when lowest. The town is well fortified, being surrounded by a wall strengthened with towers at regular intervals. Notwithstanding the excellence of the harbour for shipp of moderate draught, there is but lattle traffic. Du head, two mules to the westward of the west end of Du island, but on its east side, a small harbour where vessely—right is esheltered from the westerly winds, in from two to three and a half fathoms.

BRIEF GENERAL DESCRIPTION

AFGHANISTAN-This so-called country extends from the Punjab on the east, to Persia on the west, and stretches down from the Amu Daria or Oxus river on the north to the frontier of Baluchistan on the south On the north, the boundary of the country as known to us at the present day, ruos along the oner Oxus or Amu Daria, (culled also Ab : Panjah at its head) from lake Victoria (Sir i Kul) at its source in the great Pamir plateau, to khoja Saleh, there leaving the mer with a slight southerly curve, it goes across the Dasht : Chul desert to Robat Abdula Kbun on the Murghab mer, and thence on to Sarakhs on the Han Rud or Tajend river, where it touches the Fersian frontier On the west. starting from Sarakhs, the boundary follows the course of the Hari Rud to a point near the village of Toman Aga, where it leaves that river and runs due south for about eighty miles, and then follows a strught course to the Cha Sagal pass (3 800 feet above sea level), from thence it turns off in a south-easterly direction for about twenty miles, and then runs due south to a point about five nules east of the village of Bundan in Persian territory, from thence it again turns in a south easterly direction, passing through the Hamun swamp to the river Helmand, which marks its course for about thirty miles up to the town of kuhrk, whence it turns off in a direct south westerly course to the peak of Auh Malik i Siyah, its extreme south western limit. The southern boundary touching on Baluchistan is not so definite, but may be said to run through the sandy desert, along, or in the vicinity of the parallel of 30°, up to within thirty or forty miles of Quetta, whence it turns in a north-easterly direction, beyond which it is for the present unknown. The eastern boundary has always been considered conterminous with the British line of the Punjab frontier The extreme north-eastern limits up to lake Victoria. are entirely unknown. It may be as well to mention here, that the country along the eastern frontier of Afghanistan, between the Punjab and the Koh Jadran or Kohnak range of hills on the west (sometimes called the Western Suliman range), and northward up to the Kuram valley, contains numerous tribes who do not, and it is believed never did, own allegiance to the sovereign of Kabul. The whole drainage of this part of the country containing these independent tribes, flows into the Indus. In the extreme north-east direction also, in the country to the east of the Lun ir and Chitral valleys, there exist tribes and states more or less independent, and who it is believed have always disclaimed the authority of the ruler of Kabul. excluding these independent portions, the remainder of the country of Afghanistan includes the whole drunage of the Kabul river up to British territors, the whole drunage of the Helmand river, the whole dramage to the Hamun swamp from the north, the whole eastern dramage of the Hari Rud, and the country drained by the Murghab south of the supposed north western boundary, as well as the country drained by the southern tributaries of the Orus, ver, the Sangalah, the Sar i pul, the Balkh, the Khulm, the Kunduz, the Akawai, and the Vardoi The Orus is navigable to Khoja Saleh, and it is believed that it will prove to be oute navigable up to its confluence with the Kafirnahan near Khulm and Lundur. The drain age of the Helmund and its tributaries the Arghandab and the Tarmak is lost in swamps on the west, and on the north the Murghab and Hart Rud flow into the Kara Kum desert north west of Mers or Naukala and disappear there, being absorbed into the soil.

The Kabul river, a vibutary of the Indus, after a course of about 2,0 miles falls into the Indus at Attock. The principal feeders of this river are the Swai, Lendai, Kunar or Chitral, Alingar, Alishang, Tagao, Nijao, Panjshir and Ghorbarod from the north, the Legar Teim, Surkhab, Barr, and Tirah from the south. The other minor rivers of the country view Farah Rud, Lori, Kutam, Gomit, Shahand and Arghesian. The Harunn swamp above alluded to is situated in the province of Sistan on the south west border of Afghanistan, it is about seventy miles in length and about twenty the miles are benefit in about twenty five miles to breadth, with a depth of from three

^{*}From fort Petro Alexanuroisk to Charges the distance of age in less was steamed to 7½ days inclusive of stoppages. From Charges to Khoja Sashi 170 mTes was reached by accessed to days. The who e downward to 710 of the Dates Lauroif & from the a Saleh was performed in to days by the same steamer.

to four feet, there is another lagoon called Ab Istada, sixty miles south west of Ghazni, about twelve miles in breadth, and four feet in depth, the water of both these lagoons is salt

The area of the whole territory is about 300 000 square miles. It includes a succession of ridges and valleys, the latter being irregular, and the ridges occasionally rising into lofty mountinis or expanding into plateaux. Starting from the Karambar and Baroghil passes on the extreme north east, at the bead of the Churtal or Kashkar valley, Afghanistan is traversed by several lofty ranges of mountains, just, the Hindu Kush range terminating at the Haji Khak pass, the Koh i Baba range, the Shah Koh (black mountains), the Safed Koh (white mountains) the Triband I Turkestan, the Koh Jadran or Kohnak, the Western Sulimans) and the Eastern Suliman range. The highest summits are in the Hindu Kush range in the north, which sometimes exceed 2000 feet, many of the passes across the hills being more than 10,000 feet. These mountains are the great water partings between the basins of the Indus, the Oxus, the Murgbab, the Hari Rud, the Helmand and its tributaries, the Arghandab and the Tarak.

Although by far the greater portion of Afghanisan is a region of desert, rocks and inaccessible mountains, it is however, interspersed with several self satered and fertile vallets, yielding all the ordinary crops and the finest fruits and vegetables in abundance. In the forests, there are many of the trees common in Europe, and some others peculiar. The associated plant grows in great luxurince, and the Pine flourishes on the mountain sides up to a height of 10 cooffect, while Oals, Walnut, Birch and other trees grow at lower altitudes. In many parts, the climate brings to perfection many tropical productions. The valley of the habil tire appears to be the most important part of the country, to the south is the fertile district of Logar, drained by the river of that name a tributary of the kabul, to the north is the koh i daman, also fertile and highly cultivated and to the east is the valley of Jellalabad. There is also an exceedingly rich and level tract in the vicinity of Herat and Kandalad.

The mineral wealth of the country is considerable, silver, mercury, copper, antimony need and sinc, are all present, some in abundance, while gold is found in many places. There are indications of coal also

The principal marts of the country are Kabul, Kandahar and Herat, and a considerable are trade with India, Persia, Chinese Turkistan, Bokhara and Baluchistan is carried on The manufictures are unimportant, consisting chiefly of shawls and other woollen fabrics, which last are seldom exported. The whole commerce and carrying trade of Afghanistan is carried on by the Lohanis, (Powndahs) a pastoral tribe of Afghans who occupy the country eastward between the Western Suhmans and the Indus

The climate of Afghanistan, though varying greatly in different parts, is on the whole chracterised by dryness and great extremes of temperature. In Cabul and Ghazin the cold is intense and snow lies on the ground for three months in the winter. Even in a littled lower than that of Spain or Italy, the severity of a Russian winter is endured. In Jelliabid, however, where the elevation is nearly 2,000 feet above the sea, the winter is as mild as in Hindos tim. The heat of summer is everywhere great, and in some places higher thin in Bengal At Kabul 6 500 feet above the sea, the thermometer ranges from 90° to 100°, in Kandahar it is even higher.

5 000 000 and of these perhaps one and three quarter million are true Afghans, who are how ever, in a simular position to the Turks in the Ottoman empire and like them generally armed and trained for war, the remainder are Pulhans proper and non Afghans, generally traders and agriculturists. To truk the Afghans in the order of their relatite importance we have first the Krathankes, descendants it is said of militury colonies left by Nadur Shah when he overran the country. They are modern Persians of mixed Persian and Turkish descent, numbering about 150 000, but from their courage, weith and enterprise of far more consequence thin a much larger number of any other race in the country. They occupy a large and weithly quarter of the city of Nabul, and fill important posts in the city administration of the country, they are bold and skilful horsemen, intelligent, orderly and amenable to discipline. In religion they are Mahomedans of the Shah persisasion and speak Persian.

Allied to the Kuilbrashes in language are the Tipuls supposed to represent the original Persian inhabitant of the land. They number about hild amilion. The large tract of hilly country extending from the koh i Baba near Kubul, to Herit and nearly down to Zamin diwar on the south, is called Hazira. This portion has always been almost entirely independent of the ruler of kabul and no Afghan cun pass through it. The more accessible of the Hurara districts, betweet Girishi, and Herat, only from fear of the Kibul armies pay the Amir tibule. It is occupied by tribes of Tartar origin called Harians, and towards the south west, Aimaks, and number some 400,000, they are chiefly a pastoral people dwelling in secluded villages, or wandering over the hills and living on the produce of their flocks and herds, and retaining in many places their ancient customs and hebits unchanged since they came from the highlands beyond the Oxus. The majority speak Persian and profess the Shith Mahomedian faith.

Prssing into Afghan Turkistan, which comprises the districts between the Oxus and the Hindu Kusli. Koh i Duba and the Tirband i Turkistan mountiums from the Mur_nliab to the Prints, e.g., the kirunates of Miumana, Shibarghan Dukh Khulin, Kundur Budishan and Wakhan, we find the ruling rice to be O. becz, who in some parts form the bulk of the population. In Badishan, Wakhan and other remote places, the populace is still. Taj. to remninis of the abon, into reason, and the Afghans have only occasionally appeared as insiders and plundeters, but the memory of their presence is generally, sufficient to enforce the pay ment of a tribute to Kabul. The Orbegs Tajiks and other inhultiants of this country are estimated at about 640 coo., the Orbegs being originally intruders who crossed the Orus and subdued the Tajiks, to be themselves conquered in turn by the Afghans.

Senartted from Afghan Turkistan by the Hindu Kush are a number of valleys mostly well watered and fertile, running generally from the mountum range to the Kabul tiver. To the west and north of kabul, the spurs and valleys are inhabited by the Kohistanis or mountaincers, wild tribes of perhaps mixed origin, turbulent and treacherous, nominally subject to Kabul, but ever ready to take advantage of a weak Government | Fast of these and extending to the snows of the Hindu Kush is Kafirislan inhabited by a fur, interesting and somewhat mysterious people. called the Stabbash Anfirs (black clothed unbelievers), who seem to be one of the earliest off shoots of the Aryan race, or more correctly speaking perhaps part of the ong nal stock itself, who have remained for ages in or ocur their original home. Few Europeans have seen any of this curious race. They themselves claim descent from Alexander the Great, and it is possible that some of the Greeco Bactrians, when driven from the cities in the valley of the Kabul river, may have sought refuge in this almost inaccessible region and have been absorbed by the old population. The Kafies have some distinctively Luropean customs, as sitting on chairs and using tables Up to the present time they have resisted all the attempts of the Afghans to sub due and convert them to Mahomedanism, though those who live on the borders have had to submit, and are called "Nimchas" which may be taken to mean balf Mahomedans. In num bers the Kafirs with Nimchas and Chitralis are thought to be about 150,000.

To the cust of kafinstan ure the kunur, Bryuer and Swit bill men, apparently not of Afhan origin, but Af_hhan in lunguage and other respects. Like their neighbours the Mommad, they take little interest in kabil politics and care only to preserve their own inde

pendence East and south of these again are the Yusufzaies, one of the principal Afghan clans, who hive partly in a state of independence and partly in British territory

If we now turn to the west we shall find in the sandy wastes of Sistan, nomads of virious races and wild freebooters in a state of anarchy and musrule. North of Sistan, the western frontier is formed by the important province of Herat, where the population is purely Persian, the rulers and garrison only being Afghans. Of the Afghans themselves there may be between one and a half and two millions in Afghanistan, speaking for the most part their peculiar lan guage. Pushtu, of the same family as Sanskrit, though essentially distinct, and being Mahome dans of the Sunn persussion. They are divided into clans, as the Momands, Galizais, Afndis, Duranis, &c., each of these being again subdivided into many smaller tribes.

Afghamstan in fact may be compared to the Turkey of fifty years ago, the Afghams re presenting the Viahomedans, the Kinibashes and Tajiks being likened to the Greeks and Armenians, and the independent hafirs and Hazaras to the Montinegrins and Servicians

The chief towns of Afghanistan are Kabul, Ghazni, Kelati Ghilzai, Herat, Kandahar, Balkh, Khulm, Khanahad Indarab Kbinjan Narm, Takhtapul, Andhkui, Suri pul, Meruchak Kunduz, Maimana, Jellalabud, Chitral Dir, Girishk, Bamuan, Shibarghan, Faizabad, Sabzawaz, Pishin, Lash, Iowain, Farah khash and Ghurian

Afghanistan communicates with India by various passes, the chief of which are the Klaibar commencing near Peshawar and extending through hills about thirty miles to the plans of Jellalabad, the Shutargard in vid the Kuram valley and the Jag fallal pass through which the road from Jellalabad to Kabulasi Gandamak passes. Several other passes also lead into Afghanistan across the Eastern Sulman range from the Deraiat of the Puniab, through which the Povindahs or trading class of Afghans convey their goods, the chief of these are the Sakhi Sarivar, the Chachar, the Ghuleri or Gomal, the Draban, the Shangar, the Kaura and the Vihova There are several passes over the Hindu Kush range into Afghan Turkistan, of most of which very little is known beyond the names, the principal are, the Buroghil pass (12 000 feet) leading into Wakhan from Chitral, the Dora (16,000 feet), the khartara, the Nuksan (17,000 feet), the Agram, the Ishtirak, the Anjuman, the Khawak (13,200 feet), the Buzarak, the Parwan, the Salanlang (12,000 feet) the Kushan, the Gwalan, the Gwazyar, the Chardarya, the Ghalalaj, the Faringal, the Hajikak (12,000 feet), the Una, and the Shibr The whole of the passes are free from snow about the end of June, but the most elevated peaks continue covered throughout the year. An extension of the railway from Peshawar to Kabul has been mentioned, to follow the course of the Kabul river, but it is doubtful whether? line could be carried along that route or if it can be constructed at all in that direction. The Railway to Kandahar has already been referred to under Bombay Presidency'

The capital, habil, 6 500 feet above sea level, is encompassed by hills on three sides, and is situated in a gorge where the habit river breaks through a ringe or spur from the Paglinan hills. The modern city with its suburbs is extensive and reaches across to the north bank of the river. On the east side is the fortress of Bala Hissar on a rocky height. The population is about 75,000 and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100 feet and 100

AFGHAN ETHNOLOGY

A paper by Mr A H Keane, published in "Nature"

Duties the empire of the Sussandes the whole of the region, from Persia proper to the right bank of the Indus, and from the Koh. Baha, Ghor and other western continuations of the Hindu Kush to the Araban Sea, was known as khorasan, that is Khorasan, the Land of the San, or the East. This tirm with the gradual reduction of the Persian sway, has shrunk to the proportion of a province on the north-eastern frontier of Persia, and his been repliced further east by the ethnical expressions. Afghanistan and Bluchistan, the lands of the Afghanis and Bluichis But these expressions, as to frequently happens, are so far misomers and deceivings, that the lands in question hirbour many other peoples besides those from which they are now named. In Balcohistan, for instance, the most numerous, ponerful, and influential element is

not the Baloch at all, but the still unfathomed Brahûu, from which circumstrace it has even been suggested that the country ought rather to be called Brahustan. A similar suggestion could not certainly well be made with regard to Afghanistan, for here there is no other people who can for a moment compare with the Afghans and Pathuns in numbers, or political importance Still the subjoined rough estimate of the population, according to nationalities, will show that it is very far from being homogeneous.—

Afghans and Pathans	Iranian stock	3 520 000
Tajiks	Iranian stock	1,000 000
Hındkıs	Hindu Stock	500 000
Hazaras and Aimaks	Mongolo Târtar stock	600 000
Kataghans	Tůrki stock	200 000
Badakshis	Galcha stock	100,000
Balochis	Iranian stock	100,000
Kızıl Bashes	Türkt stock	75 000
Kohistanis and Siah Posh	Galcha stock	50 000

6 145 000 *

It will be noticed that in this table are included all the races forming part of the present Afghan political system taken in its widest sense whose northern frontier is now marked by the upper course of the Oxis. Before dealing with the Afgl and proper, with whom we are chiefly concerned, a few words may be devoted to each of the minor elements, all of whom continue to keep aloof from their neighbours, seldom or never intermarying and mostly retaining their own national customs dress religion and speech. No general amalgamition has in fact, yet taken place of these heterogeneous singredients so that we cannot speak of the Afghan in the same sense as we do of, for instance, the Itahan French, or English nations. The Afghan race, though by far the most numerous, has been politically predominant only since the death of Nadir Shah (1/24), and its rule has been far too cheequered by intestine strife and foreign troubles, to have allowed time or opportunity for the slow process of absorption to have made any perceptible progress. Next to them by far the most important are.

The Tayls, who here as elsewhere in Central Asia, represent the old civilised Iranian communities, co-extensive with the former limits of the Persian empire, but since the accend ency of the Tarlo Mughal, Afghan, and Brahu races now forming politically the subject, socially the settled trading, and agricultural elements in these regions. Persian or some variety of it, is still every where their mother tongue—hence in Afghanistan they are collectively known either as Paristan e., Persian spealing or Debgah ee, persiants or ugniculturists. The Trylis are Iranians, a remainant of the old Persian population subdued by the Afghanis, but still speaking Persian and retaining the Persian type of features. (F. von Stein, in Petermann's Mitheliumeer for March, 1879) religion, Sanniate Remotely alled to them are—

The Hindkis of Hindu stock, who have been long settled liere chiefly as triders, forming neurons communities, especially in the eastern districts, said to be mostly of the Shitti caste, religion Brahminical, speech Hindustani

The Ha arat and An take, occupying the northern highlands between Buman and Herat, the former in the east, the latter in the west, are undoubredly of Mongolo Tattrs stock, though now speaking rude Persian dialects. They claim descent, some from the Toghanii Türks, some from the Noreish Arabs, others from the old abit race, but seem really to be military coloniats settled here by Jingins khân, Manku khân, and Timur. The Aimilis (the term simply menns horde, tribe, clun), are of the Sunni, the Hazaras of the Shinh sect and are con sequently ferredly opposed to each other. Owing to this circumstance they have often been regarded its of different races, but "there seems no reason to doubt that the Aimilis and Hazaris are the same people though separated by the different sects they have adopted." [Col. C. M. MacCregor. 'Aghanistan," p. 245), type, high check hones with small grey eyes,

[•] The effort executs by about a m II on that its untilly given as the total population of Afghan tan. For recent exploration has shown that mak you the trabes are much more numerous than had been supposed, and as our knowledge of the country necessor. If we ploshably be found to contain event a greater population that plants there given.

scent beurd and low stature. The Anmals occupy the Ghôr highlands, which must have been almost uninhabited when they settled there, for we read in the National Chronick that about 1190 A.D., Sultrin Shéhab ud din removed all the Afghan tribes from the Ghôr to the Gham highlinds, "in order to become the bulwarks of the seat of empire and hold in are the infides of Hindustan" Of the Anmals there are four man divisions, the so called "Char Amals" ("Four Hordes") Taemdris, Taemdins, Hazari Zeidnits, and Suns, with a total population, according to some authorities, of about 45,000, including those now settled in Khorasan The Hazaras, numbering at least 15,000, occupy the region stretching for 250 miles west from Kabulistan, and are divided into thirty eight main branches with numerous subdivisions, under chiefs bearing various titles, such as Khan, Sultru, Ikhirar, Vall, Mir, Mettus, and Tukhar, and bulberto practically independent of the Durim Amfre. Alin to them are—

The Kataghanu, a man branch of the Urbegs, forming the bulk of the population in Kundur and Brilkh, that is, the region now know as Afghan Turkestain, stretching from the northern slopes of the Hindu Kush to the left bank of the Upper Oxus They take their name from a legendary Kata, from whom they claim descent in two main streams, the Beth bula and Chegina, with five and eleven sub divisions respectively, each named after one of Katas sixteen sons Most of the tribes occupy the country south of the Oxus, but 7,000 firmilies are now settled north of that river, in Bokhara territory, religion Similie, speech Türki, 17ps, small stature, broad face, high cheek bones, sparse beard, small oblique eyes, are now mostly settled agraculturists and traders

The Badakhinis, or natives of Badakhishan, in the extreme north east, beyond Kundur and abutting on the Pamir table land, are a pure Aryan roce, intermediate between the Iranans and Hindus, and of the same stock as the highland Tajks, whom Ch de Ujfduy groups under the collective name of Galchas Chief divisions, Darwazi, Roshāni, Shugnāni, and Wakhi is a distinct variety, retaining many old Sanskritic elements, hence R Shaw thinks it may be a relic of a primitive organic Aryan language current here before the rice issued from the Pamir, or divided into Vedic and Zendic It would be interesting to compare it with the Jignöb, which Ch de Ujfalry tells us is unittelligible to the other Galcha tribes of Ferghāna A Galeba skull which has found its way to Paris has been examined by P Topinard, who pronounces it to be identical with those of the early Kellic Aryans If their speech also should prove to be of an organic Aryan type, as constituted previous to the dispersion, Ch de Ujfalry's view might be in reservedly accepted that "Ces pays mysterious received was asset seemed the longing de notire rack."

The Balochis, of Iranian stoch, and regarded by the Afghans as their brethren, are represented in Afghanstan chiefly by a number of hill tribes in the south east comer, and by some nomads in the south and west along the Lower Helmand Most of them belong to the Rind section of the Baloch race, the more important being the—

Kasranis and Bozdars, on north west border of Dera Ghazi Khan numerous sub divisions,

the Bozdars alone with sixty four septs (Major Minchin)

Khosahs, south of Sanghar Pass towards Shikarpur, four divisions Kalulani, Baliani,

Toniani, Sariani Laghāris, overlooking the Sakhi Sarwur Pass, Dera Gbazi Khan frontier, four divisions

Aliani, Hadiani, Boglani, Habiiani , fifty six sub divisions

Gurchanis, south of the Lagharis, about Chachar Pass

Mans, Sham district, east, north, and north west of Kachi, four divisions Ghazani, Loharani, Bijarani, Mararani, twenty two sub divisions The Mararani have separated from the rest, and are now settled west of Shi and north of the Bolan Pass

Bugtis, south of the Maris, two divisions Firozam, Zarkam, thirteen sub divisions

Kayânıs, Sıstân, former rulers of that country, by some said not to be Balochis, but Kâkar Afghans

Religion, Sunnite, speech, a rude, uncultivated variety of the old Persian, type, regular Caucasian features, light or brown complexion, hair often chestnut and even fair, eyes light

grey and sometimes blue, especially in centre and north. Of the many forms of the national name, Baloch, Biloch, Belüch, Balüch, Bilach, &c., Baloch is the best, coming nearest to the true pronunciation, as Pottinger assured his French translator, M. Eyriès

The Kirl B tiket, or "Red Heads,' Lnown collectively as Gholam khani or Gholam i Shah, "senants of the hing,' are of Torki stock, and hive been settled in Herat, and the Gullson mountins, but chiefly in khbul since the time of Nadir Shah. The term was originally applied by Shah Ismail to the Nikâlia, Jawānsher, and four other trusty Türki tribes to whom he oued his successes. But since then they have become a sort of brotherhood "much akin to the Beyyadiyah or "White Boys" of Oman, and bearing some analogy to the Mormons' (N G Palgrace, "Report on Province Trebmond," 1865. Those of Khul form three divisions the Jiwānsher, originally from Shisha, the Afshar, Nadir Shah stribe, and the Morld Khani, composed of "all the other Türks who have from time to time removed from Persai to khbul, religion, Shiah, with secret rites, speech, Persain, and amongst themselves, Türli, are a very fine race, very fair, with an evident mixture of Iranian and Täriar blood.

The Kohistanis and Siah Posh (Highlanders" and "Black Clothes) forming the bulk of the population in Achistan, Swat, Kafiristan, Chitral, and generally of the southern slopes of the Hindu Kush down to the left bank of the Kabul river, are of pure Aryan stock, allied to the Kashmirians, but probably more closely to the Badukhshis and Wakhis. The Kohistanis are Moslem, the Sinh Posh still mostly pagans, hence called Kafirs, or Infidels, by their neighbours, and their country Auftristan Then speech, of which there are ten distinct varieties (Major Tanner), is described as neo Sanskritie, akin to Dardu and Lughmâni But it has never been critically studied, and may possibly prove to be pre rather than neo Sanskritie. is in any case of great philological interest, having been isolated from the Lindred tongues since the cruption of Islam in the tenth century type, regular features, blue and dark eyes hair varying from light brown to black, broad open forehead, tall and well made. But General A Alibot ("Correspondence," edited by C R Low, 1879) distinguishes between a fair type with blue eyes, the pristocracy "descended of the Greeks (?) and a very dark type, the aborigines The Kohistanis north and north west of Labul, C. R. Markham says, are mainly Tanks (Proc. Geo Soe, Febroary 2, 1879, p 117), but they are more probably of the kindred Galcha stork, for those of Swat are represented as closely alin to the Siah Posh whom I take to be of this rice They form two main sections, the Tornals and Garwis. They have taken a large share in the recent events about Kabul. The Safe, who have also tately been heard of in the same neighbourhood are simply Siah Posh converts of the Tagao villey. Kunar district, north of Kabul, three divisions Wadin, Gorbaz, and Müsawid, speech Pashae, closely allied to Luchman, and Kohistani of Swat

We come now to the Afghans proper, whose original home seems to have been the Afbul valley, whence they spread westwards to the Ghor country, southwards to the Sulman mountains, and more recently down the Helmand and Arghandab valleys to handahar * They call themselves Bani Israel, 'Sons of Israel, claiming descent either from Saul or from the ten tribes, for on this point they do not seem to be quite clear. But this is of the less consequence that both claims are alike inadmissible. Notwithstanding a certain Jewish expression, which they have in common with the Armenians and other races of the Iranian plateau, they are beyond all doubt an Aryan and not a Semute race, so far as these terms can be at all used as racial rather than linguistic designations. And here it may be well to remember that both Aryan and Semite belong equally to one ethnical stock, conventionally known to anthropologists as the Caucasian or Mediterranean, and that they can often be distinguished one from the other only by the test of language. We have the same phenomenon in Europe, where but for their speech, no one would even suspect that the Basques of the western Pyrences were other than a somewhat favourable specumen of the Aryan race This test, however, is abundantly sufficient to sever them from that connection, and the same test must suffice to remove the Ighans from the Semitic to the Aryan group

Their most general and apparently oldest national name is Pulkitün or Pulkitün, is it is the Hubbaris, and which has been identified with the rearries, of whom Herodotus heard through Scylax (509 Bc.) as situated whout the junction of the Köphes (Kibal) and Indus Their country they still call Pulkitun khwa, which is equivalent to Watan khwa, or "Home Land", their language is always called by them the Pukhtis, softened in the west to Pushtu, and from Pukhtiana, the plural of Pukhtin, comes the form Puthian, by which they are lown throughout India. This word has been connected with the root Pukhtia, a hill, so that Pukhtin would mean Highlinder. But such derivations are seldom trustworthy, and it may be questioned whether any people have even called themselves Hill men, thou, h often enough so named by their neighbours.

The alternative national name, Afghan, by which they are exclusively known in Persia and Europe, has been regarded by some as synonymous with Pulhiun, both meaning "set free," but by others it has been connected with Acvalan, the Acvala, or "Horsemen," of the Mahabharata, who are supposed to be the Assakans, or Assekenes, of the later Greek historians The natives themselves draw a distinction between the two names, so that although all Afghans are Pulhtana, not all Pukhtana are true Afghans The atter term is properly restricted to the descendants of a legendary hats, one of the first apostles of Isl'im (ob 662), from whom, through his three sons, Saraban, Batan, and Gurgusht, are supposed to spring the 277 Afghan khels (tribes) proper Of non Afghan khels there are recloned 128, making 40; Pukhtana khels altogether Of these 105 are Sarabanı (from Saraban), 77 from Batan, in two divisions, Batanai 25 and Matti 25, these last being known as Ghilzae, 223 from Gurgusht, also in two divisions, Gurgushtai of and Karalanai 128, these last heing the non Afghan or Pukhtana khels as above The true Afghans occupy mainly the western, central, and north eastern districts-Herat, Sistan, Kandahar, and the Kabul basin, as far east as Peshawar The non Afghans, or Pathans proper, are found almost exclusively in the Sufed Koh and Suliman highlands, as far south as the Kaura or Vahova Pass, opposite Dera Tateh Khan A line drawn from about the paralled of Mooltan, through this point, westwards to Thal through the middle of the Derajat, will very nearly form the boundary in this direction of the Pathans on the north, and the Balochis and Brahms on the south This relative geographical area suggests a possi ble explanation of the distinction between the two great divisions of the race. From their more westerly position it is obvious that the true Afghans must have been the first to adopt Islam, and they may have thus come to look upon their pagan brethren of the Sulman high lands as Kafirs, undeserving to rank as genuine Afghans, the distinction thus originated naturally surviving their subsequent conversion

In the subjoined table an attempt is made to give, for probably the first time, a complete classification of all the main sections of both divisions, with their chief sub branches, approximate number of khels, geographical area, and population

19. Dabars	25	\$0,000	Maheud Bahadin Musa Ahmad Maruan	In the Koh Daman of the Dera Ismail Khin district opposi ethe Sangao and Dahma passes same stock as the Shiran s.
20. Tens	•	30,000	Gond Al Mara Masto	Kuram valley (See A ote under 21)
21 Jajus	\$0	4 000	Marian, Dann Intesh Al. ga h Ada Lebwann Al Ahmed Bian	Kuram alley, mor ly about over Anob and from the Shutar Cardan to the Pawar pass
•	1	•	Al Ahmed Bun Shamu.	Aste —a and we are not regarded as true Pathans, be ng trad tonally spring of two Mughal bro hers, Tor and Jajt. Edwarders says they are khatar H ndars from Rawalp ndi.
sz, Zaem3khts	33	25 000	2 Mars ded - Esbakar Hash 2 Mandan - Wate Manatu Mandan	In the hills between Mannage and Karam
a3. Dawaris	6	\$0,000		Dawan walley 32 59'-33 9' N lat.
st Khotwals	10	t= 000	lented?	Upper Khost valley adjoining Kuram and Eurmat
es. Mangals	14	25,000	Lastaur -Fa takeh Agar Andas, Musi Khajuri Zah	O Laphs in or Kuram valley and parts of Zurmat are supposed to be of Mu, hal descent.
r6 Jadrans	- 1	15 000		East of Zurmat E. s de of Sul man Ute
#1 Ushtaranan	47	2 000	s Ahmed - Thrahim Kade	The hill oppose extreme S part Deta I mail Khan district Are disowned by the Afghans, though apparently of Lohna (Foundah) stock
y3. Esots	15	1 000	Chado Inal -Ado Khidr Pain	The hals we'r of Dera Ismail Khan. Are said to be of kakar origin though now distinct Troglodytes
29. Juliurs	13	5 000	da Khad Ramdum Mohra Rajas Rawan	Be ween the Pûj spur of the Suluman Mts. and the Bordar Bilochis.
-	790	3 521 000		

Of the main sections in the above table, Nos 1 to 12 inclusive, are recognised as true
Afghins, and of these, Nos 1 and 3 (Dur'uns and Ghiraes) are by far the most important and
influential Since the time of Nadir Shih, the Durans have been the rul ag tribe, the Popalare
division till 1818, the Barakaae from that year to the present time They were formerly called

BALUCHISTAN, or the country of His Highness the Khan of helat This country hes south of Afghanistan, extending on the south to the Arabirun Sea, on the east to the frontier of Sind, and on the west to the frontier of Sind, and on the west to the frontier of Persa. It extends from latinde 2x*5 30 of 20°N, and from long tude 6x*0 to 69°45 E, its greatest length on the north from east to west being about 5,0 miles, and greatest breadth north us south about 380 miles. Its area is about 1600 on squire miles. Its coast line is remarkably regular but craggy and not much elevated, to wards the interior, however, there is rapid elevation. On the coast there are several well shell greed roadsteads, particularly Somman by and Chaburt bay, but no good harbours.

Much of this country is unexplored, in describing it therefore only an approximation to accuracy can be attained. It comprises seven divisions or provinces are, Cutch Gandana and country of the Maris and Bugtis on the north east, Saranan on the north, Ihalauar on the east Lus, on the south east, Makran occupying an extensive length of country on the south Actular or the mountain country on the west, and Actal, in which is situated the carnied of the same name. The interior of the country is rugged, and barren. It's eastern side is crossed from north to south by the Hala and Khirtari ranges of hills, which are a contri nuation of the Suliman range, but there are no very lofty enunences. The whole country is described as a maze of mountains, except on the north west where it becomes part of the desert. The direction of these mountain chains are almost wholly unknown with excention of a few of the principal ranges. One vast chain stretches along the entire coast, from the vicinity of Ras Iyuni on the west, to the river Purali on the east Parallel to this range. and at the distance of about 70 miles north from it, another well defined chain intersects Makran and joins with the Sarawani mountains near Belt. A third parallel range, called the Whishutt or Mue mountains, about 110 miles further north from the last described chain, forme part of the northern boundary of Baluchistan, separating it from the great southern desert of Afr hanistan. The other remarkable chains are the Bushkurd mountains, about 240 miles in length, and the Sarawani mountains stretching in a north east direction

The rusers of Balachistin are the Bhotan, Rodbat, Lora, Shirmah and Mula in the north, the Hubb Sinamani, Marwir, Nari, Urnach and Purali in the east the Shadi, Mokult. Bha sil, Ghish, and Gasbastru in the south, and the Dasht, Ralshan, Bhado, Gwargo, Nehing and Mishkhid in the west, with the exception of the Hubb they all dry up, or are lost in the east houring the dry weather, in the west season however, they are destructive mountino torients. Few of them flow through regular and well defined channels. Along the whole 500 miles of coast which Diuchistan possesses, there is no strum which cannot in dry wenther be forded

the Abdalt or Avdalt, a name which has been traced to the Ephthultes and Abdelt of the Byzantine writers of the sixth century. But it was changed to Durán from the title of Dura Durán, "Pearl of the Age," assumed by the Sardar Ahmad Khan, of the Saddozae branch of the Populaces when he usurped the supreme power at Kandaltar on the death of Nodir Shah, in 1747. The sext of government was removed from Kandahar to Kabul by his successor Taimon Shah (ob 1793), and this dynasty became extinct in 1818, when it was succeeded by the Barikanes in Kabul, though virious descendants of Ahmad Khan continued and still continue to aster their claims to the so recreate uniform.

Although mentioned in the national genealogies, the right of the Ghilzaes to be considered as Pikhtins at all, much less genume Afghans has been questioned. There certurily seems be a flaw in their escutcheoi, and they themselves (who alsa vs. call themselves Ghi_1), and not $Ghi_1 \cdots all$ claim. Tutal descent. The national tradition is that they entered the country in the tenth century under a certuri Sabaltagin, of the Kilich Türki tribe "anciently situated on the upper course of the Jivattes" (Syr Driya). But however this be, they are now entirely as an lated in habits, dress, religion and speech, to the other Afghan tribes, with the exception of a few who are still normals.

None of the other sections call for special remark except the Powndahs, who are at once agriculturists, traders, and warnors, their armed caravans yearly fighting their way through the inter-ening hostile tribes down to the markets of the Panjab and Smidh. The name is supposed to be derived from the Persian Paravanda, a bale of goods and seems to be indifferently applied to the Lohanis, Waaris, Malars Ghilazes or any other timbe temporarily or permanently forming part of this singular trades union. By far the most important section are the Lohanis the oldest and most numerous members of the association, and one of the most promising elements for the future profile settlement and material prospects of the country.

Physically the Af_hhans may be described as, on the whole, a fine race. Their features though often coarse and ugh, are regular in the European sense of the term, with the occusional Josish custabove remarked upon. Type, long, oval face, arched nose, head mesti cephalous, that is, intermediate between the round and the long, measured horizontally merantal index 79 s. fair complexion, thick beard, hair and eyes generally black, but light blue or grey eyes and brown hair common amongst the Rohillas, as the Sulman highlanders are often collectively called

divinity in human shape, but really by the Deh Raja, who is elected by the Peolous every three years from their own number. Buddhism is the religion of the country and the inhabitants are hardy and regrous, with dark sluns, and high check hones.

Bhutan trades with all the neighbouring countries but chiefly with Thibet, Bengal and Assim, in horses, cloth, mush, if whish, valuuts, oranges and Indian madder, receiving in exchange woollen cliths cottons, assificately, space, Ira, gold, silver and embroidenes. The revenues of the country are auxily paid in articles of produce and merchandise.

The chief towns are Punakhi or Dosen the capital, on the left bank of the Bugni river, and minety six miles cast north-east from Darjeching, Tasichorong and Paro on the river Goda da, and Toungsu on the road from Assam to Llassa. The inher towns are Wandipur, Ghassa and Murchom Punikha is a place of great natural strength

The Towang Bhutias occupy the southern slopes of the Himalayas to the eastward of Phutin proper, of which state they are independent. A considerable trade between Lhassa and Assam is carried on through them. The Towangs are quet and friendly. Eastward of the Towangs are the Char Duar and Thebengea Bhutias, two small and well behaved class. The territory of the Towang Bhutias extends to the truer Rowta, that of the Chir Duar Bhutias from the Rowta to the Chabe meet.

A fen Bhutias inhabit the Eastern Duars portion of the Goalpara district of Assam, and re semble in every respect their countrymen in the Bhutan hills

The language spoken by the Bhutas is said to be a direct of the Thibetan more or less blended with words and idoms of the countnes on which their own territory touches. In their religious observances, the most remarkable circumstruce is the noise with which they are accompanied. The instruments used are clarionets sometimes formed of silver and brass, but generally of wood with reed pipes, homes, thells, cymbals drums and gongs.

The garments of the people consist of 2 long loose robe which wraps round the hody, and is secured in its position by a leather belt round the waist. A legging of broadcloth is attached to a shoe made generally of buffaloe hide. No Bhutia ever travels during the winter without protecting his legs and feet against the effects of the snow, by putting on these hoots, which are secured by a garter tied under the knee. A cap made of fur or coarse woolen cloth completes the habilment, and the only variation observable is the substitution of a cloth for a woolen robe during the summer months of the year. The diet of the great body of the people is the most miserable it is possible to conceive, they are restricted to the refuse of weighed crops of unripe wheat and barley, and their food consists chiefly of cales made from these grams very imperfectly ground. The food of the superior classes consists of the flesh of goats, swine and cattle, and of nee imported from the Dunes. The mode of prepring their food is most martificial and rude, with little attention to cleanlines and still less to the quality of the meat they consume. They are very fond of tea and use it in large quantities classes are very much addicted to the use of intoxicating liquors. Their amusements are almost entirely confined to archery and quoits, and their character seldom appears to greater advantage than when engaged in these exercises. The character of the Bhutias, by the nature of their institutions, stands low in the social scale.

Every element of deterioration is comprised in their government both secular and spiritual. Their energies are paralysed by the insecurity of property, their morals are degraded, and their numbers reduced by the annatural system of polyandry and the excessive prevalence of monastic institutions

A.S.H.UIR or CASHMERE—A name now given to an extensive tract of country, retching from the Punjab on the south and west, to Thabet on the north and east, its extreme length being root 400 miles and its breadth *50 miles. The boundary of this territory on the north and north-crust is undefined, or maknown. The country modeless the valley of kankmar propers, 5 300 to 6,000 feet above the sea, Ladak or Leh, Baltistan or little Thibet, and several provinces of smaller importance, crv. Jommoo Bhadrawar, Gilght, kistwar, Naoshera, Punch, Rukshu and others, and is almost entirely montainous. In the sonthern portion the mountain sides are clothed with forests of cedar and pure, but further northwards founds. Thibet, there are large tricts destinte even of a trace of vegetation. The scenery of the mountains is in

fertile, but pruent industry has rendered the plants and salleys productive in all cat barley the millets and pulses of various kinds, oil seeds, cotton, race, indigo and tobacco. The sigar cane grows chiefly on the plants of Lus and the date in Makran. Vegetables of every kind are abundant, and the gardens and orchards in the vicinity of the towns produce the finest fruits, on the coast fish are caught in great quantities.

The manufactures of Baluchistan are unimportant, being confined to a few matchlocks and other fire arms at Kelat.

The inhibitants are divided into two great branches the Baluchis and the Bribuis, differing in languings, figure and manners. The Baluchis are fall, well formed and of dark complexion the Bribuis so called from the words don't with a first and in the north and west. They have great physical strength, and are generally more peaceful than the Baluchis. Both races are pastoral hospitable brave, excellent marksmen and capable of enduring much fatigue, and belong to the Sunni sect of Mahomedian Nettler prossesses a written language and their early histories have not been preserved. Polygany is universal, few however have more than two wives, some of the chiefs have four. Wives are obtained by purchase, and paid for in sheep &e. and a man is expected to marry the widow of a deceased brother. On the occurrence of a death, the body is watched for three nights by friends and relatives, and the times in passed in feast in the charges and the times in passed in feast in Calutines, and the times in passed in feast in the first passed in feast in the body is watched for three nights by friends and relatives, and the times in passed in feast in the first passed in feast in the first passed in feast in the first passed in feast in the first passed in feast in the first passed in feast in the first passed in feast in the first passed in feast in the first passed in feast in the first passed in feast in the first passed in feast in the first passed in feast in the first passed in feast in the first passed in feast in the first passed in feast in the first passed in feast in the first passed in feast in the first passed in feast in the first passed in feast in the first passed in feast in the first passed in feast passed in feast in the first passed in feast pas

The government is despote, the k.han having unlimited power over life, person and property, his rule being confined for the most part to the province immediately around his capital, the greater part of the country being held by tribal chiefs, over whom he has little or no control though they furnish contingents of men in case of war, and pay tribute, an obligation which is often evided. The revenues are estimated at upwards of Rs 3 oo coo.

The chief towns of Baluchistan are Kelat, the capital, about 6 000 feet above the set, Belatone near the coast, Dadar, Gandara Mustang, Nushki, Barawan, Kej Pisni, Dera, Son meani and Quetta, the inferior towns are Chahgeh, Dir, Timp, Sami and Kharan

The languages spoken are Balueht and Lersian

RHUTAN -Very little is known of this territory which lies to the east of Sikkim, between the Jalpaiguri and Goalpara districts of Bengal and Assam, and the mountains that form the soutlern slope of the Himalayas It extends from east to nest 230 miles with a breadth of about 100 miles, lying between latitudes 26" 18 and 28" 2 h and longitudes 88" 32 and about 92° 30 E The eastern limits are not certainly known the area is about 19 000 square miles. It is crossed by two ranges of mountain land parallel to the great mountain chain beyond, one (the nearest), 8000 feet high generally, with occasional peaks as much as 16,000 feet, the other, more distant and less lofty Between the Hunalayas and the first range is a high table land too bleak and barren to be habitable except at the foot of the first range where are most of the principal towns. To the east of the second range the land is level, and south wards of the lower range are the Duars, tracts of country of extraordinary fertility, whose produce once formed the chief means of subsistence of the people. These Duars were coded to the British in 1866 in return for an annual payment of money On the north Bhutan is bounded by Tibet and on the east by tracts inhabited by uncivilized mountain tribes. The scenery of Bhutan is scarcely to be equalled by that of any other country, at one sien may be seen rugged barren hills and valleys covered with luxuriant vegetation rushing mountain torrents and gentle streams dense forests and sunny slopes placid lakes and steep precipices and east ranges covered with eternal snow, while in regard to climate, the cold of Sibera, the heat of Africa, and the pleasant warmth of Italy, may all be experienced in a day's journey

The soil produces nee, when and milit in abundance, and gime of all kinds aboards in the forests—sheep, ponies and a hardy breed of horned cattle are reared. The roads are mer tracks through ravines which become tournets in the rany seison. The population, estimated at about 20,000, consists of three elasses, the priests, the chiefs or Penlows, who are the governing class and the cultivators.

The country is governed nominally by a person called the Dharm Rain supposed to be a

divinity in human shape, but really by the Deb Ryn, who is elected by the Penlows every three years from their own number. Baddbism is the religion of the country and the inhabitants are hardy and vigorous, with dark skins, and bigh cheek, bones

Bhutan trades with all the neighbouring countries but chiefly with Thibet, Bengal and Assam, in horses, cloth, mush, if, whish, walnuts, oranges and Indian midder, receiving in exchange woollen cloths, cottons, asafeetida, spices, lea, gold, silver and embroidenes. The revenues of the country are usually paid in articles of produce and merchandise

• The cluef towns are Punakha or Dosen the capital, on the left bank of the Bugmi river, and muety six miles east north east from Dayceling, Taschorong and Puro on the river Guda da, and Toungau on the road from Assam to Llassa. The other towns are Wandipur, Ghassa and Murichom Punakha is a place of great natural strength

The Towang Bhutias occupy the southern slopes of the Himaliyas to the eastward of Burtin proper, of which stitle they are independent. A considerable trude between Liness and Assam is carried on through them. The Towangs are quiet and friendly. Eastward of the Towangs are the Char Duar and Thebenger Bhutias, two small and well behaved class. The territory of the Towang Bhutias extends to the inver Rowin that of the Char Duar Bhutias from the Rowin to the Chaben river.

A few Bhutras inhabit the Eastern Duars portion of the Goalpara district of Assam, and resemble in every respect their countrymen in the Bhutin Inils

The language spoken by the linuars is said to be a direct of the Thiberian more or less blended with words and idoms of the countries on which their own territory touches. In their religious observances, the most remarkable circumstance is the noise with which they are accompanied. The instruments used are clarioners sometimes formed of silver and brass, but generally of wood with reed pipes, horns, shells, evuids drams and gongs.

The garments of the people consist of a long loose robe which wraps round the body, and is secured in its position by a leather belt round the wrist. A legging of broadcloth is attached to a shoe made generally of buffaloe hide. No Bhutia ever travels during the minter without protecting his legs and feet against the effects of the sno v by putting on these boots, which are secured by a garter tied under the knee. A cap made of fur or coarse woolen cloth completes the habilment, and the only variation observable is the substitution of a cloth for a woolen robe during the summer months of the year. The diet of the great body of the pennie is the most miserable it is possible to conceive, they are restricted to the refuse of watched crops of unipe wheat and barley, and their food consists chiefly of cakes made from these grains very imperfectly ground. The food of the superior classes consists of the flesh of goats, swine and cuttle, and of rice imported from the Duars. The mode of preparing their food is most martificial and rude, with little attention to cleanlines and still less to the quality of the ment they consume. They are very fond of ten and use it in large quantities. All classes are very much addicted to the use of intoxicating liquors. Their amusements are almost entirely confined to archers and quoits, and their character seldom appears to greater advantage than when engaged in these exercises. The character of the Bhutias, by the nature of their institutions, stands low in the social scale. Every element of deterioration is comprised in their government both secular and spiritua. Their energies are paralysed by the insecurity of property, their morals are degraded and their numbers reduced by the unnatural system of polyandry and the excessive prevalence of monastic institutions

A ASHUHR or CASHUERE—A rune now given to an extensive trict of country, reching from the Fungh on the south and west, to Thibe on the north and east, its extreme length being about 400 miles und its breadth 250 miles. The boundary of this territory on the north and northwest is undefined, or unknown. The country includes the valley of Asakmut propers, 350 to 6000 feet above the sea, Ladwk or Leh, Baltistrin or I tile Thibet, and several provinces of smaller importance, 122 Janmoo Bhadrawar, Gilghit, Aistan, Nosherr Punch, Rukshiu and others, and is almost entirely monitanious. In the soul erri portion, the movintain sides are clothed with forests of cedar and pine but further northwards towards. Thibet, there are large tracts destitute even of a trace of vegetation. The scenery of the mountains is in

180

the highest, degree picturesque. The grandeur and splendour of Kashmir scenery results from the sublimity of the huge enclosing mountains, the beauty of the various gorges, the numerous lakes and fine streams, rendered often more striking by entaracts, the luxuriance and variety of the forest trees and the rich and varied vegetation of the lower ground

The valley of Kashmir is an expansion of part of the valley of the Jhelum, here called the Behat It is an oval plun, 4 500 square miles in area, surrounded on all sides by lofty mountains, whose passes on the north side are not less than 10,000 feet above the sea. The actual plain or hottom of the valley is about seventy imles long and thirty to forty miles wide. and is 5,300 feet above the sea The river Jhelum flows through it in a winding and tranquil, navigable stream, at one time washing the base of the hills on one side and then crossing to the other On the rising of the river in summer, when the snow melts on the mountains, the whole plain would be mundated, but for a system of dykes called bunds placed along the course of the stream The river expands into lakes, one of which, the Wulur's about twenty miles long by nine broad, and another near the city of Srinagar the capital, as long, but of only half the breadth The soil of the villey is most fertile and produces corn of all kinds, fruits, nuts and flowers

The inhabitants of the valley are thiefly Mahomedans of the Sunni class, but in the sur rounding country they exhibit a mixture of the Hindu and the Tartar, the Tartar characteris tica being more marked as we approach the mountains, the dress, customs and even the religion changing gradually with the changes of the physical features of the country The language of the country is Cashnari, derived from the Sanskrit and the Persian

The elimate of the country though subject to extremes of temperature, is on the whole salubrious, and is divided into the four seasons as elsewhere, but the periodical rains of India do not reach so far into the mountains. March and April are somewhat rainy, May and June are dry and fine, July and August are the hottest part of the year and are marked by thunder storms The winter lasts four months, and the ground is then covered with snow Larth quakes are frequent

The most celebrated manufacture of Kashmir is that of shawls, the wool used in their manufacture being of two kinds, one obtained from the tame, the other from the wild gott, wild sheep and other wild animals, the fine down growing next to the skin alone is taken. The demand for these shawls has from various causes greatly fallen off of late years, and is still on the wane. Otto of roses is also made in large quantity and of the finest quality. Fire-arms, saddlers, leather, papier mache, lacquered ware and paper are largely manufictured, and the artisans employ extraordinary pains in their manufacture, producing with their rude tools, work of extaordinary beauty and excellence

The chief towns are Kashmir or Srinagar and Jummoo, the two capitals, Skardo on the upper Indus, Islamabad, Kishtwar, Leh, Astor, Naoshera, Shahabad, Punch, Shapiyon and Gilglit

Golab Sing, the father of the present prince, was put in possession of the whole country by the British in 1846, to whom it had been ceded in 1845 by the Sikhs, who held possession of it since 1819, when they took it from the Afghans who had conquered it in 1752

Numerous passes lead into the Kashmir territory and valley, many of which are practi cable for horses, but none for wheeled carriages, the principal among which may be mentioned, the Nabog pass on the eastern frontier, the Bamhal pass 9700 feet high, on the southern frontier , the Baramulla pass, westwards, or Punch pass 8,500 feet high, on the western frontier, Baramulla pass, southwards, and the Pir Panjal pass, 11,500 feet high, through which the road from Bhimbar goes (See Punjab Province native states)

MANIPUR is a rugged mountainous country south east of Assam, between Assam and the Burman empire It is intersected by two great valleys, one on the west and the other through the centre of the territory In the central valley, rice, pulse, sugar cane and tobacco grow luxuriantly and the tea plant flourishes throughout The soil is very fruitful, but there is little cultivation There are several brine springs in the territory Iron ore is found and there are manufactures of iron and copper, the latter being chiefly worked as bell metal for drinking and other vessels as well as coins The territory is 125 miles in length from north to south, and about 100 miles in breadth. There are no public works, except a road from Cachar to the capital, Imphal. The Manipuris, though Hindus of the Kshattriya or warrior caste are not of Aryan descent, their origin is locally ascribed to the union of two powerful tribes one Naga and the other Kuki, which bad for a long time contended for the possession of the Mampur valleys They are tall, well made and of a fair complexion. In character they are cunning, and treacherous in dealing with those who are not of their own race, but on the other hand they seem to behave with great honests to one another, and their fidelity to their leaders is remarkable, they first became Hindus about a century ago. The country is regarded as neutral territory between British India and Burmah, and its boundaries on the east or Burmah side, are quite unsertled (See Assam Province native states)

AEPAL -This independent style extends from Latitude 26° 25 to 30° 17' N and from Longitude 80° 15 to 83° 15 E, and is bo -ded on the north by Thibet on the cast by sikkin and the British district of Dripeling on h. and the British districts of British Gorikhpur, Chumparum, Mozufferore, Durbhung ibhng ilipur and Purneals on the south west by Oudh, and on the west by the British district of Kumaun. Its length from east to west is about 550 miles, and its breadth about 160 miles, having an area of about 84,00 square miles The principal territorial divisions are Murang, Chaynpur Makmani, Khatang, Nepal proper, Gurkha, Khachi, and Malibum. The territors exhibits great diversity of surface and climate, and corresponding differences of regetable and animal life in its traversed by several considerable streams, and is divided into five parallel zones. The principal rivers which traverse Nepal, are the Karnali, Gandak Trisul Ganga Bori Gandak, Kosi, Gogra and Lagman, most of them rising in the highlands of Thibet. Along its southern border extends the Tarat, a long narrow strip of marshy forest and jungle about twenty miles broad, beyond this is a forest region producing a great variety of valuable timber. Beyond this again the country becomes more hilly and continues to rise in terraces. Still further north, these begin to assume a mountainous character, beyond and above which rises the great Snow; Range, where are found Mount Everest (*9 000 feet), Dhawalagiri (26,860 feet), Gosamthan, Kanchinjunga (28,156 feet), and others, the highest peaks in the world Among the mountains are several inhabited valleys, varying in height from 3 000 to 6 000 feet above the plans of Bengal Of these the valley of Nepal proper is perhaps the largest, being tivelye miles long, and nine miles broad It is bounded on all sides by lofty mountains, and its undulating surface is covered with a rich expanse of cultivated land, watered by numer ous winding streams, and studded with villages and towns. The valley has the appear ance of a take bed, and Hindu records describe it as having been so at some former

The chmate of Nepal, notwithstanding its low latitude, from its great and varying eleva tions above the level of the sea, is characterised by the widest extremes in different parts, and all degrees of temperature, from the cold of Siberra to the burning heat of the African desert, may be experienced in a day or twos' journey Generally, however the chimate resembles in some respects that of southern Europe The seasons we those of Upper India, but the rains commence earlier and set in from the south east. In the Tarat, putrid fever is common, and

fatal from the middle of March to the middle of November

The inneral productions of this country are varied and important Copper and iron mines are worked in the hills and lead, weene and building stone abound. Mines of sulphur are said to be numerous, but little is known about them. The manufactures include utensils of copper, brass and iron, the easting of bells and the fabrication of cutlery, ordnance, guns and swords, also coarse cotton cloth and paper Iron, copper, wory, timber, hides, rice, ginger, wax, honey, card moms and fruits are exported

The revenue is said to be about 43 00 000 Rupees, and the population, about 3,000 000, con sists of Gurkhas, Newars, Bhutius and aboriginal mount in tribes The Gurkhas are the ruling race and are Hindurged Tarrars, the Newtrs, chiefly confined to Nepal proper, are agricultur ists, traders and artizans, they have Chinese features and are also of Tartar origin, the Bhutras This but the higher ranges adjoining Thibet All classes drink spirituous liquors to excess, and most of the domestic servants are slaves. The language spoken by the Gurkhas is a mountain to China every five years

dialect of Hindi called Pributya, the dialect of the Newars is peculiar to themselves, Hindustani, however, is generally understood.

The chief towns are Kutmanda, the capital 4,784ff in elevation and head-quisters of the Medical, having a population of about 50,000 souls, Lahta Patan, Bhitagon, Gurkhi, Janila and Makwapiur This country is ulmost entirely unexplored, owing to the writchful vigilance and pealousy manifested by the ruling race in this respect. The British Government practically has no influence over Neprl, and except the Resident at Kutmanda, no Leighshman cru enter, much more explore the country, and no survey can be executed, nor is the exict nature of the relations between Nepal and China correctly known, thought it is said, a mission with presents proceds.

SIKKIN—A small mount unous tract, between hepal and Bhuttan, which list it resembles in the physical features and its productions are similar. On its northern frontier are some of the highest peaks of the Himralyan chain. It is about sixty six miles in length from non to south, and about fifty two in breadth. The population consists of Murmay, Lepchis, Bhutias and Limbus. The Rajah resides at the cipital, Tamling, from November to May, when he moves to Chiumbi, on the Thibetan side of the range. Sikkim is allowed £to £200 a year by the Government at Limssi, and the allowance from the Brutish Government has been increased to £1,200 a year, on the condition that every facility should be given to trade with Thibet. (See Bengal naive states)

HILL TIPPERAH—A mountainous treet bounded on the north by the British distincts of Sylhet and Cachar, on the east by Burmin, on the south by the British distincts of Chita gong and Chittagong Hill Tracts, and on the west by British Tipperah. It is about 19 miles in length from north to south, and about fifty miles in breadth, and covered with deast bamboo jungle infested with wild animals. The inhibitants are critical kulsis and cultivate rice, cotton Indian corn indigo y tms beans and other vegetables. The soil is exceedingly fertile and the tea plant grows wild. The government is in the hands of a number of chief who levy tribute on their dependents at will, themselves paying an annual tribute to the Maharajah of the State (Ger Bengtl native states).

OCEAN ISLANDS

Near the Malabar, Coromandel and Burmah Coasts

ANDAMAN ISLANDS AND COCOS -A chain of four large and several smalle is lands, of volcame origin, about 200 miles west of the coast of the Tenasserim province of British Burmah, extend ng north and south parallel to the coast, between the 10th and the 15th degrees of north Latitude, and the 9"nd and 94th degrees of east Longitude, of a total length of about 200 miles, and an area of about 2,700 square mdes In this extent, north and south, are in cluded the Island of Preparis, uninhabited, and the Islands of the Cow and Call, which by some are excluded from this group, also the Cocos and Narcondam They consist of a mountain ridge, rising at Saddle Peak to 2,400 feet, the escarped side being towards the east and sloping to the west The main portion is about 140 miles in length, but divided into three parts by very narrow straits Dangerous coral reefs surround the group, and dense tropical forest, coming down to the water's edge covers the greater part of their surface They are peopled by dwarfed and woolly headed savages of the Papuan race, who have no fixed habita tion no pursuit, and no government, smearing themselves with mud and ochre as a protection from insects, and manifesting the most hostile disposition on every attempt to establish intercourse with them There are several excellent harbours, the best of them being Port Blair, where a penal colony for all India was established in 1868, when the whole group was formully annexed and placed under an officer now styled the 'Chief Commissioner and Superintendent of the Andaman and Nicobar islands, in direct correspondence with the Government of Ind 1 These islands are singularly interesting for their zoology several species of large land animals. being apparently confined to them. They have recently yielded a new large sized champanzee

and a new species of hog. The population of the entire group, excluding the convict settle ment, is about 3000, and is first dying out.

The four largest islands of the group are named respectively, North, Middle, South and Luttle Andaman, Middle Andaman, the largest, being about 50 miles long and 25 broad. The last, about thirty miles in length, is separated from the main group of three by a strut called "Duncan Prissige." Port Blair, Soo miles from the main group of three by a strut called "Duncan Prissige." Port Blair, Soo miles from Calcutta, is in the South Andaman, and is reached by a steamer from thence in four days Mount Harriet, at the foot of which Larl Mayo was assessmed, is in the North Andaman. This mountain rises some it, 700 feet about sealevel. Jungle fires it ecommon here, and it is not safe to steep on the lower slopes of the mount, which has a good bungalow at the summit, with a good road to it. The North Andaman is deeply indented by bays, clothed with the most lovely seenery. The chief government buildings and burracks are on Ross isfund, and there are extensive saw mills at Chatham Island. The worst class of convicts are kept at Viper's island, where there is an Andaman wilage. The cultivation has been commenced at a point called Aberdeen in the central island. The Latitude of Port Blair (Chatham Island) is 11'4'1'35' N. Longitude 92' 42'4'4'.

Adjoining the Andriman Islands, between them and the Mergui Archipelago, is Barren Island, a remarkable, active voleano. The whole of this island is a volcanic come whout two miles in diameter as it rises out of the sex, and 1,700 feet high, it is last recorded eruption tool. place in 1792. On the north, tree the two small uninhibited islands called The Cocco, distant from Port Blair 175 miles, the larger of which is six miles long and two miles broad, the smaller, two and a half miles long and a mile broad. The Cocco channel separates them from the Andamans.

NICOBAR ISLANDS - A group of islands situated between the parallels of 6° 40 and 9° 20', and meridians of 93° and 94°, about 150 miles south of the Andrimans and about the same distance from Sumatra. They form two groups, the south group composed of the islands Great and Little Nicobar or Sambelong,-the former about thirty miles long by twelve broad, and the latter fourteen miles long, by ten broad, separated by St. George's channel, about six miles broad-and several smaller islets. The north group, separated from the south by the Sombrero channel, is composed of the islands katchall, Nancours, Camorta (the largest), Trinkut, Terressa, Bompocka, Tillanchong, Chowry, Batti Malve, and the distant Car Nicobar They possess two good harbours, and the southern group is covered to the highest summits with dense forest, while the oorthern is only wooded on the lower slopes of she hills, towards the sea board, the tops being covered with grass. They are inhabited by piratical Malays, who carry on a considerable traffic in cocoanuts, betel nuts, pigs, poultry and Compared with the Andamanese, these people are perfectly civilised, they wear cloth ing, speak a little English and construct their boats and litts with great ingenuity The popula tion is small, about 8,000 The Danes formed a settlement there in 1756, but abandoned all claim to the sovereignty over the islands in 1848 Formal possession was taken of the whole group in the year 1869 by the British, Government, for a convict settlement The climate is unbcalthy Nancowry is distant 225 miles from Port Illair and 390 miles from Rangoon

ACCADIVE ISLANDS—A cluster of corr1 islands Jying about 100 miles off the Malahyt coast of Indit, between the ptrullels of 10° and 13° N and the meridians of 72° and 74°, E., and containing a population of about seven or eight thousand souls. They form twenty Atols or groups, besides numerous small islands or reefs. The largest, named Undarroot, is the most productive, the rest being comparatively birren, pledings I tile else than ecocomist. The natives are a mild and inoffensive rice, living poorly and dwelling in low thatched, stone built hones. The greater portion of these islands were under the uncontrolled management of a Pracess of Canavanore, subject to the payment of an annual tribute to the British Government of \$1,000. This tribute laving fallen into arrent, the whole of the five group of islands in her possession were attached, and are now under British administration. They are included in the district of south Kanava, under the Madras jurisduction. The island of Manava, linder the Madras jurisduction. The island of Manava, linder the State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State State

situated at the foot of, and surrounding the central mountain region. The runfull is consider able, the greatest quantity of run filling about the setting in of the south west monsion, but heavy downquours occur at intervals throughout the year, even the dry servino being interrupted by refreshing showers. March and April are the hottest months of the year

The chief production of the mineral Lingdom is plumbing on which is largely exported. Ones of iron and minguess are pretty generally diffused, and nitre, alum and silt are also oh inned. The island, yields also numerous gems, as methysis rubies, suppliess cat is eyes, grimety, &c. The pearl fishery in the Gulf of Maniar, on the north west coast of Ceylon, was formerly, the most productive in the world, but for many perus past, no pearls have been obtained to speak of The manufacture of salt which is a Comment monopoly, is confined to particular locatives. Hambards and sessit coast, and Publam to the north of Colombo, are the chief salt producing places. Much salt is also made in the atomity of Juffin. The agretation is nich and varied. All the plants and frusts of the main land flourist freely, with others which are not

so well known in India

The chief vegetable productions besides priddy (rece), grown cluefly in the lowlinds, are the coconiut, coffee and cinnamon, which form the mini source of weilth to the island. The coconiut pidm is found mostly in the maniform districts of the west and south. The cinnamon plant is cultivated extensively on the nestern corst, thele in the neighborhood of Colombo. The plantations of coffee are situated mostly upon the mountain slopes, and in the lofty valley of the interior. A considerable amount of European cency, skill and enpirit have of the years been brought to berr upon the production in Ceylon of this useful article of commerce. About 1,000,000 cut of coffee, the produce of the Ceylon plantations, are experted yearly to the Euro

pean and other markets

The forests contain valuable timber trees, as satin wood, jack wood calumnader, ebony
and others. Cotton and sugar cane can be groun, but are not cultivated to any extent
Tobacco is cultivated in the northern parts, where also the black primyra abounds, and is largely
exported. Potatoes and other European expectables are grown in the Analyan country.

The government of Ceylon is entirely separate from that of India. Ceylon is a crown colony, and is administered by a governor appointed by the Queen assisted by an executive council of five members, and a legislative council of five (including, the executive)

For administrative purposes the island is divided into six provinces, i.e., the western, central, southern, ensiern, north western and northern each under the control of a Government Agent. The provinces are ragian subdivided into districts, over each of which an Assistant Government Agent is appointed. There is a supreme, civil and criminal court, and district courts of the chief stations of the several provinces, vie., Colombo, Kundy, Galle, Batticaloa, Kurungalli, and Jaffina or Inflançation.

The means of internal communication are good, the island being traversed in most parts by excellent roads. A railway connects Colombo with the mountain capital Kandy, and has been extended into the coffee producing districts of the Central Province.

The papalition of the island occording to consist taken in 1811 was 2,105.57. The inhibitiuts consist principilly of native Cingh-less in the vestoria, north western, central and southern proxinces, and Tamils in the northern and existers. Besides these, there are in all the large towns, numbers of people of in veil(Luropean and naise) origin who are designated Burghers of Euristian In addition also to the Tamils, who are permanently resident in the country, there is a large flouing population of immigrants from the cost of linhir who are engaged in the coffee cultivation and other radustrial pursuits in Ceylon. Mahomedras of Arah descent are found scrittered throughout the island, engaged chiefly as traders. The Weddas, an aborgant and savage race, inhabit the remote jungles of the interior and subsist much, upon the products of the chase.

The chief towns are Colomi's the capital and sent of Government, situated on the western coast near the month of the Kalan, Guirt population about 10000. Colombo barbour 15 only capible of receiving small vessels. Gill, or Punt d Grills is the cluef town in the southern province, and the port of call for all the mult steamers proceed up to Calcutt, China and Au teatra.

MALDIVE ISLANDS, or, Male lawa (Thousand Isles). A chain of cord islands south of the Laccadines, extending from Latitude of 40.5 to 7.6 N, and nearly on the meridian of 73.0 F, with breadth of about fifty miles. The group is composed of seventicen Atols each of which is fringed with reefs, sometimes extending to the distance of two or three miles, to 40 fithoms in depth. They are richly clothed with wood chiefly palm, and are fettle in fruit and various edible routs, they also produce millet, and abound in coccounts, fowls and all descriptions of fish. The inhibitunts are a timid, inoffensive and equilised race, and cury our considerable trade with Bengal, Ceylon, the Malabur Coast, and S imitta. They are expert analysators and sulors, and have schools for teaching navi, ation on some of the islands, and even make and repair nautical instruments. They are remarkable for the rhospitality and Lindiness to shipwrecked mariners, for which they refuse all pecuniary compensation, and are Mahomedians governed by a Sultra whose title and rank are hereditary. He resides in the island of Male or Mohl, and pays an annual tribute to the British Government in Ceylon. The propultion consists of about 200,000 souls.

CEVEON—This large and beautiful island, "The jewel of the Eastern Sens," hes to the south of the permission of Indus, between the parallels of \$'', 55 and 5'' 51. North Latitude, and the mendians of \$'', 41 and 8'' 54 East Longitude. It is separated from the mun fund by I all. 5 Strait, and the Gulf of Manaar, which at their narrowest part, along what is known as Adums Bridge, are about 18x15 two miles in width. The distance between the most northerly point of the permissial of Jaffita, and I om Culimere on the coast of the karnatik, is only about forty miles. Its greatest length from north to south is about 270 miles, and its greatest width, fort east to west, about 126 fulls. Its area is about 2454 squire miles.

Adam's Bridge, which almost connects Ceylon with the mrun find of Indra, consists of a chain of low coral reefs and sand banks, stretching between the islands of Manar and Paumben.

The central part of the island is mountainnes, consisting of a succession of mountainness ridges with intervening valleys, many of them of considerable elevation. The highest park is that of Pedrotalizalia, which overlooks the plan of Nuwaru Eliya and reaches an elevation of 8 260 feet. The plan itself is up and so of 500 feet above the sea level, and is resorted to as a sautarium by the English rusdents of the low country.

Other injusting heights are Kirrgalpoin 7,810 feet, Totapella 7,720 feet, and Adams peak, an isolated mountain on the south west of the central mountain zone, formerly supposed to be the highest in Ceylon but now ascernance to be only 7,420 feet in height. Between the moin tanous distinct and the sea, there is a broad belt of low country extending around the coast, but narrower in the southern part of the island than in the northern

Numerous rivers and streams the their rise among the mountains in the interior, and flow in all directions to the sea. The largest of these are the Mahmula Ganga, which isses in the mighbourhood of Nuwara Elija, and flows into the Bry of Bengal near Trincountee the Kilany Ganga, which enters the sear lattle to the north of Colombo on the western cost, the hali Ganga, Mahn Oya, and several others Although fee of its invers are available to any great octent for invigation, no country in the world is perhaps so well watered as Ceylon There are no natural lakes, properly so culled in the island, but along different pairs of the existent and western coasts, there are extensive lagoons or brick waters, similar to those on the Mahabar coast of the Madras Presidency.

The climate of Ceylon is peculiarly under the influence of the monsons. The north can monsoon privals from Yorember till Virth or April and the south western from May till October. Variable winds and considerable atmosphere disturbance mark the transition from one monsoon to the other. Activithstanding its low Istuide, the temperature is generally much less oppressive than in India. On the western coast it varies but slightly throughout the year titl the atmosphere in this part of the istand especially during the prevalence of the south Themonsoon, is exceedingly moss. The eastern and northern parts are hotter and direr. The being agof the hill country is temperate and leasthy. The most unfeatibly districts are these

siturted at the foot of and surrounding the central mountain region. The runfall is consider able, the greatest quantity of run fulling about the setting in of the south nest monsoon, but heavy downpours occur at intervals throughout the year, even the day season being interrupted by refreshing showers, March and April are the bottest months of the year.

The chief production of the mineral Lingdom is plumbingo, which is largely exported. Ones of fron and manganese are pretty generally diffused, and intre, alum and salt are also obtained fire island yields also numerous gents, as unethysts robbee, suppliers, eat a cycs, grantes, &c. The pearl fisher; in the Gulf of Manar, on the north west coast of Ceylon, was formerly the most productive in the world, but for many years past, no pearls have been obtained to speal, of The manufacture of salt, which is a Government monopoly, is confined to particular local lines. Humbanioti on the south coast, and Poblam to the ninth of Colombo are the chief salt producing places. Much salt salso made in the vicinity of Juffia. The vegetation is nich and vinted. All the plants and fruits of the main land flourish freely, with others which are not so well known in India.

The chief vegetable productions besides priddy (nee), grown chiefly in the loulands, are the occanity, coffee and cinnamon, which form the mun source of weight to the island. The cocoanit palm is found mostly in the maritime districts of the west and south. The cinnamon plant is cultivated extensively on the western covist, chiefly in the neighborhood of Colombo The plantations of coffee are situated mostly upon the mountain slopes and in the lofty salleys of the interior. A considerable amount of European energy, skill and cipital have of late years been brought to bear upon the prinduction in Colon of this useful article of commerce. About 1,000,000 cut of coffee, the produce of the Ceylon plantations, are exported yearly to the European and other markets.

The forests contun valuable timber trees, as satin wood, jack wood, calamander, ebony and others. Cotton and sugar cane can be grown but are not cultivated to any extent Tobacco is cultivated in the northern parts, where also the black palmyra abounds, and is largely exported. Patatoes and other European vegetables are grown in the kandyan country.

The government of Ceylon is entirely separate from that of India Ceylon is a crown colony, and is administered by a governor appointed by the Queen assisted by an executive council of five members, and a legislative council of five incident incident governor as the executive.

For administrative purposes the island is divided into six provinces $\tau \iota$, the western, central, southern, enstern, north western and northern each under the control of a Government Agent. The provinces are again subdivided into distincts over each of of which an Assistant Government Agent is appointed. There is a supreme, civil and criminal court, and distinct courts of the chief stations of the several provinces, our, Colombo, Landy, Galle, Batticalor, Kurungulla and Jaffia or Jaffiapatatim

The means of internal communication are good, the island being traversed in most parts by excellent roads. A rule sy connects Colombo with the mountain capital Kandij, and has been extended into the coffee producing districts of the Central Province.

The population of the island according to a censist taken in 1871 was 240,287. The inhabitants consist principally of oative Cinghalese in the Vestern, north western, central and southern provinces, and Tamis in the northern and existern. Besides these, there are in all the large tonis, numbers of periple of in vedl Furopean and naturely origin, who are designated Burghers or Purrisans. In addition also to the Tamis who are permanently resident in the country, there is a large floating population of immigrants from the cost of India, who are engaged in the coffee cultivation and other industrial pursuits in C210n. Mahomedians of Arab descent are found scattered throughout the island, engaged chieft, as traders. The Weddas an aborginal and savage race inhabit the remote paogles of the interior and subsist mainly upon the products of the chase.

The chief towns are Colomb's, the capital and seat of Government, situated on the western costs near the mouth of the Nation, Ginga population about 100 000. Colombo harbour is only capible of receiving small vessels. Gill. or P and d. Gall. is the chief town in the southern province, and the port of call for all the anal structure proceeding to Calcutta, China and Australia.

or homewards Transomalise on the north east coast, has a fine harbour, but luttle used, except by the ships of the Royal Navy It was formerly the seat of the Government agency of the eastern province Yafna, or Yaffanpatam, on a peninsula in the extreme north of Ceylon, is the capital of the northern province kandy, the cheft town of the central province, 72 miles from Colombo, was the capital of the island at the time of its conquest by the British. It is situated in a valley at an elevation of ahout 1,700 feet above the sea level, near it is Peridenty, and it is situated in a valley at an elevation of ahout 1,700 feet above the sea level, near it is Peridenty, and it is situated in a valley at an elevation of ahout 1,700 feet above the sea level, near it is Peridenty and Putlam on the western coast Materia and Hambantota on the southern, and Batticaloa the residence of the Government agent of the eastern province, on the east coast. In the interior are Neuvara Lingth, the sanitarium of the island, situated on a plain 6,200 feet above the sea Kurunegalla, the chief town of the north western province, Gampolla, Malalla and Radulla.

The first settlement Europeans in Ceylon was made by the Portuguese in the early par of the 16th century. In the following century the Portuguese, were deprived of their posses sions in the island by the Dutch, whose settlements fell into the hands of the English in 1795, when Ceylon was annexed to the Presidency of Madras. Shortly afterwards in 1801 it was made into a separate collony.

THE STRAITS SETTLEMENTS AND ADEN.

The Straits Settlements, comprising a total area of about 1,600 square miles and containing a population of about 206 000 souls, consist of the stands of Singapore and Penang, of the coast of the Malry Peninsula, together with a considerable tract of country in the neighbourhood of Malacet, on the coast between Singapore and Penang, and a tract of smaller area known as the Wellesley Province, on the same coast and adjoining Penang. They were all formerly regarded as dependences of the Bengal Covernment, but now form a crown colony, with an administration quite independent of that of India. The chief authority is vested in a Governor appointed by the Queen, as in the case of Ceylon, assisted by an executive council and a flegislative council. The several settlements are under the control of Leutenant Covernors, who are also members of the control, executive and legislative control fitted the control of Leutenant Covernors, who are also members of the control, executive and legislative assemblies. The following is a brief account of them.

PENAING, OR PULO PENAING—(Betel not Island) called also Prince of Wales Island, is situated between \$5'\$ 35' and \$5'\$ 30' North Latitude, and in Longitude 100' \$5 L, off the western coast of the Malay pennisula, and separated from the pennisula by a strait about two miles in breadth at its narrowest part. The island is 16 miles long, and from 8 to 12 miles broad, and comprises an area of 165 square miles, with a population of some 40 000 souls. The interior of Penang rises into hills of considerable elevation, nearly 2,500 feet above sea level, running from north to south, which divide the island int too nearly 2,500 feet along the control of the plant country on the castern side of the hills, is the most thickly inhabited part, on this side is situated fort Comwalls.

The climate is relaxing and enervating, owing to the excessive humidity of the atmosphere conjoined with great heat Except in unusually dry years, a month does not pass without more or less rain, and the usual yearly rainfull ringes from 60 109 inches Janu'ry and February are the direct months. There is no cold season to anyigorate the system after the oppressive heaf, for this reason the climate is a trying one to Europeaus. The mornings and nights are cool throughout the year, and fogs, so prevalent on the opposite costs, that of Province Wellesley, do not occur except at the base of the fulls. The southerly wind is considered unhealthy, but is fortunately rare, while the northern is refreshing and pleasant

Fruits are obtained in abundance on the island and pine apples grow wild

Penang was ceded to the British in 1786, by the chief of the adjacent territory of Queddah FOUNCE WILLESLEY—Is a small stip of country about 35 miles in length and 4 in breddth, on the Queddah coast of the Mrhy penusurly, opposite to the island of Penang. ceded to the British in 1820 by the chief of Queddah The chief town of this settlement is George Town The chuncil between the main land and the island of Penang, forms a good natural barbour for shipping Population about 52,000, area 140 square miles

Notwithstanding its closeness to Penang, the climate of the settlement differs muterially in some respects from that of the island. It is not so much subject to the oppressive calms and damp heated atmosphere, and is therefore cooler, and the ur fresher and more invigorating, the maximum heat being 5? The dry season includes December, January, February and March, and less ruin falls on the coast thru on the island of Penang.

MALACCA—Is an extensive district situated on the western coast of the Malay pennisula, between Singapore and Penang. It extends for about 40 miles along the coast, and inland to a distance of about 25 miles, comprising an area of about 1,000 square miles. The coast is barren and rocky, and the interior mountainous, with picturesque valleys covered with dense, but roadless forests containing valiable tumber. The boundaries of the district have not been laid down, little in fact being known of the meiors, or of any other parts, beyond the coast and the borders of the Malacca river, which is navigable during the rany season for small boats for about 15 miles. Several hot springs are found in the interior, distant about 18 miles from the chief town, one of which is at Sabang near port Lisariore, and another in the Naming district. These hot springs are much resorted to by all classes of natives for the curre of various local disease.

The climate is subbrous, and the temperature equable, the thermometer rang in from 27 to 85° throughout the year. From the end of November to the end of February, the prevailing unds are northerly. It usually rains during the whole of December, but fair weather succeeds in January and February. In April the south west monsoon commences, and is succeeded by the north east monsoon in November. The most unhealth, time of the year, is during the Sumatra gales, in August and September. Land winds blow at night throughout the entire year.

The vegetable productions of the country include rice, sago, pepper, cocoanuts and fruits mines are worked in various parts. The inhabitants, numbering about 34,000, are chiefly Malays, Portuguese and Choese. Malacca, the chief town, is picturesquely situated at the entrance of the Malacca river, and is one of the oldest European settlements in the East It was founded by the Portuguese in 1510, and held by them till it was taken by the Dutch in 1642. The Dutch were dispossessed by the English in 1795, but were reinstated in their sover eightly over the territory in 1818. By a treaty, however, concluded with Holland in 1824, Malacca was faulty coded to the English.

SINGAPORE—An island in the strait of Malsoca, situated off the southern extremity of the Malay pennsula. It is separated from the main land by a narrow channel not more than 36 of a mile in width. The island is about 27 miles long, and about 11 miles broad, and comprises an area of about 275 square miles.

The surface of Singapore is beautifully diversified with hills, valleys and plains, the whole being covered with a luxunant vegetation down to the waters edge. The only hills of any considerable elevation is Bukit Tehna, or the tin b ll, near the northern coast and about 1,200 feet in height. The soil is fertile, producing sugar, cotton, coffee, natmegs, pepper and cocounits

Singapore, the chief town and the seat of Government, is situated on the south side of the island, on both banks of a salt water creek, navigable for I gibters and other small craft. It is one of the great emporiums of trade in the East, and possesses a splendid harbour, safe, easily approached and well sheltered. Laittude 1° 17 20° N, Longuide 103° 51 18° E.

The climate of Singapore, though sultry, is not unhealthy. The atmosphere is in general extremely most, moderating the high temperature and agreeing well with European constitutions. At inglic, dense fogs spread over the siland and at particular seasons the dews are heavy. The thermometer seldom rises higher than 86°, or falls below 70°, nor does it vary more than four or five degrees in the 24 hours. The north east monsoon commences about the 17th October, continuing until the setting in of the south west monsoon, about the middle of April. Rain is never very constant, and the average yearly rainfall is about 50 inches.

188 Aden.

The inhibitants, principally Malays and Chinese number from fifty to sixty thousand, the Chinese being the most numerous as well as the roost industrial class

The town was in ancient Malay settlement. It was taken by the British in 1818, and the sovereignty of British was confirmed by a convention with the Dutch in 1825.

ADEN

Aden is a peninsula situated on the south coast of the Province of Yemen, in Arabia Felix, and is located in Latitude 12° 47 North, and Longitude 45° 10 East

The British territory includes the pennisula and extends to a creek named Khor Maksar, about two m les to the northward of the defensive work across the Istimus, and the British and the British and the British are a wider. British and the British are a wider British and the British are a wider.

The adjoining peninsula of Jebel Ihsun, generally called hitle Aden, is within British limits as is also the harbour The area of the land may be approximately stated at about thirty five square miles The population, exclusive of the garrison, was 19,70 in 1872

The inhibited peninsula is about fifteen miles in circumference, of an irregular oral form, for miles in its greater, and three in its lesser diameter, and is connected with the continent by a narrow neck of land, 1330 yards in breadth which is in one place nearly covered by the sea at high spring tides, in fact it would be, were it not for a cruseway constructed for the convenience of the land triffic, and the passage of the Sheikh Othman aqueduct

Aden is a large crater formed of lofty precipious hills the highest peak of which has an above towards the set, throwing our numerous spurs, which form a series of valleys radiating from a common centre. A grip exists opposite the fortified island of Secrah, the post ton of which would induce the belief that the circle was at one time complete, but that some convolution of nuture produced the grip.

Aden West Bay, more generally I nown as Aden Back Bay, formed by the pennsula of Jebel Ishaan on the west, and Jebel Shum Shum on the east, is about eight miles broad from east to west, by four miles from north to south, and is divided into two bays by a spit which runs off half a mile to the southward of the small island of Alayah. The depth of water in the western bry is from three to four fathorins, decreasing gradually towards the sbore, across the entrance, four and a half to five fathoms, and at a distance of two miles out side, ten to twelve fathoms.

There are several islands in the inner buy, the principal, Jazira Sawayih, or Slave Islat d, is 300 feet high, and al nost joined to the main land at low water

The climite during the north east monation, or from October to April, is cool and plet and, purticularly in November, December and January. Diring the remainder of the year, hot study winds, known as *hamad,* or north, indicating the direction from which they come, prevail within the criter, but on the western or Steamer Point sade, the breezes coming directly off the sex, are fairly cool, and that locality is accordingly much prefricted by European readents. The months of May and September are especially disagrecable, those being the period of the change of the monations, when the wind almost ent rely ecases, and the air is close and oppressive towards morning a cool and refreshing land breeze generally springs up. Aden is not usually considered by med cal men to be an unleathly station, but it is a well ascertimed fact, that long residence impairs the faculties and undermines the constitution of Europeans, and even natures of India suffer from the effects of too prolonged at abode in the settlement.

The town and part of the military cantonment are within the crater, and consequently are surrounded on all sides by hills, save on the eastern side, where a gap exists

The supply of water which is now plentiful in the settlement, is derived from four sources, ver, wells aqueducts, tanks and reservoirs, and condensers. The annual rainfull at Adea is very limited, seldom exceeding six or seven inches, as long as the tanks have water in them, the three condensers on the settlement are not worked, from these water is obtainable on an emrc, ency to the extent of 46,600 gallons per them, should the supply, in the tanks and

wells fall short at any time. There are, in addition, several condensers belonging to private companies who sell water to the public

The gurnson and camp followers number 3,000. Europeans live in Aden in exactly the same minner as in India, but the actual expenditure incurred, is about 20 per cent in excess of what it would be in Bombay, and consequently still greater than what would be required in the modissil. Wines, spirits, beer and European stores are somewhat cheaper than in India, owing to Aden being a free port, but unless private individuals import their own requirements, such articles can only be purchased from the local shop keepers at about India prices

The settlement is presided over by an officer who is styled Political Rend m; and who resides at Steamer Point, but bis office is in the criter. The Resident has two assistants and there is a cantonithan imagistrate, who is also eroffico, an assistant. These officers perform all the civil revenue, judicial and ministerial duties of the syttlement. Aden is politically subject to the Government of Bombay, and is considered for legal purposes as put of British India.

Since its capture in 1839 by the British, great attention has been paid to the fortifying of Aden, and all the latest improvements, in engineering and artillery, have been applied to render it almost imprepable

The port of Aden is in charge of a Conservator, and is regulated by the Indian Ports Act Since the opening of the Suez Canal, the visits of ships of foreign navies are becoming more frequent yearly, necessitating a vessel of war of some size being always stationed at Aden

The Arab tribes we have to deal with at Aden are the following, vis -

The Ab lalt tribe, inhabiting a district lying in a north north vesterly direction from Aden, called Lahig, about thirty three miles long and eight broad. Al Haunch, the capital, where the Sultan resides, is situated about twenty one miles from the Barrier Gate. The population of this district is about 15 000. The Abdalis are the most civilised but least warlike of all the tribes in south western Arabia.

The Fadhli tribe, inhabiting two large districts, with a sea board of too miles, extending eastward from the boundary of the Abdali Shograh, their chief sea port, is situated 60 or 70 miles from Aden The Fadhlis are proud, wartile and independent, possessing in a high

70 miles from Aden The Faddhis are proud, warkle and independent, possessing in a high degree the virtues and vices of the true Bedawin. Their number of fighting men is about 6,700. The Akrabi tribe, inhibiting a district, the coast line of which stretches from Bir Ahman.

to Ras Amran This people have a high reputation for courage

There are other tribes, but as they do not reside in the immediate vicinity of Aden, it

is finecessary to refer to them

The language of the place is Arabic, but other Asiatic tongues, as Hindustani, Persian, Gujarati, Sindi, &c., as well as several European languages, are spoken and understood

THE ISLAND OF PERIM

Attached to the Government of Aden is the island of Perm known among the Arabis as $May \omega m$. It is situated in the Strust of Babel Mandels, a rule and a half from the Arabian, and eleven miles from the African coast. It has an excellent and capacious harbour, about a mile and a half in length, half a rule to breadth and with a varying depth of from four to six fitthoms. The highest point of the island is 245 feet above the level of the sea. The island was first taken possession of by the East India Company in 1799 hat was then deemed untenable as a military position it was re-occupied in the beginning of 1857, a light house erected, and quirters but It for a detrichment of nature infantry, fifty strong, who now garrison the place under the command of a British officer. This detachment is refleved every two months

All endeavours to procure water have failed, and but a scanty supply is procurable from the adjacent coasts, a condensing apparatus now supplies this want as at Aden

The only other British possessions in the vicinity of Arabia are, the Missok Islands in the Bay of Tijurra, the island of Ebjed near Zalia, and the Kopera Aloria Islands on the Valira coast of Arabi They are only va suble for the guano deposits which are found upon them

GLOSSARY OF INDIAN TERRITORIAL DESIGNATIONS

- ARAKAN —A tract of country about 300 miles in length, sharted to the cast of the Bay of Bengal, between the parallels of 18° and 21° 30 N, and mendians of 92° and 93° L, under the Bruish Burmah jurisdiction, comprising the districts of Akyab, North ern Arakan, Kyoukhpyoo and Sundoway —(See p 87 and 88)
- BAGHELKHAND—The country of the Bighelis, embracing the native states of Reigh, Algode, Maihar, Sohawal and Koti, under the Central India Agency—(See p. 112)
- BARI DOAB -The plan country between the Sutley and Ravi, and the Bias and Ravi rivers Do to signifies two waters (See p. 23)
- BEHAR A province under the Hengal jurisdiction, comprising the divisions of Patria and Bhagalpur (See p 51 52 and 55)
- BENGAL—A Province under the Bengal jurisdiction comprising the Burdwan, Rushahye and Cooch Behar, and Dacca divisions (See p. 47.48.49.50 and 55.)

- Bit VTIANA —So called from having been the possession of the Bhattis of Rajput descent A tract comprised within the British district of Sirsa and the northern portion of the Bickaneer state between the parallells of 20° 12 and 30° 30°, and meridians of 73° 0 and 75° 20
- BUYDELKHAYD—The country of the Bundels A tract bounded on the west and north west by the Gwaltor state on the north east by the Juman River which separates the from the British districts of Etawah, Cwappore, Friehpur and Alithabad, on the east by Baghelkhand, and on the south by the British districts of Sauger, Damoh and Jubulipore—Crep 11: 144 and 115)
- Bit NEAR.—A belt of witerless jungle, formed of boulders and the debns of the lower ranges of the Himilyas, extending from four to fourteen miles in brendth, and lying bet ween the Tarai and the sub Himallyas—(See p 36)
- BABRIAWAR —A district in the peninsula of Kattywar, province of Gijarat, named from the Babria tribe of cooles who inhabit it, lying to the west of the Goleswar district
- BHAKAR.—A tract of rugged hill country near Mount Abu, to the cast of the Sirobee state, inhabited by Grassias, a half blood tribe between Bhils and Ruputs—(See p. 105)
- CARNATIC -See Kurnatik
 - CHHATTISGARH—The south entern division of the Central Provinces, comprising the districts of Raipur, Bilispur and Sambalpur, between the particles of 85, 10 and 85, 15, M, and mendrans of 10 50 and 23 10 E, hounded on the north by Reash new estate, and province Chots Asgoore of the Bengal jurisdiction, on the south by Bastar rative state, and on the west by the districts of Chanda, Bhandura, Brughty, Soom and Mandia of the Central Provinces—(See p. 76)

 CHOTA NAGPORE—A province under the Bengal jurisdiction comprising the districts of
- Hunningh, Loharduggr, Singhihoom, and Maniboom, and the Garibu anties of Chung Bukhu, Koru, Sargua, Jashpur, Udaipur Gangpur and Bonat—(56 p 53 and 55)
- CHAPPAN —A stretch of rugged hill country and jungle in the south east corner of the Oodey pore strue, Rajputana —(See p. 105)
- CHAUMELA.—A strip of country in the extreme south east corner of Rajputana.—(See p 105)
- CIRCARS—See Northern Circars

 DECCAN—In its usual acceptation implies the tract of country, in Southern India situated between the Norbudda and Aistna rivers. Properly speaking houseser it includes the whole of the territory lying south of the Umillian mountains, which separate

it from Hindustan on the north, and between the Eastern and Western Ghais

- DERMAN, the borter—The country stretching between the Sulman ringe of hills and the Indus, and so called from the three towns, Deri Ismal Khan, Den Ghani Khan and Dera Fateh Khan Iying within it.—(See p. 221)
- DUAYS —Passes leading from the Bhutan manatage into the Darrang and Kamrup districts of Assim, including the country on the British border to their south. There are eleven bordering on kooch Behar and British territory, between the river. Tista and Monas, fix on the north frontier of the Kamrup district, and two on that of the Darrang district.
- GODWAR.—A small trust of hilly country lying between Sirohee native state and Merwars, on the boundary between the Oodeypore and Jodhpore states in Kaiputana.
- GOHELWAR.—A district in the pennisula of Latityar, province Guyrat, numed from the Gobel Rajputs by whom it is principally peopled, lying south of the Ahmedibad district, and on the cust of districts Bublinvar and Kattywar
- GONDWANA—Or the land of the Gond race, an extensive, imperfectly defined hilly truct of Control India, it may honever be considered as lying between Latitudes 19 50 and 4 50 N. and Longitudes 77 40 and 67 50 E. This name is now regarded
- GUJARAT—An extensive province of the Bombry Presidency, comprehending within its limits to pennisula of hatiyan; the whole termiores of the Gukhwar and of his tributaines, together with the petty independent states, in Mah kanta ind Rewa kanta, and bounded on the north by the Gulf of Cuch and the territories of Mallan, Maywar and Meywar of the Rajputain Agency, on the south by the Gulf of Cunhay and the I mish districts of khandels and Swat of the Bombry Presidency on the east by the Khandelsh district, and Maha of the Central India Agency, and on the west by the Arabian Sea—Grep 143, 148 and 144.)
- GARHWAL, BRITISH AND N VITE—A tree of country in the Humbyl 15, bounded on the north by the name state of Bashahr of the Ponyla, and Hundes or south weitern Thiet, on the easily the tilterich district of Aunitron on the south by Kohikhwal, and on the cast by the Hursth of the Ponyla, and in the Aunitron of Tahr, the British portion as the district of Garba 41 in the Aunitain division of the North Western Proximence—4/Sep 1 and 16.1
- HALLAY OR HALLAWAR t district in the peninsula of Katty air province Gujarat, named from the Halla tribe of Rappus who thababit it. It is bounded on the north by the Gulf of Cutch on the north est by the district of Macha Kanan and Juliusary on the east by the district of Kattywar on the south by the district of Kattywar and Soruth, and on the west by the district of Okhmandal
- HATAOTI-A trict comprised within the native states of Loondee, Lotah and Jirdlawar in the Rajputana Agency -(See p. 103)
- HARRIAN1 —A tract comprised in the Bruish district of Hissar, and the northern portion of the Bickaneer streething between Latatude 28° 33 and 30° 0 N, and Longitude 752° 0 and 76° 22° L
- HUNDES OR NARL KHORSUM -The south western portion of Thibet lying to the north of Gribinal and Kumaun
- JAINTIA HILLS—A h lly truct adjoining the Lhrsi hills on the east, and comprised in the district named Khasi and Jaintia hills.—(See p. 65 and 68)
- JAUNSAR BAWAR —A tract comprising the northern sub division of district Dehra Dun, in the North Western Provinces —(5ce p. 36)
- JACH OR CHYL DOAR.—The plain country between the Jhelum and Chenab rivers of the Luniab (See p. 23)
- JHALLAN ID—A district in the pennsoh of hattywir, province Guyard, nuned from the Jhill tribe of Rapputs who principally people. If lettends over the north-eastern part if the pennsola on the south and south west are the districts of hattywar and Hallar, and on the sets to the district of Machakanta, area 2014 square in legitumous Doug—The plus country between the Buss and Sudig rivers of the Panjab—(Sc.
- p 23)
 NAMARA —A trict stretching along the western coast of India from the Portuguese territor, of Goa down to the district of Mulabar. It is divided into north and south, the Opmer portion naming it delistrated Manara to the Dombary Presidercy, the fail or

Glossary of Indian Territorial Designations,—Continued.

being the district of the same name in the Madras Presidency - (See p 122 and 145)

- KARNATIC.-A division of Southern India confined to the eastern side of the Madras Presi dency. The limits were probably at no time very accurately or clearly defined.
- It is said to commence at the southern limit of the Kistna district, and to extend down to Cape Comorin KATTYWAR -The name of a peninsula comprehended in the province of Gujarat, and lying to the west. On the north it is bounded by the Gulf of Cutch, on the west and south
- by the Arabian Sea, and on the east by the Gulf of Cambay (See p 153) KHASI HILLS—A tract of hilly country lying between the Assam districts of Kamrup and Sylbet, and between the Garo and Juntur hills. This tract and the Jaintia hills comprise a district in Assam—(See p 65 and 68)
- KONKAN -A narrow truct in the Presidency of Bombay, comprised in the districts of Thana, Kolaby and Rytnagiri, and stretching along the coast from the native state of Sanantware, on the frontier of Goa, to the Daman river on the north, a length of about 330 miles, with a breadth varying from 25 to 50 miles - (See p 154)
- MACHU KANTA -A district in the peninsula of Kattywar, province of Gijarat, named from the river Machu which flows through its centre to the Gulf of Cutch, lying to the west of the Ihallawad district
- MAHI KANTI -A tract lying on the north east of the province of Gujarat, extending from the Ahmedabad district to the Rajputana frontier - (See p 153) MALABAR -A truct naming a district of the Madras Presidency, bounded on the north by
- Kanara and Coorg, on the east by Mysore native state and district Coimbatore, on the south by Cochin native state, and on the west by the sea - (See p 122) MALLANI -A tract within the territory of the Jodhpore native state, lying on the south west of
- Rajputana, bounded on the north west by Jeysulmere native state, on the east and south by Marwar, and on the west by Sind -(See p 102 and 103) MILWA -A tract in Central India, bounded on the west by the Aravalli range, on the south by
- the Vindhya chain of hills, on the east by Bundelkhand, and included in the south ern portions of the Rajputana and Central India Agencies - (Seep 112 and 115) MARWAR -Another name for Jodhpore native state in the Rajputana Agency - (See P

102)

- the Satpuras, which enclose it in the south. The British portion is the district of that name in the Nerbudda division of the Central Provinces—(See p. 75)

 NORTHERN CIRCARS—An antiquited division in the Madias Presidency between Latitude 15 to and 20 17 N., and Longitude 70 12 and 80 20 11, about 20 miles in length.
- NORTHERN CIRCARS—An antiquited division of the Madras Presidency between Latitude 15 and 20 17 N, and Longitude 79 12 and 85, 20 E, about 470 miles in length The Northern Circars formerly comprised the tracts of Chicacole Rajahmundry Ellore Cond-tylly and Gouloot, the whole of which are now included in the lastra, Godda an, Vurigapatam and Ganjam districts of the Madras Presidency—(See p 110)
- OKHMANDAL—A small district in the peninsula of Kattywar, province Gujarat, at the north west angle of the peninsula
- ORISSA —A province under the Bengal jurisdiction, comprising the Orissa division, consisting of the districts of Balvsore, Cottack and Poorce, and nineteen tributary states (See p 53 54 and 55)
- PATAR -A remarkable plateau on the eastern side of Rajputana (See p 105)
- RECHNA DOAR.—The plain country lying between the Ravi and Chenab rivers of the Punjab —
 (Seep 23)
- REWA KANTA—A tract lying along the north east of the Gujarat province, of the Bombay Presidency, south of Mahikanta, and between the rivers Tapti and Mahi—(Sze p 153)
- ROHLERAND—An extensive tract, mostly plan, bounded on the west and south by the truer oranges, on the south east by Oudh, on the north cast by Lumanu and Nepul native state and on the north by British Garhwal, comprised within it edistricts of Bijnor, Moradabad Bareithi, Jiudanu Shayhanpur and the Tara under the title of the Rohlikhand division Rohlikhand was eeded to the British by the Nawab of Oudh in 180-1(Sep 30)
- SHAIRAWATE—A tract comprising the northern portion of the Jeypore native state, in Raj putana —(See p too and too)

 SIND. (from Sindiu. a collection of waters)—The northern province of the Bombay Presiden
- cy, bounded by the Rann of Cutch on the south, by Rapputana on the east, by the Punjab on the north east, by Baluchistan on the north and west, and by the Arthuan Sea on the south west —(See p 46 and 154)
- SIND SAGAR DOAR -The plain country between the Indus and the Chenab rivers on the south and the Indus and the Jhelum rivers on the north (See p 23)
- SIRIUND —An extensive tract of the Punjab jurisd cition, stretching enst and west from the extreme north east corner of the Brhawilger native state to the Umbally distret, and north and south from the river Sutley to Harriana, about 220 miles in length from enst to west, and too in breadth from north to south.
- SORATH —A district in the peninsula of kattywar, province Gujarat, Bombay Presidency, the most southern of the pen issula bounded by Hallar district on the north, by Babriawar on the east, and by kattywar on the north east
- SUNDARBANS—The southern portion of the Delta of the Ganges in the Bengal jurisdiction. This trict may be described as a crowled cluster of densely wooded smill marsby islands separated by narrow channels and formed by the deposition of the enor mous quantity of earth swept down by the Ganges. This illuvial archipolity is about 700 miles in length and about 75 miles in breadth. An area of 5,340 square miles, is almost toilly irrectumable—(See p 46 and 56).
- TARAI—A long step of meraby jungle, stretching along the foot of the sub Himelayan ranges and between them and the northern plans of India. A deadly mutars arises from the whole region rendering it almost uninhabitable by man, and danger outs to traverse between the months of April and October—(Σερ p. 3, 5 and 18).
- TENASSERIM—The southern portion of the British Burniah province stretching along the eastern coast of the Bay of Bengal, and embracing the districts of Amherst, Tavoy and Mergut, to kength about 500 miles—(Seep 26 and 88)
- THAR, THE—The great snady desert of north western india extending from the Aravallis to the Sutiq and the Indias rivers and from the left bank, of the lower Indias in Sind to the north existern limit of Rapputina a length of some soo miles. This desert is called by the natives Thar Thalf, or Dhaf in this desert is the called by the natives Thar Thalf, or Dhaf in this degraphy it is termed marus thults, or the region of death—(Sce p 104)

RELIGIONS AND PEOPLES OF INDIA.

BRIDE GENERAL DESCRIPTION

ABOUT three fourths of the vist population of India comprising upwards of two hundred and forty two millions, (See p 9 and to,) are Handus professing the religion of Brahma in its many different forms, and although sub-divided into many sects, are more or less exclusively devoted to that form of worship

The doctrines of the more ancient religion of the Hindus are continued in the Velar, or four sacred books each composed of two parts, one comprising forms of worship, the other, moral and religious instruction. These Vedas are of very high antiquity, being supposed to date from the fourteenth century before the Christian era. Their primary doctrine teaches Thairm, or the worship of a self existent Supreme Being, to whom all are subject, "There is in truth but one Deity, the Supreme Spirit, the Lord of the Universe, whose work is the universe.

The Puranas, the other sacred books of the Handus, as well as the Institutes of Menu, are compositions of later date, and are the exponents of modern Brahminism The Puranas are eighteen in number, and were mostly written in support of the doctrines of particular sects, and the supremacy of the priesthood. They are for the most part legendary in their character The pure Theism of the ancient Hindu faith as defined in the Vedas, has become developed into an elaborate polytheistic system, the most gigantic and degrading principle, Vishnu, 'he preserving principle, and Siva, the destroying principle, being regarded as a Triune manifestation of the divinity, and with other personified attributes and energies, has ing been made the objects of worship in an infinite variety of forms. Subordinate to these are many lesser divinities regarded as goddesses there is a goddess of learning and eloquence (Saraswati), a goddess of wealth (Lakshmi), the goddesses Pariati, Bhou ani or Durg i, names representing the acting powers of earl and destruction, as well as others. Of the Hindu sects, the most influential and numerous are the followers of Seca and Lishna prevails mostly among the members of the upper classes, especially in My sore and the Maratha provinces, while that of Vishnu prevuls among the Hindus of Bengal, the North Western Provinces and Oudh A large portion of the sacred writings of the Hindus is occupied with the history of the various incarnations (at alars) of this latter deity and Vishnu are distinguished by certain colored marks on the forehead, those of the Siva sect being horizontal, while those of the Vishnusites are perpendicular

The leading dogmas of the Brahmuncal faith are, the supremacy of the priesthood, and metempsychosis or the transmigration of the soul after death. Pilgrimages to remote rid holy places, and penances and offerings to the priesthood, are held in high esteem; the avoid ance of impure or forbidden food, especially the flesh of the cow or bull, which is considered sacred, and the preservation of caste, are among the most important moral duties enjoined on the Hindiu. In no country does the religion of the inhabitants appear so prominent in every cat as in Hindiustan. It pervades the entire frame of evil society, and mixes itself up with every concern of life, public, private or domestic. The institution of caste, as characteristic of Hindia society throughout nearly the whole country, by which all classes remun, from futher to son, occupying the sume pursuits and positions in life, is mowhere pursued to such (often arbitrary and merciless) rumifications as in India. Purity of caste being incapable of acquiring, and therefore to be preserved at all hazards and under the most trying circumstances.

In the outset the Hindus were disided into four great classes or castes, the Brahamst or saccrdotal class, the Kickeryat, warrors and rulers, Vausyat, capitalists, trades and farmers, and Saidrat, laborers, arturans, and mucual servants. These great disassons though here ditary, impassable and indefeasible, ice now, however, purely theoretical, there being practically an immense number of virous castes, whose members intermary only among themselves, and obstina from associating with those of other castes. Every caste and sub disiston of a caste, forming a little distinct society in the general community

The Brahmans and Kshelriyas are regarded as greatly superior to the rest of the population, and are distinguished by wearing a certain cord termed 'the thread' The follow

ung passiges denote what obsequeous reverence the Brahmans claim for their order 'A Brithman, whether learned or ignorant, is a powerful divinity' (Inst of Menn) 'Those excellent Brihmans who are guilty of such cimes as theft, are offenders aguinst themselves, not others'—'Brihmans are masters of the Kshetiryas, Vasshyas and Sudnas, they are insters of one unother, and to be worshipped, being carthly gods' (Padua Purara') 'Whit ever evists in the universe is all in effect, though not in form, the weitht of the Brahman, since the Brihman is entitled to it ill, by his primogenture and eminence of birth'—'The Brahman eats but his own food, wears but his own apparel, and bestows but his own in alms He alone deserves to possess the whole earth' (Itsal')

The military profession is held to be nearly as honorable as the sacerdotal, and numerous Bruhmuns are found filling its ranks, while the mercantile classes are regarded with much less consideration

The spread of education is gradually undermining the influence of caste prejudices

Other forms of religion are those of the Buddhists, Jains, Sikhs and Mahomedans, the Issunacessary to refer to, beyond stating, that they consist cluefly of two sects, the Shanks and the Shanks. The former regarding All as the successor of Mahomet, and equal to him in dignity, and who reject tradition, the latter insisting on the supremicy of Mahomet over all cretted beings, and acknowledging tradition. The Michomedan religion was founded in Arabia, and introduced into India by the Arabis in the sixth and see eith centuries.

Bu lillusm, which now prevails over all Central and Eastern Asia, appears to have original ed, and at one time to have extensively prevailed in Hindustan It is believed that Buddhism, and Brahmanism are but two offsets from a primitive religion, which once prevaled over the whole of Asia beyond the Indus Being opposed to the polytheism of the Brahmans. Buddhishr became subjected to considerable persecution at their hands, and is now all but extinct in India, it is, however, professed by a large number of the inhabitants of Arskan, Burmah, Bligton Nepal and the island of Cevion Though almost extinguished in Hindustan, the religion of Buddha, the 'wise', the 'enlightened,' is still, numerically speaking, the prevailing religion of the world It has now been in existence for nearly 2,500 years, and its adherents are estimated at upwards of 400 millions, or more than a fourth of the human race The Buddhists, while they reject the multitudinous pantheon of the Hindus, admit an indefinite number of increna tions of Buddh, who is supposed to animate in succession the bodies of their chief Lamis or priests. They believe in the eternity of muter, and the supremacy of intelligence as a property of matter They deny the authority of the sacred books of the Hindus, do not acknowledge caste, and have no respect for fire, but have great regard for animal life, and live much in monasteries Buddhism is practically a system of Athersm and Athelism The Nirvana, to which the Buddhist aspires, is absolute NOTHING Buddhas are beings (of whom there may he many), who have raised themselves by austerities of all kinds to a state of apathy, and then have evolved certain doctrines and sacred books. The founder of Buddhism was Sakya Muns or Gotama, who died 543 B C. The sacred books of the Buddhists are called TRI PITAKA, (three caskets.)

The religion of the Jams and Sikks is briefly described in the following alphabetical list of the principal classes of the different peoples and tribes inhabiting India

There are muked differences in appearance among the native rices in different parts of the country, and these depend parity on race, and bruth, no doubt, on climate. The less accessible parts are still inhabited by people bardly removed from the lowest forms of swage life, while the coast, the pluns, and great mer aslleys have been the seat of evulution from time immemonal. The inhabitions of Northern, North Western and Central India, generally, are handsome, till, of fair completion, well developed, honest, manly and of more than average intellect. They make excellent soldiers and are ingenious in certain nothing-tures and hundierities. The same general description applies, with some marked exceptions, to the inhabitious of the mountain districts in other prints of India, though they are less tail. On the other hind, the people dwelling in the lower provinces of Bengal, in the river villeys near the months of streams, and in the Decean, are lower in stature, darker in colour, less developed physically, less of the streams and the colour of the streams and the colour of the stream is the stream of the stream in the colour of the stream is the stream of the stream in the stream in the stream is the stream in the stream in the stream in the stream is the stream in the stream in the stream in the stream is the stream in the stream in the stream in the stream is the stream in the stream in the stream in the stream is the stream in the stream in the stream in the stream is the stream in the stream in the stream in the stream in the stream is the stream in the stream in the stream in the stream in the stream in the stream in the stream is the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the stream in the str

sincere and bonest, and less favourable specimens of the human family. All the races, however, are simple in their habits, active, capable of enduring much fatigue, and much attached to their homes. Of the different races, the Bengulis, though weak in body, and wanting in moral courage, are, intellectually, the most capable of considerable and rapid advancement in the · ordinary arts of civilized life, and there is a certain amount of cunning natural to them, which makes up for their timidity

List of a few of the principal Indian Peoples and Tribes

ABARS -A wild mountain tribe occupying a tract of country to the north of Upper

Assum The centre of the tract is about Latitude 28° 10 N, and Longitude 95" 20' E ALHAS -A wild tribe inhabiting the mountainous country, situated on the northern boundary of Assam, and the eastern boundary of Bhutan The centre of the tract is about

Latitude 27" IO N, and Longitude 9" 40' E ARABS -In Bombay chiefly, generally traders from the Red Sea and Persian Gulf A great number are also to be found in the Nizam's territory or Hyderabad, who are permanent ly settled there, and are employed chiefly as mercenanes in the military forces of that state.

AR MENIANS - Chiefly refugees from former Persian or Turkish persecution, and gener ally merchants and tradesmen settled in the principal towns and cities of India

BADAKS or BHADAKS -Hereditary thickes inhabiting the forests of Northern Oudh, and the hanks of the Chambal river They lead a nomadic life and have few Hindu prejudices

BAJIKARS-The gipseys and jugglers of India, chiefly met with in Upper India BANIAS -The Hindu trading and hanking class, the most influential as well as the

most despised of natives, quiet and well behaved, but fond of litigation BANJARAS or LADANAS -The carriers of the country, chiefly of grain, they own

immense herds of hullocks and live generally in the open the railways have reduced this class considerably, and their existence in the future is only a question of time. Their dress and usages are peculiar

BANRAS - Tribes separated from the Newars of Nepal, and following many of the customs of the Bhutias

BHATS-Wandering ministrels found in Gujarat and Upper India, and exercising much influence over the population, but especially over the Rasputs

BHATTIS -A predatory tribe of Rajput descent inhabiting Bhattiana and the desert

in Rapputana, from the Sirsa and Hissar districts up to the Indus

BHILS -Rude native tribes supposed to be the aboriginal people of Central India and Gujarat, now inhabiting the mountainous parts of Gujarat, Khandesh and Malwa, and the bills along the Nerbudda and Tapti rivers

BORAS-A trading sect of Mahomedans largely scattered over Gujarat and the Dec cun, of supposed Arab descent, and resembling Jews in features and character. They are in general, industrious, wealthy, and influential members of society

CHAPANS -A race of carners of beavy goods, and grain, also cattle dealers, they are

sometimes hired by travellers as an escort in the wilder parts of India

COLLS - Aboriginal tribes inhabiting the northern part of Orissa. They are also called Hos and are semi barharous, but bospitable, and show a love of truth, honesty and a willing

ness to oblige COOLIS-The aboriginal tribes of Gujarat and Western India. A manly and hard working people, but ferocious, much addicted to drunkenness, and once formidable rubbers-

DAUDPUTRAS (or sons of David) -A fur and handsome Mahomedan race, number ing about 50,000 They crossed the Indus from Shikarpur in the reign of Aurungrebe, and took forcible possession of the country which they now occupy on the left bank of the Sutley called Bahawalpur

DHEA WARS -The husbandmen and fishers of the western districts of Nepal. GARANGS -A Buddhist race, leading a pastoral life in Nepal, and shifting their abodes between the mountains and valleys in summer and winter, some are miners and traders.

GAROS—A purely agricultural people, the inhabitants of the Garo Hills distinct of Assam, similar to the Mechis or Cacharis. A robust, active, strong and muscular race, capable of enduring a great amount of evertion and fatigue, remarkable for their ugliness and scarcity of beard, generally truthful, easily exeruble, and then resengeful, cruel and blood thrist.

GONDS —The aboriginal inhibitinits of a part of Central India formerly called Gond wana, they are blood thirsty, cruel and revengeful, but an athletic and well looking race,

speaking a language radically different from Sanscrit

GUJARS-The inhabitants and bushandmen of Gujarat, as well as many parts of Northern India, and the Punjah

GURKHAS—A hardy, brave, active and enterprising people, dominant in Neprland in the hill countries westward. They are of short stature, but make excellent soldiers, and are descendants of the Hindu refugees from Mahomedan invasion, who mingled with the Tratar

and Chinese people of the country

JAIACS or JAINAS—A religious sect dating from the sixth century, numerous in Gujarat, Khandesh, Rajputana and Kanara, professing the doctives, and speposed to be an offsboot, of the Buddhists, but admitting caste,—which Buddhism rejects,—and the wurship of many of the Hindu detites in addition to their own saints, twenty four in number, called Trithankaras, et those, who by acteric fractices, have covered the ocean of human existence, whom they regard as superior to the gods. Their prests are of all castes. The Jains base clause been a learned model. But I succeed Buddhist was Data at these this castes.

whom they regard as superior to the gods. Their presss are of an cisies. The Jains base always been a learned people. Both Jains and Buddhists use Pali as their sacred language.

7ART71.S—A fine robust and warlike race, but proud, cruel and dissipated, they are

the ruling class in Cutch

7.4TS —A turbulent and very ancient race who probably migrated originally from Turkestan,
occupying a great part of the North Western Provinces and Rasputana. They still retain the

warlike and nomadic habits of the people of that region

YEIVS — Numerous in Western India, found also in Calcutta, and Rangoon Those of

Bombay call themselves Bani Israel, and are probably descendants of the ten tribes, and

of higher consideration than the others Al Cochin they are of two denominations, the Black

Jews of very ancient date, and the White Jews, more recent, who regard the others as

slates

KATARIS or KATADIS—An nacent race of Northern Konl. in, Bombay Presidency,
living on the outskirts of the villages, and held in abhorrence by the higher eastes of Hindus

KATTTIS Natures of the pennisula of Kattywar in Guparta, considered one of the royal

races of India, but now greatly reduced. They are half civilised, and were once tobbers and

pirates KHASIAS—The inhabitants of the Khasia and Jaintin Hills district of Assum A short stout and athletic race, affable, gentle and cheerful in disposition, industrious, and capable of

agriculture. An intentigent rate, robust and industrial, daring 1. Stong 1990 to indictive, and addicted to drunkenness.

KOTARS—A peculiar but industrious race, exercising certain handicrafts, and having no

easte prejudices. Found in the Nilgiri district."

KUNDIS -An agricultural tribe inhabiting the south and midland parts of Gujarat

KUR'IIS —A class of cultivators found in the North Western Provinces, well known for their industrious and peaceful habits

MARATHAS—A numerous and powerful race, bnkl, active and industrious, who originally updated the north western part of the Deccent, hau conquered a great part of Northern and Central India, confined now more particularly to the central and southern part of the Bombay Presidency, of which they form the majority of the population. Their power was broken by Ahmudshah, Abdrilli, king of Kabul, at the hattle of Pamput in 1761.

MARAVAS -A people of considerable antiquity, inhabiting a tract of country on the extreme southern coast near Cape Comorin

MARWARIS -The trading class of Jodhpore or Marwar, found throughout India.

MECHIS, or CACHARIS -A tribe widely scattered all over north eastern Bengal and throughout Assam, called Mechas in the former, and Cacharism the latter Of migratory habits, able bodied and well behaved, honest and trustworthy They make good soldiers and form a strong element in the military and police of those parts, and have no caste prejudices.

MERS-The inhabitants of the district called Merwara, in the Aravilli Hills of Raj putana (See page 101) They are descendants of one of the original peoples of India, and are

a savage and independent race MIKIRS -A tribe inhabiting the hills in Nowgong, Assam, undoubtedly the most peace-

ful and industrious of hil tribes A fine athletic race, hut devoid of personal courage MOPLAHS, or MAPILAS -The Mahomedan inhabitants of Malabar, in the Madras

Presidency A wealthy, intelligent and enterprising race, but fanatical and troublesome MUGS or MAGHS -The indigenous people of Arakan, short in stature, hardy, inoffensive and trustworthy, with round, flat faces and a copper complexion

NAGAS-Tribes virtually independent, extending from North Cachar as far as the Diling river in the extreme eastern point of Assam They all belong to the Indo Chinese stock speaking various dialects, which differ so much, that their own villages, lying scarcely a day's journey apart, can only hold communication by means of a foreign tongue The term Naga is probably derived from the Bengali word Nangta, meaning naked, or from the Sanskrit word naga, a snake The principal clans are the Angamis, the Rengmas and the Kachas, the first named being the most numerous and powerful An athletic, and by no means a bad looking race, brave and warlike, but also treacherous and vindictive

NAYARS-The aristocracy of Malabar, formerly hereditary soldiers, now engaged in

handicraft Numerous and influential. NAMBURIS -- A class of Brahmans, considered to be aboriginal and very highly regarded, inhabiting southern India.

NAYAKS -A wild tribe inhabiting the forests between the Mahi and the Nerbudda rivers in Rewakanta, Gujarat

NEIVARS - The original inhabitants of the fertile parts of Nepal before its conquest by the Gurkhas They are an industrious, ingenious, peaceable and able bodied race, chiefly engaged in agriculture, trading and handicraft They are Buddhists, but do not acknowledge, the Lamas of Thibet - (See page 181)

OORIYAS - The original inbuhitants of Orissa, from whom the province takes its name. They are a timid, effeminate, dishonest and dissolute race, but industrious

PAHARIS -The inhabitants of the mountains, or hill men

PARSIS - The descendants of a large colony of fire worshippers, who left Persia in consequence of Moslem persecution and settled in Bomhay, Surat and Gujarat Many are now rich merchants and land owners, others are shop keepers, artizans and domestic servants. They are very hospitable and liberal, especially to their own people —(See p 159)

PATHANS—People of Afghan descent, inhabiting the North Western frontier of the Punjab, Bhopal and other parts of India, (See p. 173 174)

POVINDAHS -A class of Afghans, who are at once agriculturists, traders and warriors

(See p 170 176) RAJPUTS (Sons of kings) - The descendants of the ancient Hindu princes, and the dominant population of that portion of India on the north west called Rajputana They are a tall, proud, vigorous and athletic race, and sometimes make excellent soldiers. They are in

ordinately addicted to opium, and are fit for nothing until they take it, and after its effects have presed, are little better than idiots, until the dose be repeated. Indulgence in this baneful habit is more necessary to the Rajput than his food, and to eat opium together is the most inviolable pledge.

RA MUSIS—A predatory tribe in the neighborhood of Poona and Satara, in the Bombay Presidency They are fatalists and have no fear of law or punishment

ROHILLIS — A people of Al_ahan descent, addicted to agriculture as well as arms, occupy ing the tract called Rohilshand, named after them. They are a till and handome rice, of a comparatively fair complexion, animated admittelligent, but atterfy devoid of trubfoliaes. Crimes are frequent amongst them and perjury is almost universal. The Rohillis entered Hindustan early in the eighteenth century and conquered the distinct which bears here name. They were completely defected by the British at the battle of Katra in 1774, an event which brought the Rohills sway to un end.

SAURIAS, or SAURAS -A wild but harmless and peaceful race inhabiting the southern part of Orissa in the Bengal jurisdiction

SHAIKH UNATIS—A tribe of Rajputs inhabiting the northern district of the Jeypore state, which is named named after them—(See p. 103)

SIGHS (Disciples.)—Verbyrous sect founded by one Aranal, the Gurn or leader, in the fifteenth century, and occupying the Punjab, principally Sirland. They were originally pure Theast but have since much degenerated, regarding their founder as worthy of divine honors. Their religion is chiefly confined to the Punjab, and is an heretical form of the Brithmunical titl, its chief characteristic being the informace of its followers, a regard for animal life, chiefly in reference to the cow, which is held sacred, a belief in transmigration, and a total abstance form tobrace, but Phing, oppuring significantly freely used. They have no caste prejudices and are divided into several sects, the two principal of which are, the Khad xi' or old Sikhs, and the 'Singh' or hons. The sacred book of the bikhs, is called the Girus, they drew the sword, and one sect commenced to require temporal power, taking the name of 'Singhs, while the rest remixed quet under the name of 'Hailas' All are distinguished thick by their latted of the Mahomedans. They are a tall, vigorous and athletic race, and make excellent soldiers.

SOVTHAIS—A primitive people inhabiting the portion of the Bhagalpur division of Bengalpur SUDAS—A rude people probably of Rapput I neage, chiefly shepherds lining in grass huts in the Thar or Great Desert of Rapputans, in a state of great pravation and mises. Their principal source of income consists in the sale of their daughters to neh Mahomedans, and to, the Janus of Cutch

THACS—A confederacy of professional murderers found chiefly in Central Ind 1, and desout worshippers of the goddess Kali. They have been very greatly reduced in numbers, and may now be regarded as almost extinct, owing to the severe measures of the British Government for their suppression.

TIVARS -Cultivators on the Malabar coast, much despised by the other inhabitants.

TUDAS or TUNDAVERS—A small, primitive and normatic tribe, occupying some of the highest valleys of the Nilgans. They are gnorms of the myshology, language manners and customs of the Hindus and are tall, where race, of a bold appearance, but quiet and honest. Their wealth causists of large heads of buffaloes, which they tend and milk, exchanging the produce of their datures for grain.

URIVAS -(See Ourwas)

WAGHIAS - A predatory tribe of Rappuis found in the Kattywar peninsula, Gujarat

IVARALIS -A wild tribe speaking the Maritha Jingunge, and living in the forests of Northern Konkin, Bombay Presidency

VANADIS—A wild savinge race inhibiting the country on the Coromandel Coast in the vicinity of the Nellore district, Madras Presidency. In habits religion and language they are quite distinct from their ne ghbours—they are short in stature and of black complexion, capable of enduring great fatigue, and remarkably faithful and honest.

AUTHORITIES CONSULTED.

Administration Reports from 1872 73 to 1878 79, of the Punjab, North Western Provinces and Outh, Bengal, Assam, Central Provinces, Hyderabrid Assigned Districts, British Burmath, Bombay Presidency, Madras Presidency, Mysore, Coorg, Rajputana and Central India Agencies.
